IKE WILL NOT TALK POLITICS WITH BROWNELL

By MAEVLIN L. ARROWSMITH
DENVER (AP)—President Eisenhower gets back into still another government business field today at a hospital conference with Atty. Gen. Brownell.

Step by slow step since his Sept. 24 heart attack, the President has been resuming active direction of international and domestic policy at meetings with top administration officials.

He will discuss Justice Department matters with Brownell, who played an important backstage role in helping win the Republican presidential nomination for Eisenhower in 1952.

Both the attorney general and the Denver White House said in advance of today's conference, however, that politics was not on the agenda.

A prominent physician said he believes the President can run for another term if he wants to.

Physically Able To Run

Dr. Eugene Lepeschkin of the University of Vermont Medical School, consulted recently on the Eisenhower case, said in Burlington, Vt., that "if the President avoids any emotional or physical strain and meantime watches his health, he would be physically able to run again."

The general impression here still is that Eisenhower, although convalescing steadily, won't seek a second term. There had been speculation he might want to talk over his plans with Brownell.

Brownell said in Washington yesterday that he had no plans to get into politics at the meeting with Eisenhower. He refused to comment when asked whether he believed the President would run again. And he said it would be "inappropriate" for him to suggest that the Republicans should nominate if the President bows out.

Eisenhower continued to make more progress toward recovery yesterday. All three medical bulletins from the hospital carried the usual encouraging note—no sign of any complications at the end of almost a month of convalescence.

And the doctors put their okay on a presidential request for a favorite dish—quail hash, which Eisenhower had for lunch.

Runaway Truck Hits 10 Autos, Then Crashes

KITTANNING, Pa. (AP)—Truck-driver Charles DeFrain—plucky, lucky and scared—stayed with his runaway rig as it careened down a steep hill, smashing 10 autos and injuring three persons before crashing to a halt.

The brakes on the steel-laden truck gave way about one-third of the way down Route 422 yesterday. The 42-year-old Williamsport, Pa., driver told police later: "All I did was push on the brake, blow the horn and pray."

Making a nearly 90-degree turn at the foot of the hill, the speeding truck sideswiped 10 autos before it stopped on a main street of this western Pennsylvania town. Leaking gasoline ignited, but firemen quickly put out the blaze in the truck and the last car it hit.

DeFrain was not injured. No charges were filed.

SHEELY WILL NOT ACCEPT POST ON HIGHER COURT

Judge W. C. Sheely told 350 attending a Democratic Rally at the Rock Top Hotel, near Cashtown, Thursday evening that "I can assure you I will not accept any appointment to a higher court even if such an appointment is offered to me. I am interested only in one job, and that is being judge of the Adams-Pulton District."

The jurist said he made the announcement because of "rumors" he may be slated for a higher court appointment. In considering his candidacy for re-election as judge of the Adams-Pulton courts, "voters should consider my record of service," Judge Sheely said. Adding that rumors concerning his possible appointment to a state judgeship also claim he is running for re-election "to hold the job for the Democrats," Sheely said, "That would be impossible. If a judge does resign," he pointed out, "an appointment is made to fill the vacancy only until the next general election which would be the following year."

Study Qualifications

Speaking of the various candidates offered by the Democratic party, Judge Sheely said, "You are hiring a group of men and women to run your business—for the county government is your business. You hire them by your votes. So look closely at their qualifications before you decide whom you are going to hire. I believe you will find the Democratic slate second to none in having a group of well qualified men representing it at the general election."

Former State Senator John S. Rice served as toastmaster for Thursday's meeting, the first of nine to be held by the Democrats prior to the election.

Future Meetings

Democratic State Committeeman Jay Bringham announced additional meetings as follows:

Tuesday, October 25, 7:30 p.m., CWV Home, Bonneville; Wednesday, October 26, 7:30 p.m., K of C Hall, McSherrystown; Thursday, October 27, 7:30 p.m., Democratic Men's club meeting at Lincoln Logs; Friday, October 28, 8 p.m., at Dorsey-Stranton American Legion Post, W. High St., with Andrew Bradley, state budget secretary, as speaker; November 1, 7:30 p.m., Hampton Firemen's Hall; November 2, 7 p.m., general rally of all wards in Gettysburg at the VFW Home, E. Middle St.; November 3, 7:30 p.m., Irishtown Fire Hall; November 4, 8 p.m., county-wide rally at the Court House with Bert Eppley, president of the State Young Men's Democratic Club, as speaker.

Bringham said candidates will be present at the various meetings and rallies and that "all are invited, Democrats and Republicans, to attend any or all of them."

Bringham presided at the session. (Continued On Page 3)

High St. School Sold For \$19,000

LOCAL BANKER TALKS FINANCES AT CLUB SCHOOL

The second session of the Business and Professional Women's Club's "School for Modern Living" was held at the YWCA Thursday night when Edmund W. Thomas, president of the First National Bank of Gettysburg, conducted a class on "Sensible Finances." He complimented the club on selecting this topic as he said "finances touch the lives of more people than is realized." As a past president of the Pennsylvania Bankers Association he stated that they are now spending thousands of dollars in Pennsylvania to bring people closer to their banks and good financing. They are now preparing a booklet on "How to Use Your Bank" to be used in schools, colleges and universities.

"Sensible finances," he said, "involve two things—deposits of money in a bank and borrowing. Distress is due to inability of people to handle money properly."

Talks Savings Accounts

From the deposit angle he discussed savings accounts "which are readily available and have a fair return," voluntary or living trusts for children, investments in stocks that grow with the country, U.S. Savings bonds, building and loan associations and insurance.

From the following angle he said that "young couples nowadays prefer to buy a home on a mortgage and pay principal and interest rather than to pay rent for years," and that "installment borrowing, with group indebtedness life insurance on the unpaid balance, has grown tremendously in the past few years. This later loan method is used to purchase cars, household equipment, and other items."

He said, "styles in financing have changed greatly. Our parents used to buy a twenty-five cent clock of ice every day. Now young couples finance an electric or gas refrigerator. This comparison can be carried through in many lines."

PTA Panel Discusses Health Of Children

A panel discussion on "Your Child—What of His Health?" will be presented at the meeting of the New Oxford Parent-Teachers Association Monday evening at 7:30 o'clock in the New Oxford elementary school building.

Mrs. J. Francis Yake Jr. and Robert Keith will be moderators for the panel which will include Dr. John Menges, school physician; Dr. Karl Hoffmeister, school dentist; Mrs. Mary Stock, home economics instructor, and Mrs. Vesta Smith, school nurse.

The program will be followed by a social hour and singing of new members.

CONFERENCE ON MUSIC TO OPEN THIS EVENING

The Lutheran Faculty Conference on music sponsored by the Board of Higher Education of the United Lutheran Church of America will open this evening at 7 o'clock at the Gettysburg Lutheran Seminary. The theme is "The Place of Music in the Curriculum of the Church College for the Contemporary Life of the Church." Sessions will be conducted through Saturday and on Sunday morning.

Parker B. Wagnild, music instructor at Gettysburg College, will preside. Organ accompaniment will be provided by Dr. U. S. Leupold, Waterloo College, Canada.

Registrations will be made at the administration building this afternoon from 4 until 7 p.m. At 7 o'clock Dr. Leupold will conduct devotions in the social room. Dr. Harry P. Baughman, president of the seminary, will greet the assembly.

Dr. Wickey To Speak

At 7:30 o'clock Dr. Gould Wickey, executive secretary of the Board of Higher Education, UCLA, will outline the purpose of the conference. Dr. Edward T. Ford 3rd, member, joint commission on the hymnal and joint commission on the liturgy and pastor of Trinity Church, Philadelphia, will discuss "The Needs of the Church in the Field of Music as Related to our Church Colleges." A discussion will follow.

Dr. Theodore Hoeltz-Nickel, member of the international conference on Lutheran church music and of the faculty of Valparaiso University, will report at 8:45 o'clock on the International Assembly for Lutheran Church Music. A coffee hour will be held at 9:15 o'clock.

Breakfast will be served Saturday morning at 8 o'clock in the refectory. Sister Sophie Damme, Lutheran Deaconess Training School, will lead devotions at 9 o'clock in the social room. Dr. Paul H. Ensrud will address the conference at 9:30 o'clock on "Church Music Within the College Curriculum." A discussion will follow. At 11 o'clock Dr. Harvey D. Hoover, Gettysburg, will present work on the new service book and Dr. Edgar S. Brown Jr., director, department of worship, ULCA, will present work on the department of worship in the ULCA. This session will close at noon for lunch which will be served in the refectory at 12:30 o'clock.

Organ Recital

The group will visit the Church of the Abiding Presence Saturday afternoon from 1:15 until 2 o'clock. (Continued On Page 2)

N.C.C.W. HONORS PAST LEADERS; HEAR ADDRESS

The past presidents of the NCCW were honored at a reception Thursday evening at the close of a regular meeting in Xavier Hall. Corsages of lavender and white mums tied with green and gold ribbon were presented to Mrs. George F. Eberhart, Mrs. J. Walter Coleman and Mrs. Ralph Johnson. Flowers were sent to past presidents unable to attend.

Mrs. Theodore M. Tussing discussed "The 13th—the Greatest of Centuries." She told of the great universities established in Europe, especially the University of Paris.

"It was a strange thing in those days," she said, "but the middle class was better educated than the upper class. Members of the nobility, with their power and prestige, did not think it necessary to learn to read, write and speak various languages."

Women Designed Cathedrals

She described King Louis who "sat under a tree all day to listen to the complaints of his subjects, especially the poor, and tried in every way to mete out justice."

"Byzantine-type art in the 13th century," she said, "began to give way to art with more depth and dimension. It was a time when great future events were predicted, even a means of transportation which would go faster than a horse. Magnificent cathedrals were begun and, strangely enough, many of them were designed by women."

"Many people don't know it," said (Continued On Page 2)

High Street School Is Sold To Wilbur L. Plank Firm At Public Sale Here Thursday

Bequeaths \$2,000 To Two Churches

Christ Lutheran Church and the Church of the Brethren are each bequeathed \$1,000 in the will of MaBelle Herter, late of Gettysburg, entered for probate in the office of the county register and recorder today. A bequest of \$200 is made to the Adams County Free Library.

Ralph E. and Dorothy R. Barley, Harrisburg, Pa., are executors of the "more than \$5,000" estate.

The Gettysburg Engineering and Equipment Co., Inc., of which Wilbur L. Plank, 123 Springs Ave., is president, purchased the High St. School, E. High St., at public auction Thursday afternoon for \$19,000, \$4,000 more than the amount bid by the Gettysburg borough council.

D. Edwin Benner, R. 1, school board auctioneer for the 97-year-old school house, Thursday afternoon at 2 o'clock asked Attorney John MacPhail, representing the school board, to list the terms of the sale.

After MacPhail had completed the list, Benner sought to start bidding at \$12,000. There were no takers. Benner dropped by \$500 to \$4,000 when Attorney Charles W. Wolf made the first bid. Wolf revealed after the sale that he was representing Plank in the bidding.

Slow Progress

The bidding moved upward \$100 at a time, with Rev. Dr. Howard S. Fox, representing Trinity Evangelical Reformed Church, Attorney Eugene Hartman representing LeRoy E. Smith, W. Broadway, and Councilman Philip M. Jones representing council.

At several points Jones jumped the bid by several hundred dollars. Smith dropped out of the bidding for a time, apparently to give council an opportunity to buy, but resumed bidding after it was evident that council had reached its top figure at \$15,000.

The bidding was halted at \$14,200 for a five-minute period while the school board held a special meeting to determine whether it was satisfied to sell the building at the highest bid above the \$14,200 figure. The \$14,200 figure was a bid submitted by borough council.

Future Use Unknown

The school board reported to Benner, at the close of the recess, that it was willing to let the property go at that figure, or above, and the bidding was resumed.

Plank said following the sale that he had not decided what he was going to do with the building. "There are so many things for which it could be used that I have not made up my mind as yet and I am open to suggestions," Plank said.

The oldest public school in the borough, High St. School opened for its first classes on October 1, 1838. During the battle of Gettysburg it was used as a hospital. The school board records in August 1863 relate that the secretary was to contact the surgeon-general to determine whether the school board could have the building back in time to open school that fall. Apparently the surgeon-general gave the building back in time, and in good shape, and the school opened as usual in the fall after the battle.

ZETTLE CLAIMS MOST OF COUNTY LAND NEEDS LIME

"Soil Management and Soil Testing" was discussed by County Farm Agent Frank S. Zettle Thursday evening at a meeting of the Upper Adams Young Farmers Association in the Biglerville High School Agriculture room.

Forty-six per cent of 1,800 Adams County soil samples tested by Zettle last year showed the farms "needed lime so badly that without it crop production was decreased."

"On 500 soil samples from Adams County on which Pennsylvania State University made a complete soil analysis, 60 per cent were low in phosphorus and potash and 53 per cent were low in organic matter. This shows we have been doing a poor job of guessing our soil needs."

Bacteria Regulates Fertilizer

"The amount of fertilizer available to plant growth is regulated by the bacteria in the soil. These bacteria are not active when the soil is too acid and so we do not get full value from the fertilizer we apply. We get the most from nitrogen when the PH of our soil is between 6 and 8, and phosphorus and potash are more available when our soils test from 6.5 to 7 PH. When growing potatoes our soils should not be above 5.5 PH. With this amount of acidity we will be less likely to get scab infection on potatoes."

"If your soil needs over two tons of lime, plow down half of it and put half on top. Soil with high organic matter will need more lime. Since lime is inexpensive, your requirements should be checked every three or four years to determine your needs."

Paul Pitzer, vice president, presided. The 19 members present agreed to hold a series of special meetings during the winter, with different committees planning the meetings. The Farm Improvement and Electricity Committee, comprising Norman Blocher, Guy Dearcorff, Russell Wertz, Keith Rex and Thomas Weater, was named to arrange the November meeting. John W. White and Cecil R. Snyder are advisors for the Young Farmers group.

Eagles Auxiliary To Hold Banquet

The Ladies' Auxiliary of the Eagles completed plans at a meeting Thursday night for their annual turkey banquet to be held Tuesday evening, Nov. 1, at the Lincoln Logs at 6:30 o'clock. Those planning to attend the banquet are asked to make reservations with the secretary, Mrs. Raymond B. Singley, by Saturday.

Presiding at the meeting, Mrs. Francis I. Smith, vice president, won the door prize. Mrs. Singley received the Good of the Auxiliary prize.

PATIENT IS IMPROVING

Mrs. Gilbert J. Lupp, E. Water St., is reported as "somewhat improved" at the University of Pennsylvania where she has been a patient for the last two weeks. She will probably remain there two more weeks.

IN COLLEGE CHOIR

Miss Marjorie Musseman, a Junior, was recently selected as a member of the 56-voice Collegiate Chorus at Goshen College, Goshen, Ind.

Police Check Two Clues In Brutal Slaying Of 3 Boys

CHICAGO (AP)—Police today checked two new leads in the strangulation murders of three young boys.

Sheriff Joseph D. Lohman said a test would be given to a 47-year-old unemployed laborer who, along with his deaf mute brother, in the wooded area where the victims' bodies were found Tuesday afternoon.

Indiana authorities were questioning a 19-year-old girl who said she "knew who the fellows was" in the slaying of Robert Peterson, 14, John Schuster, 13, and his brother Arden Jr., 11.

Lohman said the test was planned for Edward Rohlfes, father of nine children.

He said Rohlfes and his brother Herman, 52, were picked up after a forest ranger reported seeing a dark truck near the woods Monday night, not far from the area where the victims' bodies were found.

Held Without Charge

Lohman said Edward was held without charge, but Herman was released.

Lohman said both brothers had been known for some time as trouble makers and said they had no other bodies or other Monday night when they left the woods Tuesday morning.

Edward Rohlfes was quoted as saying he and his brother slept in the truck, and that they often premeditated or slept in the woods, about 12 miles from their home.

Lohman said that if Rohlfes' story is verified by the test, the time in which the bodies could have been left in the woods would be narrowed down to a few hours around midday Tuesday.

Served Jail sentence

Sheriff's police said Edward Rohlfes served 30 days in jail last year for larceny with his former wife and since had been arrested for non-support of the former wife and their children.

A girl, who gave her name as Gloria Vazquez and said she was from the Sacramento, Calif., area, was picked up without charge at Brookville, Ind., after she went to a priest to confess an automobile theft.

Sheriff James Hixon of Brookville said she told of being in Chicago last weekend and that she knew who the fellows was "in the slaying."

Sheriff James Hixon of Brookville said she told of being in Chicago last weekend and that she knew who the fellows was "in the slaying."

Sheriff James Hixon of Brookville said she told of being in Chicago last weekend and that she knew who the fellows was "in the slaying."

GROUP CREATES INCENTIVE PRICE ON SHORN WOOL

Wool growers will receive 62 cent per pound shorn wool incentive price and will have a portion of their income from the sale of wool deducted to pay for advertising promoting the use of wool. The Adams County Agricultural Stabilization and Conservation Committee announced today.

The shorn wool incentive price has been set at 62 cents a pound for the 1956 marketing year, beginning April 1, it was announced. That amount is the same as the incentive price in effect for the 1955 marketing year which ends March 31. The 1956 wool price is approximately 106 per cent of the August 15, 1955, parity price for wool.

The shorn wool price is established under provisions of the National Wool Act of 1954 which directs the U. S. Secretary of Agriculture to support the price of shorn wool at an incentive level to encourage an annual production of 300 million pounds of shorn wool. The act makes 70 per cent (Continued On Page 2)

PRESBYTERIAN MISSIONARY SPEAKS SUNDAY

Rev. George B. Leeder, Presbyterian missionary on furlough from India, will speak at the Presbyterian Church Sunday evening at 8 o'clock at a special adult forum and reception in appreciation of the work done by Rev. and Mrs. Leeder in India. The local congregation has a special support relationship with the Leeders.

Rev. Mr. Leeder is in charge of the Boys' High Section of the United Christian Schools in Jullundur. This cooperative project, sponsored by Presbyterians and Methodists, is a new venture in education in India, and is especially designed to train young people for leadership and service in rural communities.

Principal Of School

When Rev. Mr. Leeder went to India in 1926 he was assigned to Lahore for work among the students of Rang Mahal High School, a Presbyterian mission school for boys. Later he was transferred to Ludhiana where for a number of years he was teacher and principal at Ewing Christian High School. In 1941 he was made principal of the Union Industrial School in Saharanpur, an institution which emphasized the practical skills needed to meet the growing industrial demands of India. He took up his present work in Jullundur in 1943.

In addition to his experience in educational work Rev. Mr. Leeder has traveled extensively in India and has formed close friendships with people from many different social and religious groups. "His many contacts with Indian youth and his interest in the development of the country's political life make him an able interpreter of events in India," a church official said.

Rev. Mr. Leeder is from Pennsylvania, and is a graduate of Lafayette College and of Princeton Theological Seminary.

Large Crowd At Dairies' Opening

A large crowd attended the formal opening of the Penn Dairies, Inc. demonstration restaurant and milk plant on the Harrisburg Rd. Thursday from 2 to 10 p.m.

Visitors started arriving before the official opening hour and continued throughout the eight-hour opening.

E. C. Ott, 222 Springs Ave., was awarded the 21-inch TV set.

WOMEN TO LEARN ART OF SEWING, COPPER CRAFTS

Plans for a number of activities in which groups throughout the county will participate, were announced today by Miss Florence Flieger, county home economics extension representative.

Next Tuesday and Wednesday from 10 a.m. to 3 p.m. a leader training meeting for instruction in the making of copper planners will be held at the Adams Electric Cooperative building, near N. Stratton St.

Learn Various Techniques

Next Friday, the first session of a dress making workshop will be held at the Adams Electric Cooperative building, starting at 9 a.m. Miss Flieger explained that the dress making workshop is for all homemakers interested in making basic cotton dresses. The techniques of making dresses will be explained at the October 28 session and then the garments will be constructed at sectional meetings. The sectional meetings will be held in Gettysburg November 1, 3, 10, and 15, from 10 a.m. to 3 p.m., each of those days; in Ardmoreville on November 2, 4, 9, and 11, at the same hours, 10 a.m. to 3 p.m., each day.

In Hanover the sessions will be held November 29, December 1, 6, and 8 at the same hours daily.

Plan Christmas Tea

A meeting of group leaders will be held October 31 at 2 p.m. at the Adams Electric Cooperative to plan for the annual Christmas tea which is scheduled for December 7 at 2 p.m.

The annual Adams County Extension Association banquet meeting will be held November 16 at 6:30 p.m. at the New Oxford Fire Hall. Tickets for that dinner may be obtained from the leaders of the homemaking groups, members of the executive committee or from the county extension office.

8 WILL ATTEND CLUB SESSIONS

Miss Martha Stallsmith, president of the Gettysburg Sororist Club, will head the local delegation to the North Atlantic Regional Conference in Haddon Hall, Atlantic City Saturday and Sunday.

Other local women attending will be: Mrs. Elizabeth Hennig, Mrs. Guyon E. Buehler, Mrs. Donald E. Myers, Gettysburg and Miss Anna Weaver and Miss Evelyn Althoff, Littlestown.

Several hundred delegates from New Jersey, Pennsylvania, New York, Delaware and part of West Virginia will be present. Principal speakers will be the American Federation president, Mrs. Phyllis B. Batten, New Jersey, Miss Martha R. Servis, executive secretary of Philadelphia, and Richard Tobin, director of public affairs for the New York Herald Tribune. Mr. Tobin, well known for the Tribune Forums for which he is responsible, will address the conference on the subject "History in the Making."

The conference will be under the leadership of the regional governor, Mrs. Dora S. Lewis, New York City, with the Atlantic City Club acting as hostess.

Eisenhower's Declaration On Peace Talks With Reds Clarified In New Booklet

WASHINGTON (AP)—President Eisenhower's peace talks with Russia were spread on the record today as Secretary of State Dulles prepared to take up where the President left off at the Geneva Big Four conference.

They included Eisenhower's assurance to Russia that "under no circumstances is the United States ever going to be a party to aggressive war against any nation."

An 88-page booklet of about 40,000 words, made public last yesterday by the State Department, included formal statements made by Eisenhower and other heads of government at the summit conference last July.

These statements already had been reported in substance. However, the record included the texts of a half dozen of Eisenhower's statements which had never been made fully public. Only previously published statements by the other principals were released.

Talks To Zhukov

At one point, the President directed his remarks especially at his old World War II comrade-in-arms Marshal Georgi Zhukov, who was at Geneva as Russia's defense minister.

"I would particularly like my friend, Marshal Zhukov, to listen to what I have to say. I have known him for a long time and he knows that, speaking as soldier to soldier, I have never uttered a single word that I did not believe to be the truth."

Eisenhower protested Russia's contention that the North Atlantic Treaty Organization, whose forces Eisenhower headed in 1951 as first supreme commander, was aggressively aimed at the Soviet.

Seek Solutions

"I accepted that job because I believed it to be a true agency for peace," Eisenhower told Zhukov. "Personally I have had enough of war."

The record reflects Eisenhower's insistence that he, Soviet Premier (Continued On Page 3)

Runaway Truck Hits 10 Autos, Then Crashes

KITTANNING, Pa. (AP)—Truck driver Charles Deffrain—plucky, lucky and scared—stayed with his runaway rig as it careened down a steep hill, smashing 10 autos and injuring three persons before crashing to a halt.

The brakes on the steel-laden truck gave way about one-third of the way down Route 422 yesterday. The 42-year-old Williamsport, Pa., driver told police later: "All I did was push on the brake, blow the horn and pray."

Making a nearly 90-degree turn at the foot of the hill, the speeding truck sideswiped 10 autos before it stopped on a main street of this western Pennsylvania town. Leaking gasoline ignited, but firemen quickly put out the blaze in the truck and the last car it hit.

Deffrain was not injured. No charges were filed.

High St. School Sold For \$19,000

(Read Accompanying Story For Details)

Judge W. C. Sheely told 350 attending a Democratic Rally at the Rock Top Hotel, near Cashtown, Thursday evening that "I can assure you I will not accept any appointment to a higher court even if such an appointment is offered to me. I am interested only in one job, and that is being judge of the Adams-Fulton District."

The jurist said he made the announcement because of "rumors" he may be slated for a higher court appointment. In considering his candidacy for re-election as judge of the Adams-Fulton courts, "voters should consider my record of service," Judge Sheely said. Adding that rumors concerning his possible appointment to a state judgeship also claim he is running for re-election "to hold the job for the Democrats," Sheely said, "that would be impossible. If a judge does resign," he pointed out, "an appointment is made to fill the vacancy only until the next general election which would be the following year."

Study Qualifications

Speaking of the various candidates offered by the Democratic party, Judge Sheely said, "You are hiring a group of men and women to run your business—for the county government is your business. You hire them by their votes. So look closely at their qualifications before you decide whom you are going to hire. I believe you will find the Democratic slate second to none in having a group of well qualified men representing it at the general election."

Former State Senator John S. Rice served as toastmaster for Thursday's meeting, the first of nine to be held by the Democrats prior to the election.

Future Meetings

Democratic State Committeeman Jay Bringham announced additional meetings as follows:

Tuesday, October 25, 7:30 p.m., CWV Home, Bonneville; Wednesday, October 26, 7:30 p.m. K of C Hall, McSherrystown; Thursday, October 27, 7:30 p.m., Democratic Men's club meeting at Lincoln Logs; Friday, October 28, 8 p.m. at Dorsey-Stanton American Legion Post, W. High St., with Andrew Bradley, state budget secretary, as speaker; November 1, 7:30 p.m., Hampton Firemen's Hall; November 2, 7 p.m. general rally of all wards in Gettysburg at the VFW Home, E. Middle St.; November 3, 7:30 p.m., Irishtown Fire Hall; November 4, 8 p.m. county-wide rally at the Court House with Best Eppley, president of the State Young Men's Democratic Club, as speaker.

Bringham said candidates will be present at the various meetings and rallies and that "all are invited, Democrats and Republicans, to attend any or all of them."

Bringham presided at the session.

Wool growers will receive 62 cent per pound shorn wool incentive price and will have a portion of their income from the sale of wool deducted to pay for advertising promoting the use of wool, the Adams County Agricultural Stabilization and Conservation Committee announced today.

The shorn wool incentive price has been set at 62 cents a pound for the 1956 marketing year, beginning April 1, it was announced. That amount is the same as the incentive price in effect for the 1955 marketing year which ends March 31. The 1956 wool price is approximately 106 per cent of the August 15, 1955, parity price for wool.

The shorn wool price is established under provisions of the National Wool Act of 1954 which directs the U. S. Secretary of Agriculture to support the price of shorn wool at an incentive level to encourage an annual production of 300 million pounds of shorn wool. The act makes 70 per cent

SHEELY WILL NOT ACCEPT POST ON HIGHER COURT

Judge W. C. Sheely told 350 attending a Democratic Rally at the Rock Top Hotel, near Cashtown, Thursday evening that "I can assure you I will not accept any appointment to a higher court even if such an appointment is offered to me. I am interested only in one job, and that is being judge of the Adams-Fulton District."

The jurist said he made the announcement because of "rumors" he may be slated for a higher court appointment. In considering his candidacy for re-election as judge of the Adams-Fulton courts, "voters should consider my record of service," Judge Sheely said. Adding that rumors concerning his possible appointment to a state judgeship also claim he is running for re-election "to hold the job for the Democrats," Sheely said, "that would be impossible. If a judge does resign," he pointed out, "an appointment is made to fill the vacancy only until the next general election which would be the following year."

Study Qualifications

Speaking of the various candidates offered by the Democratic party, Judge Sheely said, "You are hiring a group of men and women to run your business—for the county government is your business. You hire them by their votes. So look closely at their qualifications before you decide whom you are going to hire. I believe you will find the Democratic slate second to none in having a group of well qualified men representing it at the general election."

Former State Senator John S. Rice served as toastmaster for Thursday's meeting, the first of nine to be held by the Democrats prior to the election.

Future Meetings

Democratic State Committeeman Jay Bringham announced additional meetings as follows:

Tuesday, October 25, 7:30 p.m., CWV Home, Bonneville; Wednesday, October 26, 7:30 p.m. K of C Hall, McSherrystown; Thursday, October 27, 7:30 p.m., Democratic Men's club meeting at Lincoln Logs; Friday, October 28, 8 p.m. at Dorsey-Stanton American Legion Post, W. High St., with Andrew Bradley, state budget secretary, as speaker; November 1, 7:30 p.m., Hampton Firemen's Hall; November 2, 7 p.m. general rally of all wards in Gettysburg at the VFW Home, E. Middle St.; November 3, 7:30 p.m., Irishtown Fire Hall; November 4, 8 p.m. county-wide rally at the Court House with Best Eppley, president of the State Young Men's Democratic Club, as speaker.

Bringham said candidates will be present at the various meetings and rallies and that "all are invited, Democrats and Republicans, to attend any or all of them."

Bringham presided at the session.

High Street School Is Sold To Wilbur L. Plank Firm At Public Sale Here Thursday

The Gettysburg Engineering and Equipment Co., Inc., of which Wilbur L. Plank, 123 Springs Ave., is president, purchased the High St. School, E. High St., at public auction Thursday afternoon for \$19,000, \$4,000 more than the amount bid by the Gettysburg borough council.

D. Edwin Benner, R. 1, school board auctioneer for the 97-year-old school house, Thursday afternoon at 2 o'clock asked Attorney John MacPhail, representing the school board, to list the terms of the sale.

After MacPhail had completed the list, Benner sought to start bidding at \$12,000. There were no takers. Benner dropped by \$500 to \$4,000 when Attorney Charles W. Wolf made the first bid. Wolf revealed after the sale that he was representing Plank in the bidding.

Slow Progress

The bidding moved upward \$100 at a time, with Rev. Dr. Howard S. Fox, representing Trinity Evangelical Reformed Church, Attorney Eugene Hartman representing LeRoy E. Smith, W. Broadway, and Councilman Philip M. Jones representing council.

At several points Jones jumped the bid by several hundred dollars. Smith dropped out of the bidding for a time, apparently to give council an opportunity to buy, but resumed bidding after it was evident that council had reached its top figure at \$15,000.

The bidding was halted at \$14,200 for a five-minute period while the school board held a special meeting to determine whether it was satisfied to sell the building at the highest bid above the \$14,200 figure. The \$14,200 figure was a bid submitted by borough council.

Future Use Unknown

The school board reported to Benner, at the close of the recess, that it was willing to let the property go at that figure, or above, and the bidding was resumed.

Plank said following the sale that he had not decided what he was going to do with the building. "There are so many things for which it could be used that I have not made up my mind as yet and I am open to suggestions," Plank said.

The oldest public school in the borough, High St. School opened for its first classes on October 1, 1858. During the battle of Gettysburg it was used as a hospital. The school board records in August 1863 relate that the secretary was to contact the surgeon-general to determine whether the school board could have the building back in time to open school that fall. Apparently the surgeon-general gave the building back in time, and in good shape, and the school opened as usual in the fall after the battle.

Bequeaths \$2,000 To Two Churches

Christ Lutheran Church and the Church of the Brethren are each bequeathed \$1,000 in the will of MaBelle Herter, late of Gettysburg, entered for probate in the office of the county register and recorder today. A bequest of \$200 is made to the Adams County Free Library.

Ralph E. and Dorothy R. Barley, Harrisburg St., are executors of the "more than \$5,000" estate.

ZETTLE CLAIMS MOST OF COUNTY LAND NEEDS LIME

"Soil Management and Soil Testing" was discussed by County Farm Agent Frank S. Zettle Thursday evening at a meeting of the Upper Adams Young Farmers Association in the Biglerville High School Agriculture room.

Forty-six per cent of 1,800 Adams County soil samples tested by Zettle last year showed the farms "needed lime so badly that without it crop production was decreased."

"On 500 soil samples from Adams County on which Pennsylvania State University made a complete soil analysis, 60 per cent were low in phosphorus and potash and 53 per cent were low in organic matter. This shows we have been doing a poor job of guessing our soil needs."

Bacteria Regulates Fertilizer

"The amount of fertilizer available to plant growth is regulated by the bacteria in the soil. These bacteria are not active when the soil is too acid and so we do not get full value from the fertilizer we apply. We get the most from nitrogen when the PH of our soil is between 6 and 8, and phosphorus and potash are more available when our soils test from 6.5 to 7 PH. When growing potatoes our soils should not be above 5.5 PH. With this amount of acidity we will be less likely to get scab infection on potatoes."

"If your soil needs over two tons of lime, plow down half of it and put half on top. Soil with high organic matter will need more lime. Since lime is inexpensive, your requirements should be checked every three or four years to determine your needs."

Paul Pitzer, vice president, presided. The 19 members present agreed to hold a series of special meetings during the winter, with different committees planning the meetings. The Farm Improvement and Electricity Committee, comprising Norman Blocher, Guy Deardorff, Russell Wertz, Keith Rea and Thomas Weaver, was named to arrange the November meeting. John W. White and Cecil R. Snyder are advisors for the Young Farmers group.

CONFERENCE ON MUSIC TO OPEN THIS EVENING

The Lutheran Faculty Conference on music sponsored by the Board of Higher Education of the United Lutheran Church of America will open this evening at 7 o'clock at the Gettysburg Lutheran Seminary. The theme is "The Place of Music in the Curriculum of the Church College for the Contemporary Life of the Church." Sessions will be conducted through Saturday and on Sunday mornings.

Parker B. Wagnild, music instructor at Gettysburg College, will preside. Organ accompaniment will be provided by Dr. U. S. Leupold, Waterloo College, Canada.

Registrations will be made at the administration building this afternoon from 4 until 7 p.m. At 7 o'clock Dr. Leupold will conduct devotions in the social room. Dr. Harry F. Baughman, president of the seminary, will greet the assembly.

Dr. Wickey To Speak

At 7:30 o'clock Dr. Gould Wickey, executive secretary of the Board of Higher Education, UCLA, will outline the purpose of the conference. Dr. Edward T. Hord 3rd, member, joint commission on the hymnal and joint commission on the liturgy and pastor of Trinity Church, Philadelphia, will discuss "The Needs of the Church in the Field of Music as Related to our Church Colleges." A discussion will follow.

Dr. Theodore Hoeltz-Nickel, member of the international conference on Lutheran church music and of the faculty of Valparaiso University, will report at 8:45 o'clock on the International Assembly for Lutheran Church Music. A coffee hour will be held at 9:15 o'clock.

Breakfast will be served Saturday morning at 8 o'clock in the refectory. Sister Sophie Damme, Lutheran Deaconess Training School, will lead devotions at 9 o'clock in the social room. Dr. Paul H. Ensrud will address the conference at 9:30 o'clock on "Church Music Within the College Curriculum." A discussion will follow. At 11 o'clock Dr. Harvey D. Hoover, Gettysburg, will present work on the new service book and Dr. Edgar S. Brown Jr., director, department of worship, ULCA, will present work on the department of worship in the ULCA. This session will close at noon for lunch which will be served in the refectory at 12:30 o'clock.

Organ Recital

The group will visit the Church of the Abiding Presence Saturday afternoon from 1:15 until 2 o'clock.

(Continued On Page 2)

PTA Panel Discusses Health Of Children

A panel discussion on "Your Child—What of his Health?" will be presented at the meeting of the New Oxford Parent-Teachers Association Monday evening at 7:30 o'clock in the New Oxford elementary school building.

Mrs. J. Francis Yake Jr. and Robert Keith will be moderators for the panel which will include Dr. John Menges, school physician; Dr. Karl Hoffmeister, school dentist; Mrs. Mary Stock, home economics instructor, and Mrs. Vesta Smith, school nurse.

The program will be followed by a social hour and singing of new members.

N.C.C.W. HONORS PAST LEADERS; HEAR ADDRESS

The past presidents of the NCCW were honored at a reception Thursday evening at the close of a regular meeting in Xavier Hall. Corsages of lavender and white mums tied with green and gold ribbon were presented to Mrs. George F. Eberhart, Mrs. J. Walter Coleman and Mrs. Ralph Johnson. Flowers were sent to past presidents unable to attend.

Mrs. Theodore M. Tussing discussed "The 13th—the Greatest of Centuries." She told of the great universities established in Europe, especially the University of Paris.

"It was a strange thing in those days," she said, "but the middle class was better educated than the upper class. Members of the nobility, with their power and prestige, did not think it necessary to learn to read, write and speak various languages."

Women Designed Cathedrals

She described King Louis "sat under a tree all day to listen to the complaints of his subjects, especially the poor, and tried in every way to mete out justice."

"Byzantine-type art in the 13th century," she said, "began to give way to art with more depths and dimension. It was a time when great future events were predicted, even a means of transportation which would go faster than a horse. Magnificent cathedrals were begun and, strangely enough, many of them were designed by women."

"Many people don't know it," said

8 WILL ATTEND CLUB SESSIONS

Miss Martha Stallsmith, president of the Gettysburg Sororist Club, will head the local delegation to the North Atlantic Regional Conference in Haddon Hall, Atlantic City Saturday and Sunday.

Other local women attending will be: Mrs. Elizabeth Hennig, Mrs. Guyon E. Buehler, Mrs. Donald E. Myers, Gettysburg, and Miss Anna Weaver and Miss Evelyn Althoff, Littlestown.

Several hundred delegates from New Jersey, Pennsylvania, New York, Delaware and part of West Virginia will be present. Principal speakers will be the American Federation president, Mrs. Pluma B. Batten, New Jersey, Miss Martha R. Servis, executive secretary of Philadelphia, and Richard Tobin, director of public affairs for the New York Herald Tribune. Mr. Tobin, well known for the Tribune Forums for which he is responsible, will address the conference on the subject "History in the Making."

The conference will be under the leadership of the regional governor, Mrs. Dora S. Lewis, New York City, with the Atlantic City Club acting as hostess.

Dresses and coats, from baby size through sub-teen to 14. Bermuda shorts, sweaters, skirts, winter pajamas and snow suits. Shop and save at the Toyn Teen Shop, 26 Carlisle St., Gettysburg, Pa.

WOMEN TO LEARN ART OF SEWING, COPPER CRAFTS

Plans for a number of activities in which groups throughout the county will participate, were announced today by Miss Florence Finger, county home economics extension representative.

Next Tuesday and Wednesday from 10 a.m. to 3 p.m. a leader training meeting for instruction in the making of copper plaques will be held at the Adams Electric Cooperative building, rear N. Stratton St.

Learn Various Techniques

Next Friday, the first session of a dress making workshop will be held at the Adams Electric Cooperative building, starting at 9 a.m. Miss Finger explained that the dress making workshop is for all homemakers interested in making basic cotton dresses. The techniques of making dresses will be explained at the October 28 session and then the garments will be constructed at sectional meetings. The sectional meetings will be held in Gettysburg November 1, 3, 10, and 15, from 10 a.m. to 3 p.m. each of those days; in Ardenstville on November 2, 4, 9, and 11, at the same hours, 10 a.m. to 3 p.m., each day.

In Hanover the sessions will be held November 29, December 1, 6 and 8 at the same hours daily.

Plan Christmas Tea

A meeting of group leaders will be held October 31 at 2 p.m. at the Adams Electric Cooperative to plan for the annual Christmas tea which is scheduled for December 7 at 2 p.m.

The annual Adams County Extension Association banquet meeting will be held November 16 at 6:30 p.m. at the New Oxford Fire Hall. Tickets for that dinner may be obtained from the leaders of the homemaking groups, members of the executive committee or from the county extension office.

Large Crowd At Dairies' Opening

A large crowd attended the formal opening of the Penn Dairies, Inc. demonstration restaurant and milk plant on the Harrisburg Rd. Thursday from 2 to 10 p.m.

Visitors started arriving before the official opening hour and continued throughout the eight-hour opening.

E. C. Ott, 222 Springs Ave., was awarded the 21-inch TV set.

Eisenhower's Declaration On Peace Talks With Reds Clarified In New Booklet

WASHINGTON (AP)—President Eisenhower's peace talks with Russia were spread on the record today as Secretary of State Dulles prepared to take up where the President left off at the Geneva Big Four conference.

They included Eisenhower's assurance to Russia that "under no circumstances is the United States ever going to be a party to aggressive war against any nation."

An 88-page booklet of about 40,000 words, made public late yesterday by the State Department, included formal statements made by Eisenhower and other heads of government at the summit conference last July.

These statements already had been reported in substance. However, the record included the texts of about a half dozen of Eisenhower's statements which had never been made fully public. Only previously published statements by the other principals were released.

Talks To Zhukov

At one point, the President directed his remarks especially at his old World War II comrade-in-arms Marshal Georgi Zhukov, who was at Geneva as Russia's defense minister:

"I would particularly like my friend, Marshal Zhukov, to listen to what I have to say. I have known him for a long time and he knows that, speaking as soldier to soldier, I have never uttered a single word that I did not believe to be the truth."

Eisenhower protested Russia's contention that the North Atlantic Treaty Organization, whose forces Eisenhower headed in 1951 as first supreme commander, was aggressively aimed at the Soviet.

Seek Solutions

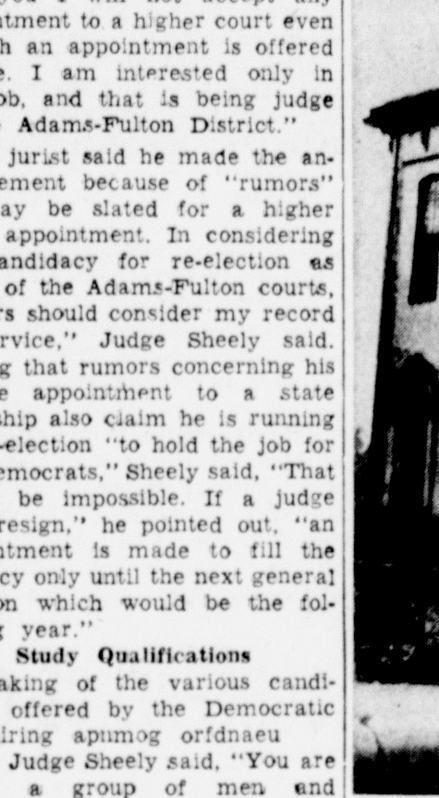

"I accepted that job because I believed it to be a true agency for peace," Eisenhower told Zhukov. "Personally I have had enough of war."

The record reflects Eisenhower's insistence that he, Soviet Premier

LOCAL BANKER TALKS FINANCES AT CLUB SCHOOL

The second session of the Business and Professional Women's Club's "School for Modern Living" was held at the YWCA Thursday night when Edmund W. Thomas, president of the First National Bank of Gettysburg, conducted a class on "Sensible Finances." He complimented the club on selecting this topic as he said "finances touch the lives of more people than is realized." As a past president of the Pennsylvania Bankers Association he stated that they are now spending thousands of dollars in Pennsylvania to bring people closer to their banks and good financing. They are now preparing a booklet on "How to Use Your Bank" to be used in schools, colleges and universities.

"Sensible finances," he said, "involve two things—deposits of money in a bank and borrowing. Distress is due to inability of people to handle money properly."

Talks Savings Accounts

From the deposit angle he discussed savings accounts "which are readily available and have a fair return," voluntary or living trusts for children, investments in stocks that grow with the country, U.S. Savings bonds, building and loan associations and insurance.

From the following angle he said that "young couples nowadays prefer to buy a home on a mortgage and pay principal and interest rather than to pay rent for years," and that "installment borrowing, with group indebtedness life insurance on the unpaid balance, has grown tremendously in the past few years. This latter loan method is used to purchase cars, household equipment, and other items."

He said, "styles in financing have changed greatly. Our parents used to buy a twenty-five cent clock of ice every day. Now young couples finance an electric or gas refrigerator. This comparison can be carried through in many lines."

Eisenhower's Declaration On Peace Talks With Reds Clarified In New Book

KNIGHT PREDICTS GOP VICTORY IN ELECTION RACE

NEWARK, N. J. (AP)—Gov. Goodwin J. Knight of California says Republicans can win the 1956 presidential election with or without President Eisenhower.

Gov. Knight, one of the nation's key Republicans, made the statement Tuesday night at a news conference preceding an Essex County \$50-a-plate fund raising GOP dinner.

Knight, who said he would head California's powerful 70-member delegation to the national GOP convention, said the President, recently stricken by a heart attack, will make "the right decision at the right moment" on whether he would run for re-election.

Will Win, With Or Without "Republicans can win with or without" President Eisenhower, he said "but it will be such easier to win with him."

He said "it is conceivable that President Eisenhower would run," but added that only his doctors could express a responsible opinion on the subject.

The governor indicated he would

Littlestown

LITTLESTOWN: A covered dish supper preceded the meeting of the Huestlers' Sunday School Class of Redeemer's Evangelical and Reformed Church Monday evening in the church social hall with 19 members and two visitors present.

Mrs. William I. Straley, president, presided at the business session. The class decided to help finance renovations in the church study. The group decided to serve a banquet to the IOOF on January 21. Reports were received from Mrs. Glenn S. Kaufman Jr., secretary, and Mrs. George C. DeHoff, treasurer.

Plans were made to serve a banquet to the Adams County Bankers' Association on Wednesday, November 16, and the committee were appointed: Kitchen,

head California's delegation because "it is a tradition for the governor to head his state's delegation."

"I'm not running for President," he declared.

His state's Republican committee, he said, has instructed him to form the GOP delegation, in which Vice President Richard Nixon and Sen. William F. Knowland (R-Calif.) would be included because "they are distinguished Americans."

JAMES MICHENER WILL WED JAP

CHICAGO (AP)—Best-selling author James Michener, whose writings often deal with the need for better understanding between East and West, will marry a Japanese-American girl Sunday.

She is Mari Yoriko Sabusawa, Chicago American-born Japanese who is assistant editor of the American Library Assn. Bulletin.

Miss Sabusawa said the marriage ceremony will be held in the Hilton chapel at the University of Chicago, with the Rev. Jitsuo Morikawa officiating. He is pastor of the First Baptist church in Chicago.

Michener recently returned from Afghanistan and presently is residing in the Park Sheraton in New York. He has a home in Tincum, Bucks County, Pa.

The couple plans to leave immediately on a world honeymoon tour, with the first destination Australia.

Dr. Samuel L. Bucke and Paul L. Hollinger will be in charge of the program at the meeting of the Littlestown Lions Club this evening at 7 o'clock in the social hall of St. John's Lutheran Church.

ADVERTISE IN THE TIMES

DEMS PLANNING FUND DINNERS

WASHINGTON (AP)—The Democratic National Committee announced Wednesday a new series of fund-raising dinners and party gatherings, with Gov. Averell Harriman of New York listed for four speaking appearances in the Northwest.

Harriman, one of three Democrats most prominently mentioned for their party's presidential nomination next year, will speak in Seattle, Wash., Dec. 21, Oregon City, Ore., Dec. 22, and Lewiston, Idaho, Dec. 23. He also will appear at a luncheon Dec. 22 in Eugene, Ore., and attend a University of Oregon convocation there the same day.

Adlai E. Stevenson and Sen. Estes Kefauver of Tennessee, other top-ranking prospects for the presidential nomination, are down for one speech each and may be booked for others later.

Stevenson will address a \$100-a-plate dinner the Democratic National Committee is giving in Chicago Nov. 13. Kefauver will speak at Muskegon, Mich., Oct. 29.

FIRE TRUCKRIDE
WALHALLA, S. C. (AP)—The fire department here gives children an annual mass ride about town on the two fire trucks.

POLICE PROBE FATAL CRASH

NORTH HOLLYWOOD, Calif. (AP)—Was millionaire Joel W. Thorne strolling, or was he desperately trying to fly out of trouble just before his plane plunged into an apartment building, costing his own and three other lives? Civil Aeronautics Administration investigators probed deeper Wednesday for the answer.

A baby whose family was celebrating her christening, an 18-year-old bride and Thorne perished in the fiery crash and explosion which devastated with bomblike fury two apartments of a six-unit building Monday night.

The fourth victim, a 6-year-old boy, died of horrible burns in a hospital Tuesday night. He was one of the crumpling party.

Thorne, 40, whose life was filled with speed and violent escapades, took off on an instrument flight plan from nearby Lockheed Air Terminal at 10:08 p.m. Monday, bound for Las Vegas, Nev., where he was maintaining residence. The crash occurred 12 minutes later.

The other dead: Sheryl Camille Preston, the 2-month-old baby, who had been christened only hours before at St. Charles Catholic Church.

COPIES DEMAND LIGHT ATLANTIC BEACH, Fla.

Light meters are part of police equipment here now. The city council ordered that the once dimly-lit cocktail lounges be kept light enough for patrons to read newspapers. Police were given the meters and told to enforce the order.

Bubblers Host To Cumberland Valley

The Bolling Spring High School Bubblers will play the Cumberland Valley Eagles Saturday evening on the Bolling Springs Field. Parents Night will be observed by the Bolling Springs School and a special pre-game ceremony has been arranged. The ceremony will begin at 7:45 p.m. with the kick-off scheduled for 8 o'clock. The largest crowd of the season is expected to see these two neighbor schools start football relations.

Of their six games this season, the Eagles have won two games while losing four. Victories have been scored over Lebanon Catholic and Susquehanna.

The Eagles and Bubblers have met three common foes with comparative scores indicating a close game. Both teams have defeated Susquehanna, the Eagles by a 15 to 0 score, the Bubblers by a 12 to 0 score. Both teams have lost to Hummelstown and New Cumberland. Hummelstown defeated the Bubblers 33 to 0 while they defeated Cumberland Valley by a 34 to 13 score. New Cumberland won over Cumberland Valley by a 14 to 0 score while they defeated Bolling Springs 12 to 6.

Wedding

McCarte-Gwozdecki

Miss Valeria Gwozdecki, daughter of Rev. and Mrs. Peter Gwozdecki, Shenandoah, Pa., and Daniel Searcy McCarte, son of Mr. and Mrs. Arthur B. McCarte, York Springs, were recently married in St. Andrew-by-the-Sea Episcopal Church, Nags Head, N. C. The bride's father was the officiating clergyman.

Miss Katherine Currie, Carthage, N. C., and Harry Thomas, Burlington, N. C., were the attendants.

Mrs. McCarte is a graduate of Pottsville High School and the Westminster Choir College, Princeton, N. J. Last year she was a member of the faculty of the Walnut Hill School, Madick, Mass.

McCarte, a reserve Army officer, is a graduate of the Camp Hill School. He attended Gettysburg College and is a graduate of Johns Hopkins University, Baltimore. A member of the faculty of the Marjorie Webster Junior College, he is working for his master's degree at the Catholic University of America, Washington, D. C.

DEATH

Jacob Hollinger

Jacob Hollinger, 91, retired farmer and painter of East Berlin, died at 7:10 o'clock Thursday evening at the Snyder Convalescent home, York.

Mr. Hollinger, husband of Mrs. Emma Myers Hollinger, was a lifelong resident of the East Berlin area. He was a member of Zwingle Reformed Church and Sunday School.

Surviving, besides his wife, are: Three daughters, Mrs. William Flisler, York; Mrs. Philip Wantz, Upper Darby, and Mrs. Earl Kauffman, Wilmington, Del.; two grandchildren, nine great grandchildren, two sisters, Mrs. Catherine Forry, Hanover, and Mrs. Annie Lau, Florida, and a brother, John Hollinger, York.

Funeral services Sunday at 2 p.m. at the Emig Funeral Home, East Berlin. Rev. Robert Rezasch, pastor of Zwingle Church, will officiate. Interment in East Berlin Union Cemetery.

AUTOS COLLIDE

Automobiles operated by Charles J. Moore, Gettysburg R. 5, and Fern L. Reinhold, Hanover, were involved in a collision in Hanover about 9:35 p.m. Wednesday. Police said Moore was traveling south on Carlisle St. when Reinhold, going east on Park Ave., entered the intersection, his auto crashing into the right front side of the other car. Damage to the two vehicles was estimated at \$35. No one was injured.

STOCK PRICES ADVANCE

NEW YORK (AP)—The stock market advanced today for the sixth straight session, but it ran into mild selling difficulties in early dealings.

A few gains went to between 1 and 2 points. Most, however, were small, as were the losses.

Social Happenings

Phone Gettysburg 1248, 640 or 725 — After 7 P.M., 751-Y

Mrs. Mary Zepp, who has been ill at the home of her son-in-law and daughter, Mr. and Mrs. William Swisher, 106 E. Middle St., is reported improving.

A dessert party was held by the Phi Mu Alumnae club for the pledges of the Beta Pi chapter of the Phi Mu sorority Thursday evening at the home of Mrs. George R. Larkin, N. Stratton St. The table was decorated with autumn leaves and mixed with fall flowers.

Plans for winter activities were made during the business meeting, Mrs. Donald Wagner, a graduate of Dickinson College, was enrolled as a new member. The officers are: President, Mrs. Larkin; vice president, Mrs. James Hafer; secretary, Mrs. Alan Gray; treasurer, Mrs. Fred Pfeiffer.

Shirley Hippensteel, Bonnie Hess, Susie Bollinger and O'Rean Fiedler will represent Girl Scout Troop Three in the U.N. parade Sunday. It was announced Thursday afternoon at a troop meeting at the Girl Scout office, Lincoln Square.

The meeting opened with a flag ceremony with Barbara Barriga as leader. The girls recited the pledge of allegiance and recited the Girl Scout Promise. They sang "America the Beautiful." Judy Baker and Bonnie Hess were color bearers and Sherie Deitz and Peggy Steinger were color guards.

O'Rean Fiedler, Delores Adams and Susie Bollinger led the troop in singing. Girl Scout games were taught by Drusilla Deitch. It was announced that Judy Baker will be received into the troop at a later meeting. Patrol One was in charge of the closing during which the girls gave the friendship handshake and formed the friendship circle. A "surprise" was planned during a Court of Honor session. Plans were made to celebrate the birthday of Juliette Low at the next meeting. Mrs. Thomas Adams, leader, was assisted by Mrs. Selmar Hess.

The Ladies' Auxiliary of the Cash-town Fire Company will hold a corn party this evening at 8 o'clock in the community hall. A Halloween party will be held Monday evening at 8 o'clock in conjunction with the regular meeting.

Brownie Troop 44 met Thursday afternoon at St. James Lutheran Church with the following girls serving as color guards: Carol Bartholomew, Jeanne Crone, Janice Crowe and Lucinda Deitch. Mary Baker was the officer of the day.

The following troops were guests: Brownie Troop 50 with Mrs. Stanley W. Hull, leader; Brownie Troop 42 with Mrs. Edward B. Bullett, leader; and Brownie Troop 35 with Mrs. Charles Kuhn, leader.

A film entitled, "We Planted a Garden," depicting a United Nations' theme, was shown. Slides showing the United Nations' buildings and surroundings were shown by John H. Knickerbocker, Gettysburg College librarian. Mrs. Forest E. Craver was the narrator. The birthday of Juliette Low was observed.

Mrs. Melvin Fiedler, leader of Brownie Troop 44, was assisted by Mrs. Harold Bucher.

John L. Warthen, Havre de Grace, Md., visited Thursday with his aunt, Mrs. Daniel E. Callahan, Highland Ave.

Mr. and Mrs. James Steckbeck, Mazon, Ill., and Mrs. Eugene Neibert, Mechanicsburg, spent Thursday with Mr. and Mrs. David Blosser Jr., Baltimore St.

Mr. and Mrs. W. D. Pitzer, Detroit, Mich., are visiting Mrs. John Whitman, R. 2, and David and John Pitzer, W. Middle St.

Chaplain and Mrs. Edwerth E. Korte, college campus, are attending College Day at the John Marshall High School, Richmond, Va. today.

The Tuesday Afternoon Bridge Club will meet at the home of Mrs. Russell A. Campbell, W. Broadway, Tuesday afternoon at 2 o'clock.

The work of the United Nations Assembly was discussed at a meeting of the public affairs committee of the YWCA Thursday afternoon at a meeting at the Y. Mrs. J. Albert Blackburn, chairman, presided.

The committee meetings, open to interested persons, will be devoted to the study of individual organizations of the U.N. at each session. On November 22 the group will study the World Health Organization. The committee is seeking persons to address the committee on the work of the U.N. Tea was served at the end of the session.

The annual Halloween party for the children of members of the Gettysburg Country Club Saturday afternoon from 2 until 4 o'clock is for children from one to 12 (and not one to 14) as stated in Thursday's edition. The affair will take place in clubhouse.

Mrs. H. M. Wagner, Fairfield R. 2, a missionary of the Friends Society, described a "Post-War Japanese Community Center" Thursday evening at a meeting of the Women's Guild of the Trinity Evangelical and Reformed Church in the parish hall. Mrs. James Schwenk was the guest soloist. Mrs. John A. MacPhail, chairman of the department of Christian Education, led devotions.

Mrs. Russell Spangler read selections from scripture and Mrs. Frank Britcher was the piano accompanist for hymn singing.

Mrs. Louise Hoffman, president of the Guild, presided at the business session. A budget of \$192.68 for 1956 was approved. Mrs. MacPhail urged the organization to consider a reading course for 1956.

A donation of \$25 was given to the Community Chest. Mrs. Hoffman reminded the Guild of the World Community Day of Service November 4 and urged the women to contribute clothing for men and boys to be presented during the service.

Members of Trinity Circle described a package they are preparing for two children overseas. Mrs. Harrison F. Harbach reported on the work of the Christian Social Action Committee.

Refreshments were served by members of Trinity Circle.

John Whitman, R. 2; Mrs. Frank Pitzer, Steinwehr Ave. and Mr. and Mrs. W. D. Pitzer, Detroit, Mich., spent Thursday in Philadelphia.

Dr. Robert Fortenbaugh, W. Broadway, will describe the background of the American Indian at a meeting of the Women's Missionary Society of the Lancaster Conference Sunday afternoon at 3 o'clock at the Trinity Lutheran Church, Lancaster. He will be accompanied by Mrs. Fortenbaugh. They will be dinner guests that day of Rev. Dr. and Mrs. Wallace E. Fisher, former residents of Gettysburg. Rev. Dr. Fisher, pastor of the Lancaster church, is the former pastor of Christ Lutheran Church, Gettysburg.

Rev. and Mrs. Ralph W. Birk, Lemoyne, spent Thursday with the latter's parents, Mr. and Mrs. Charles B. Hartman, R. 3.

N.C.C.W. HONORS

(Continued from Page 1)

Mrs. Tussing, but libraries existed in the 13th century, only the books were cumbersome tomes done up in parchment. It was the greatest achievement, imagination and artistic creation, for religious devotion and education," Mrs. Tussing is a graduate of Pennsylvania State University.

Will Present Film
A film, "I Sing of a Maiden," will be shown in Xavier Hall Sunday evening after benediction. There will be a silver offering.

Members were asked to bring a cotton article to the movie for the impoverished people in Vietnam.

In observance of U.N. Day, Monday, members will say the Rosary in the church throughout the day. Mrs. Eberhart will represent the council at the U.N. dinner at the Gettysburg High School Monday evening.

Mrs. Edwin J. Killalea, president, who presided, reported on the Coney-wago Deaneys workshop held recently in Xavier Hall. Mrs. George Groff and Mrs. Frank Rostenel are co-chairmen of the Thanksgiving clothing drive, it was announced.

Reads National Message
Mrs. Richard C. Eberhart, vice president, read the national president's message in which the annual Bishops' meeting was emphasized.

Mrs. Ralph Johnson was appointed chairman of a food sale to be held in November. The date and place will be announced later. Rev. Fr. Anthony P. Kane, moderator, lead the closing prayers.

Mrs. George P. Eberhart poured at the tea table. A shrine in honor of the Blessed Virgin was decorated with candles, roses and mums. Hostesses were Mrs. Edwin J. Killalea, Mrs. Richard C. Eberhart, the Misses Rhoda and Elizabeth Breighner and Miss Mary Louise Callahan. The November hostesses are Mrs. Johnson, Mrs. George McKenrick and Mrs. Simon Redding.

Posts \$1,000 Bail For November Court

David J. O'Keefe, Hanover, waived a hearing before Justice of the Peace John H. Basehore, Thursday, on a charge of involuntary manslaughter and posted \$1,000 bail for his appearance at the November term of Adams County court.

The matter was handled by mail through O'Keefe's attorneys, and he made no appearance at Basehore's office for the scheduled hearing. O'Keefe was charged by state police with the offense following an accident at Cross Keys April 29 in which Richard C. Smith, Hanover, was fatally injured.

Weather Forecast

Extended forecast for Saturday, Oct. 22, through Wednesday, Oct. 26:

Eastern Pennsylvania, Eastern and Midland states: Temperature will average 4-8 degrees above normal north and 7-5 degrees above normal south, cooler Saturday, warmer Monday and Tuesday and cooler Wednesday, some rain likely north and scattered showers south Monday or Tuesday, averaging less than one tenth inch South and one tenth to three tenths North. Western Pennsylvania, western New York, Ohio and West Virginia: Temperature will average 4-8 degrees above normal, cooler Saturday, warmer Sunday, cooler Tuesday and warmer Wednesday; some rain likely about Monday, averaging 1/4-1/2 inch.

AIR DAIRY OPENING
The program at the Penn Dairies, Inc., Thursday evening in connection with the formal opening will be broadcast, by tape recording, over WGET this evening at 5 o'clock.

Two Local Crashes Within Ten Minutes

Damage totaled more than \$1,000 in two accidents investigated by borough police within 10 minutes Thursday afternoon.

At 4:15 o'clock police were called to an accident in Lincoln Square. They said that Shirley M. Hanshaw, Littlestown R. 1 was driving north on Baltimore St., entered the square, and there her car was halted by a traffic tie-up caused by a train crossing Carlisle St. John D. Becker, 249 S. Washington St., backed his car into the Hanshaw vehicle, causing \$125 damage, police said.

At 4:25 o'clock Constance Ann Ballinger, Hyattsville, Md., driving south on Steinwehr Ave. attempted a left turn into the Taneytown Rd., Melvin Crouse, according to police, driving north on Steinwehr, collided with the Ballinger car. Damage was estimated at \$450 to each of the vehicles.

Police, who said they are continuing their investigation in each accident, listed no injuries.

LANCASTER LIVESTOCK

AIR DAIRY OPENING

The program at the Penn Dairies, Inc., Thursday evening in connection with the formal opening will be broadcast, by tape recording, over WGET this evening at 5 o'clock.

Upper Communities

Telephone Mrs. John A. Leeti, Biglerville 8

Miss Eunice Luckenbaugh, a student at the Philadelphia General Hospital School of Nursing, spent the weekend with her parents, Mr. and Mrs. John N. Luckenbaugh, Biglerville R. 2.

The Luther League will meet at Fiohr's Lutheran Church, McKnightstown, Sunday evening at 6:30 o'clock. The topic for discussion will be "The Amazing Dr. Fry," led by Darlene Funt.

The third in a series of four evangelistic services will be held at the Orrianna Methodist Church at 7:30 o'clock Sunday evening. "The Pearl of Great Price" will be the message brought by the pastor, the Rev. Eugene R. Stiner.

The Senior Class of Biglerville High School will hold a food sale Saturday morning beginning at 8 o'clock in front of Dugan's Barber shop.

Robert Kurz, a senior at the Lutheran Theological Seminary, Gettysburg, will preach at Bender's and St. Paul's Lutheran Churches, Biglerville, Sunday morning in the absence of the Rev. Dr. H. W. Stierat who will deliver the annual Homecoming sermon at the Lutheran Church in Abbottstown.

Dr. and Mrs. Raymond Hale and family, Arendtsville, recently visited Dr. Hale's niece, Miss Beverly Rheinhart, at Juniata College, Huntingdon.

A special service of installation will be held for the Junior Choir of Trinity Lutheran Church, Arendtsville, Sunday morning at the regular worship service.

Bendersville Brownie Troop 29 met at the Bendersville School building Wednesday afternoon. The 12 girls who will be invested into the Brownie Troop on November 2 rehearsed for the ceremony while other girls made final plans for the Halloween party which will be held next Wednesday. The girls then played games and sang songs. Mrs. Robert Orner and Mrs. Donald Weaner assisted the leader, Mrs. William Wright.

The Biglerville Kitchenettes will meet Tuesday evening at 7:30 o'clock at Biglerville High School.

Mrs. Naomi Guise, Lemoyne, is spending a week with her brothers, Dennis, Paul and Mervin Rice, and their families, Bendersville. She will return to Lemoyne, Sunday.

Arendtsville Brownie Troop 2 met Tuesday afternoon at the Scout hut with 26 girls present. As a Halloween project, black cats were made from construction paper, with red yarn for whiskers, and fastened onto apples. Plans were made for the Halloween party which will be held next Tuesday. The meeting closed with the friendship circle. The three leaders, Mrs. Raymond Hale, Mrs. Charles Bushy and Mrs. Robert Eicholtz Jr., were present.

The Rev. Robert K. Shaul, pastor of Trinity Lutheran Church, Arendtsville, and Daniel Walter delivered the Harvest Home donations to the National Lutheran Home for the Aged, Washington, D. C., Thursday.

\$1,200 RAISED BY H.S. ALUMNI IN PIANO DRIVE

The Gettysburg High School Alumni Council, meeting Wednesday evening at the YWCA, learned that \$1,200 was secured in the recent campaign to raise funds for a grand piano to be placed in the

new auditorium at Gettysburg High School.

With the amount \$250 short of the cost of the piano, President John A. MacPhail named Mrs. Guyon Buehler, Jay Schmitt, Mrs. Harry E. Baker, and Mrs. Arthur J. Roth as a committee on ways and means to raise the additional amount.

A \$10 donation to the YWCA for use of its facilities throughout the year was voted.

Christmas Dance Plans
Preliminary plans were discussed for the annual Christmas Dance, to be arranged as in the past by a joint committee from the Alumni Council and the Student Council of the High School. Plans were also discussed for the annual Alumni-Varsity basketball game.

President MacPhail appointed the following committees: Finance: Richard Folkenroth, chairman, John H. Basehore, Gladys Kelley; nominating: Henrietta Blocher, chairman, Edith Baker, Eugene R. Hartman, Esq., Ellen T. Buehler, Anna Belle Little; scholarship: Jay Schmitt, chairman, Paul Mehrling, Martha F. Weikert, J. M. Sheads, Charles Culp.

Statistics: Oma Furney Roth, chairman, Sara M. Sandoe, Helen Spangler, Melvin Little; athletic council representative, J. Herbert Raymond; Christmas Dance: Edward Beard and Mary K. Baughman, co-chairmen, John Basehore, Anna Shryock, S. R. Hafer, Grace Gilbert, Glen Little, Suzanne Schmitt, Anne Eisenhart.

Annual basketball game: Paul Anzenberger, chairman, Richard Heintzelman, Robert Rohrbaugh, Robert Fidler, George Fair, Richard Folkenroth; publicity: Mrs. C. T. Ziegler, chairman, Hugh McInnes, Mary Jane Toggas, and Esther Weaver.

Will Participate In Exercise Sage Brush

Pvt. Rodger D. Huff, 20, son of Mr. and Mrs. John H. Huff, R. 5, will participate in "Exercise Sage Brush," the largest joint Army-Air Force maneuver since World War II, in Louisiana next month. Some 110,000 troops will take part, testing the latest concepts of atomic, bacteriological, chemical and electronic warfare.

Huff, an ammunition handler in the 575th Ordnance Company, is regularly stationed at Fort Hood, Tex. He entered the Army in April 1955 and completed basic training at Fort Dix, N. J.

Lions, Jaycees Sponsor Parade

A Halloween parade and community Halloween party, co-sponsored by Mount Holly Springs Lions and Jaycees, will be held Saturday evening, October 29 at Mount Holly Springs.

The parade is to form at 7 p.m. at the band hall. More than \$400 in prizes will be awarded to the participating bands, floats, and paraders. Prizes will be awarded to groups of costumed paraders as well as to individuals who appear in the most gruesome, pretty, or weird costumes.

SHEELY WILL NOT

(Continued from Page 1)
sions in the absence of the county chairman, Fred G. Klunk, who is a patient at the Harrisburg General Hospital.

Teeter Speaks
District Attorney Daniel E. Teeter spoke of the difficulty candidates encounter in seeking to contact all of the people of the county in a campaign, expressed the appreciation of the Democratic committee to Mr. and Mrs. Joseph De Cosmo for making their place of business available for the meeting and added that "the people of Adams County are fortunate in having a well liked, sincere and qualified candidate, Judge Sheely, up for re-election to the top position in the county."

Candidates introduced included Sheely, Teeter, Earl W. Guise, for associate judge; George E. Kane and Edward J. Sneeringer for county commissioner; R. L. Pitenturf for prothonotary, and Armore M. Weikert and Laura M. Cratin for auditor.

CLUB MEETS MONDAY

The Adams County Dairy Club 4-H Club will meet Monday evening at the home of William Grove, Gardeners, at 7:30 o'clock. Assistant County Agent J. David Naugle has asked members to bring project books to the meeting. Slides on mastitis prevention will be shown.

Eisenhower's Sketches

(Continued from Page 1)

Bulgaria, British Prime Minister Eden and French Premier Faure could only define the East-West issues, leaving it to their foreign ministers to seek solutions.

It is for this task that Dulles leaves late today. The Big Four foreign ministers' session starts at Geneva next Thursday but Dulles is stopping first at Rome for conferences with Italian government officials. He goes Sunday to Paris for a pre-Geneva huddle with NATO and British and French leaders.

The summit record put out yesterday includes the directive from the Big Four heads of government to the foreign ministers to take up four key questions: German reunification, European security, disarmament and freer East-West exchange.

Calm Soviet Fears
Eisenhower is shown as seeking to calm Soviet fears of a reunited Germany allied to the West. He said he could give Russia America's "pledged word" that such fears are unfounded. But he warned that a partitioned Germany was a danger to the whole world because it might fall prey again to another Hitler out of a sense of inferiority.

Bulgaria, the record shows, argued long and hard for an all-European security pact. He stressed a prime Soviet objective, eventually to "have no foreign troops remaining in the territories of European states."

LOCAL BANKER

(Continued from Page 1)

The speaker urged people to "go into their banks and discuss their financial problems, which may not be as hard to solve as they think."

Miss Mary Kay Baughman, program chairman, presided and introduced the speaker. Twenty-five members attended the class.

The club has given \$5 to the United Nations Day Committee and \$25 to the Gettysburg Community Chest.

There will be no meeting next Thursday but members are urged to attend the Electors Assembly of the Y which will be held that night.

FORMER CHAMP DIES

PHILADELPHIA (AP)—Joseph Loscalzo, 45, former world's flyweight boxing champion, collapsed and died Wednesday while sitting at the bar of a downtown cafe. Loscalzo, who fought under the name of Midget Wolgast, held the title from 1930 to 1935. He continued boxing through 1938.

Bubblers Host To Cumberland Valley

The Bolling Spring High School Bubblers will play the Cumberland Valley Eagles Saturday evening on the Bolling Springs Field. Parents Night will be observed by the Bolling Springs School and a special pre-game ceremony has been arranged. The ceremony will begin at 7:45 p.m. with the kick-off scheduled for 8 o'clock. The largest crowd of the season is expected to see these two neighbor schools start football relations.

Of their six games this season, the Eagles have won two games while losing four. Victories have been scored over Lebanon Catholic and Susquehanna.

The Eagles and Bubblers have met three common foes with comparative scores indicating a close game. Both teams have defeated Susquehanna, the Eagles by a 15 to 0 score, the Bubblers by a 12 to 7 score. Both teams have lost to Hummelstown and New Cumberland. Hummelstown defeated the Bubblers 33 to 0 while they defeated Cumberland Valley by a 34 to 13 score. New Cumberland won over Cumberland Valley by a 14 to 0 score while they defeated Bolling Springs 12 to 6.

Wedding

McCartier-Gwozdecki
Miss Valeria Gwozdecki, daughter of Rev. and Mrs. Peter Gwozdecki, Shenandoah, Pa., and Daniel Searcy McCartier, son of Mr. and Mrs. Arthur B. McCartier, York Springs, were recently married in St. Andrew-by-the-Sea Episcopal Church, Nags Head, N. C. The bride's father was the officiating clergyman.

Miss Katherine Currie, Carthage, N. C., and Harry Thomas, Burlington, N. C., were the attendants.

Mrs. McCartier is a graduate of Pottsville High School and the Westminster Choir College, Princeton, N. J. Last year she was a member of the faculty of the Walnut Hill School, Madick, Mass.

McCartier, a reserve Army officer, is a graduate of the Camp Hill High School. He attended Gettysburg College and is a graduate of Johns Hopkins University, Baltimore. A member of the faculty of the Marjorie Webster Junior College, he is working for his master's degree at the Catholic University of America, Washington, D. C.

DEATH

Jacob Hollinger
Jacob Hollinger, 91, retired farmer and painter of East Berlin, died at 7:10 o'clock Thursday evening at the Snyder Convalescent home, York.

Mr. Hollinger, husband of Mrs. Emma Myers Hollinger, was a lifelong resident of the East Berlin area. He was a member of Zwingle Reformed Church and Sunday School.

Surviving, besides his wife, are: Three daughters, Mrs. William Fisel, York; Mrs. Philip Wanz, Upper Darby, and Mrs. Earl Kauffman, Wilmington, Del.; two grandchildren, nine great grandchildren, two sisters, Mrs. Catherine Forry, Hanover, and Mrs. Annie Lau, Florida, and a brother, John Hollinger, York.

Funeral services Sunday at 2 p.m. at the Emig Funeral Home, East Berlin. Rev. Robert Rezaeh, pastor of Zwingle Church, will officiate. Interment in East Berlin Union Cemetery.

AUTOS COLLIDE

Automobiles operated by Charles J. Moore, Gettysburg R. 5, and Fern L. Reinhold, Hanover, were involved in a collision in Hanover about 9:35 p.m. Wednesday. Police said Moore was traveling south on Carlisle St. when Reinhold, going east on Park Ave., entered the intersection, his auto crashing into the right front side of the other car. Damage to the two vehicles was estimated at \$35. No one was injured.

PARTY ON MONDAY

The American Legion Auxiliary will hold a masquerade party Monday evening at 7:30 o'clock in the auxiliary rooms in the Albert J. Leitz American Legion home, Baltimore St. All members are asked to wear masks. Those who appear without masks will be fined.

STOCK PRICES ADVANCE

NEW YORK—The stock market advanced today for the sixth straight session, but it ran into mild selling difficulties in early dealings.

A few gains went to between 1 and 2 points. Most, however, were small, as were the losses.

Social Happenings

Phone Gettysburg 1248, 640 or 725 — After 7 P.M., 751-Y

Mrs. Mary Zepp, who has been ill at the home of her son-in-law and daughter, Mr. and Mrs. William Swisher, 106 E. Middle St., is reported improving.

A dessert party was held by the Phi Mu Alumnae club for the pledges of the Beta Pi chapter of the Phi Mu sorority Thursday evening at the home of Mrs. George R. Larkin, N. Stratton St. The table was decorated with autumn leaves and mixed with fall flowers.

Plans for winter activities were made during the business meeting, Mrs. Donald Wagner, a graduate of Dickinson College, was enrolled as a new member. The officers are: President, Mrs. Larkin; vice president, Mrs. James Hafer; secretary, Mrs. Alan Gray; treasurer, Mrs. Fred Pfeiffer.

Shirley Hippensteel, Bonnie Hess, Susie Bollinger and O'Rean Fiedler will represent Girl Scout Troop Three in the U.N. parade Sunday. It was announced Thursday afternoon at a troop meeting at the Girl Scout office, Lincoln Square.

The meeting opened with a flag ceremony with Barbara Barziga as leader. The girls recited the pledge of allegiance and recited the Girl Scout Promise. They sang "America the Beautiful." Judy Baker and Bonnie Hess were color bearers and Sherie Deitz and Peggy Steinger were color guards.

O'Rean Fiedler, Delores Adams and Susie Bollinger led the troop in singing. Girl Scout games were taught by Drusilla Deitch. It was announced that Judy Baker will be received into the troop at a later meeting. Patrol One was in charge of the closing during which the girls gave the friendship handshake and formed the friendship circle. A "surprise" was planned during a Court of Honor session.

Plans were made to celebrate the birthday of Juliette Low at the next meeting. Mrs. Thomas Adams, leader, was assisted by Mrs. Selmar Hess.

The Ladies' Auxiliary of the Cash-town Fire Company will hold a corn party this evening at 8 o'clock in the community hall. A Halloween party will be held Monday evening at 8 o'clock in conjunction with the regular meeting.

Brownie Troop 44 met Thursday afternoon at St. James Lutheran Church with the following girls serving as color guards: Carol Bartholomew, Jeanne Crone, Janice Crowe and Lucinda Deitch. Mary Baker was the officer of the day.

The following troops were guests: Brownie Troop 50 with Mrs. Stanley W. Hull, leader; Brownie Troop 42 with Mrs. Edward B. Pullett, leader; and Brownie Troop 35 with Mrs. Charles Kuhn, leader.

A film entitled, "We Planted a Garden," depicting a United Nations theme, was shown. Slides showing the United Nations' buildings and surroundings were shown by John H. Knickerbocker, Gettysburg College librarian. Mrs. Forest E. Craver was the narrator. The birthday of Juliette Low was observed.

Mrs. Melvin Fiedler, leader of Brownie Troop 41, was assisted by Mrs. Harold Bucher.

John L. Warthen, Havre de Grace, Md., visited Thursday with his aunt, Mrs. Daniel E. Callahan, Highland Ave.

Mr. and Mrs. James Steckbeck, Mazon, Ill., and Mrs. Eugene Nebel, Mechanicsburg, spent Thursday with Mr. and Mrs. David Blosser Jr., Baltimore St.

Mr. and Mrs. W. D. Pitzer, Detroit, Mich., are visiting Mrs. John Whitman, R. 2, and David and John Pitzer, W. Middle St.

Chaplain and Mrs. Edwerth E. Korte, college campus, are attending College Day at the John Marshall High School, Richmond, Va., today.

The Tuesday Afternoon Bridge Club will meet at the home of Mrs. Russell A. Campbell, W. Broadway, Tuesday afternoon at 2 o'clock.

The work of the United Nations' Assembly was discussed at a meeting of the public affairs committee of the YWCA Thursday afternoon at a meeting at the Y. Mrs. J. Albert Blackburn, chairman, presided.

The committee meetings, open to interested persons, will be devoted to the study of individual organizations of the U.N. at each session. On November 22 the group will study the World Health Organization. The committee is seeking persons to address the committee on the work of the U.N. Tea was served at the end of the session.

The annual Halloween party for the children of members of the Gettysburg Country Club Saturday afternoon from 2 until 4 o'clock is for children from one to 12 and not one to 14 as stated in Thursday's edition. The affair will take place in clubhouse.

Mrs. H. M. Wagner, Fairfield R. 2, a missionary of the Friends Society, described a "Post-War Japanese Community Center" Thursday evening at a meeting of the Women's Guild of the Trinity Episcopal and Reformed Church in the parish hall. Mrs. James Schwank was the guest soloist. Mrs. John A. MacPhail, chairman of the department of Christian Education, led devotion.

Mrs. Russell Spangler read selections from scripture and Mrs. Frank Butcher was the piano accompanist for hymn singing.

Mrs. Louise Hoffman, president of the Guild, presided at the business session. A budget of \$192.68 for 1956 was approved. Mrs. MacPhail urged the organization to consider a reading course for 1956.

A donation of \$25 was given to the Community Chest. Mrs. Hoffman reminded the Guild of the World Community Day of Service November 4 and urged the women to contribute clothing for men and boys to be presented during the service.

Members of Trinity Circle described a package they are preparing for two children overseas. Mrs. Harrison F. Harbach reported on the work of the Christian Social Action Committee.

Refreshments were served by members of Trinity Circle.

John Whitman, R. 2; Mrs. Frank Pitzer, Steinwehr Ave., and Mr. and Mrs. W. D. Pitzer, Detroit, Mich., spent Thursday in Philadelphia.

Dr. Robert Fortenbaugh, W. Broadway, will describe the background of the American Indian at a meeting of the Women's Missionary Society of the Lancaster Conference Sunday afternoon at 3 o'clock at the Trinity Lutheran Church, Lancaster. He will be accompanied by Mrs. Fortenbaugh. They will be dinner guests that day of Rev. Dr. and Mrs. Wallace E. Fisher, former residents of Gettysburg. Rev. Dr. Fisher, pastor of the Lancaster church, is the former pastor of Christ Lutheran Church, Gettysburg.

Rev. and Mrs. Ralph W. Birk, Lemoine, spent Thursday with the latter's parents, Mr. and Mrs. Charles B. Hartman, R. 3.

N.C.C.W. HONORS

(Continued from Page 1)
Mrs. Tussing, but libraries existed in the 13th century, only the books were cumbersome tomes done up in parchment. It was the greatest achievement, imagination and artistic creation, for religious development and education." Mrs. Tussing is a graduate of Pennsylvania State University.

Will Present Film
A film, "I Sing of a Maiden," will be shown in Xavier Hall Sunday evening after benediction. There will be a silver offering.

Members were asked to bring a cotton article to the movie for the impoverished people in Vietnam.

In observance of U.N. Day, Monday, members will say the Rosary in the church throughout the day. Mrs. Eberhart will represent the council at the U.N. dinner at the Gettysburg High School Monday evening.

Mrs. Edwin J. Killalea, president, who presided, reported on the Coneywago Deaneys workshop held recently in Xavier Hall. Mrs. George Groft and Mrs. Frank Rosensteel are co-chairmen of the Thanksgiving clothing drive, it was announced.

Reads National Message
Mrs. Richard C. Eberhart, vice president, read the national president's message in which the annual Bishops' meeting was emphasized.

Mrs. Ralph Johnson was appointed chairman of a food sale to be held in November. The date and place will be announced later. Rev. Fr. Anthony P. Kane, moderator, lead the closing prayers.

Mrs. George P. Eberhart poured at the tea table. A shrine in honor of the Blessed Virgin was decorated with candles, roses and mums. Hostesses were Mrs. Edwin J. Killalea, Mrs. Richard C. Eberhart, the Misses Rhoda and Elizabeth Breighner and Miss Mary Louise Callahan.

The November hostesses are Mrs. Johnson, Mrs. George McKenrick and Mrs. Simon Redding.

Posts \$1,000 Bail For November Court

David J. O'Keefe, Hanover, waived a hearing before Justice of the Peace John H. Baschore, Thursday, on a charge of involuntary manslaughter; and posted \$1,000 bail for his appearance at the November term of Adams County court.

The matter was handled by mail through O'Keefe's attorneys, and he made no appearance at Baschore's office for the scheduled hearing. O'Keefe was charged by state police with the offense following an accident at Cross Keys, April 29, in which Richard C. Smith, Hanover, was fatally injured.

Weather Forecast

Extended forecast for Saturday, Oct. 22, through Wednesday, Oct. 26:

Eastern Pennsylvania, Eastern and Mid-Atlantic states: Temperature will average 4-8 degrees above normal; not hard 7-5 degrees above normal; south, cooler Saturday, warmer Monday and Tuesday; cooler Wednesday, some rain likely; north and scattered showers south Monday or Tuesday, averaging less than one tenth inch; south and one tenth to three tenths North. Western Pennsylvania, western New York, Ohio and West Virginia: Temperature will average 4-8 degrees above normal, cooler Saturday, warmer Sunday, cooler Tuesday and warmer Wednesday; some rain likely about Monday, averaging 1-1/2 inch.

AIR DAIRY OPENING
The program at the Penn Dairies, Inc., Thursday evening in connection with the formal opening will be broadcast, by tape recording, over WGET this evening at 5 o'clock.

Two Local Crashes Within Ten Minutes

Damage totaled more than \$1,000 in two accidents investigated by borough police within 10 minutes Thursday afternoon.

At 4:15 o'clock police were called to an accident in Lincoln Square. They said that Shirley M. Hanshaw, Littlestown R. 1 was driving north on Baltimore St., entered the square, and there her car was halted by a traffic tie-up caused by a train crossing Carlisle St. John D. Becker, 249 S. Washington St., backed his car into the Hanshaw vehicle, causing \$125 damage, police said.

At 4:25 o'clock Constable Ann Ballinger, Hyattsville, Md., driving south on Steinwehr Ave. attempted a left turn into the Taneytown Rd., Melvin Crouse, according to police, driving north on Steinwehr, collided with the Ballinger car. Damage was estimated at \$450 to each of the vehicles.

Police, who said they are continuing their investigation in each accident, listed no injuries.

AIR DAIRY OPENING

The program at the Penn Dairies, Inc., Thursday evening in connection with the formal opening will be broadcast, by tape recording, over WGET this evening at 5 o'clock.

Upper Communities

Telephone Mrs. John A. Leeti, Biglerville 8

Miss Eunice Luckenbaugh, a student at the Philadelphia General Hospital School of Nursing, spent the weekend with her parents, Mr. and Mrs. John N. Luckenbaugh, Biglerville R. 2.

The Luther League will meet at Flohr's Lutheran Church, McKnightstown, Sunday evening at 8:30 o'clock. The topic for discussion will be "The Amazing Dr. Fry," led by Darlene Funt.

The third in a series of four evangelistic services will be held at the Ortanna Methodist Church at 7:30 o'clock Sunday evening. "The Pearl of Great Price" will be the message brought by the pastor, the Rev. Eugene R. Schner.

The Senior Class of Biglerville High School will hold a food sale Saturday morning beginning at 8 o'clock in front of Dugan's Barber shop.

Robert Kurz, a senior at the Lutheran Theological Seminary, Gettysburg, will preach at Bender's and St. Paul's Lutheran Churches, Biglerville, Sunday morning in the absence of the Rev. Dr. H. W. Sierni, who will deliver the annual Homecoming sermon at the Lutheran Church in Abbotstown.

Dr. and Mrs. Raymond Hale and family, Arendtsville, recently visited Dr. Hale's niece, Miss Beverly Rinehart, at Juniata College, Huntingdon.

A special service of installation will be held for the Junior Choir of Trinity Lutheran Church, Arendtsville, Sunday morning at the regular worship service.

Bendersville Brownie Troop 29 met at the Bendersville Church building Wednesday afternoon. The 12 girls who will be invested into the Brownie Troop on November 2 rehearsed for the ceremony while other girls made final plans for the Halloween party which will be held next Wednesday. The girls then played games and sang songs. Mrs. Robert Orner and Mrs. Donald Weaver assisted the leader, Mrs. William Wright.

The Biglerville Kitchenettes will meet Tuesday evening at 7:30 o'clock at Biglerville High School.

Mrs. Naomi Guise, Lemoine, is spending a week with her brothers, Dennis, Paul and Mervin Rice, and their families, Bendersville. She will return to Lemoine, Sunday.

Arendtsville Brownie Troop 2 met Tuesday afternoon at the Scout hut with 26 girls present. As a Halloween project, black cats were made from construction paper, with red yarn for whiskers, and fastened onto apples. Plans were made for the Halloween party which will be held next Tuesday. The meeting closed with the friendship circle. The three leaders, Mrs. Raymond Hale, Mrs. Charles Bushy and Mrs. Robert Eicholtz Jr., were present.

The Rev. Robert K. Shaul, pastor of Trinity Lutheran Church, Arendtsville, and Daniel Walter delivered the Harvest Home donations to the National Lutheran Home for the Aged, Washington, D. C., Thursday.

Mrs. Roy Lawver, Biglerville, spent Tuesday with her brother-in-law and sister, Mr. and Mrs. Paul Hutchinson, Atglen, Pa.

James Cashman, was named captain and Merle Ramsey, assistant captain of a volleyball team at a recent meeting of the North Adams FFA.

Plans were made to hold a pest contest from November 1 to the 30. Captains are Lester Griest and Allen Wonders. Additional plans were made to hold a Halloween party in the near future.

James Cashman, president, presided. Jauris Kuntz, secretary, read the minutes. It was announced that the North Adams FFA Chapter won a plaque for the highest percentage in judging.

Baton Champ To Entertain Tonight

Miss Dawn Burg, head majorette of Gettysburg College Band and holder of many national and state champion baton twirling titles, will twirl tonight as a special "Pennsylvania Week" feature at the Gettysburg High School vs. Hershey game. Presented by Gettysburg High School Miss Burg will perform her sparker routine which she introduced at the Gettysburg Bucknell game, October 1 at Hershey.

A native of Red Lion, Miss Burg has won numerous twirling contests. During the summer she taught twirling at New York State Music Camp. She has had her own clinic and studio at Red Lion. At present she is coaching a twirling club for beginners at the high school.

The Hershey High School band will also appear on the field tonight.

NEW YORK EGGS

NEW YORK (P—(USDA)—Wholesale egg prices were steady today. Receipts 8,655. Nearby: Whites: Top quality (48-50 lbs) 35-36; med: 35-36; smalls 30-31; peewees 25-26. Browns: Top quality (48-50 lbs) 36-37; med: 35-36; smalls 30-31; peewees 25-26.

Out Of The Past

From the Files of the
Star and Sentinel and
The Gettysburg Times

FIFTEEN YEARS AGO

Miss Rita Jackson Becomes Bride Of Dr. Knox Today: Dr. John H. Knox, son of Mr. and Mrs. John H. Knox, Gettysburg R. 3, and Miss Rita Helene Jackson, daughter of Mr. and Mrs. J. Emerson Jackson, Gloucester City, New Jersey, were united in marriage at 9 o'clock in St. Mary's Catholic Church at Gloucester City. The ceremony was performed by the rector, the Rev. Fr. Lucetti. Doctor Knox began the practice of medicine at 27 York St. one year ago today.

The couple was attended by a sister of the bride, Miss Kathryn Jackson, Gloucester City, as the maid of honor and Dr. Frederick J. Vollmer, Baltimore, as best man. Doctor Vollmer was a classmate of the bride for four years at Mt. St. Mary's college and at the medical school of the University of Maryland.

The bridesmaids were Miss Madeline Jackson, Philadelphia, a sister of the bride; Miss Ann Gartland, Gloucester City; and Miss Adelaide Bausbach, who was a classmate of the bride at St. Joseph's hospital nurses' training school at Philadelphia.

The ushers were Richard Hamilton, Gloucester City; Roy Countryman, Audubon, New Jersey, and Emerson Jackson, Gloucester City, a brother of the bride.

The bride, who was given in marriage by her father, wore a white brocaded satin gown and carried a bouquet of white roses and orchids.

York-Hanawalt: Miss Dorothy Hanawalt, daughter of Mr. and Mrs. W. C. Hanawalt, Gettysburg R. D. and Holden E. York, Washington, D. C., were united in marriage Friday afternoon at 4 o'clock in the chapel of the First Presbyterian Church in Washington.

Snow Flurries Reported Over Entire County — Mercury Drops To Three Below Freezing: The mercury dropped to three below freezing early this morning and brought snow flurries to all sections of the county between 9 and 10 o'clock. At 11 o'clock this morning the official temperature was 51 degrees.

Local Surgeon Honored: Dr. Bruce N. Wolff, of Gettysburg, was among the 14 Pennsylvanians initiated into the American College of Surgeons at its annual meeting that opened in Chicago on Monday. Doctor Wolff, Warner Hospital surgeon, is attending the Chicago sessions this week.

Fever Quarantine: William I. Shields, Adams County health officer, has quarantined the home of Mr. and Mrs. Francis Dick, Reading Township, where the couple's son, Donald, aged three, is ill with scarlet fever.

Albert Rose Is Named Head Of Future Farmers: The Adams County chapter of the Future Farmers of America met Tuesday evening at the Gettysburg high school building and elected officers for the coming year. They will be installed at the next meeting when new members will be admitted to the chapter. Representatives of the six branch chapters in as many county high schools attended the meeting.

These officers were chosen: President, Albert Rose, Biglerville; first vice president, Lloyd Benner, Gettysburg; second vice president, Ernest Robert, Arendtsville; third vice president, Carson Lamberon, New Oxford; secretary, John White, Fairfield; treasurer, George Myers, East Berlin, and reporter, Donald Rouser, Biglerville.

Weddings: Mrs. Joseph Kreitz, Emmitsburg, has announced the marriage of her sister, Miss Gertrude Myers, who has been a member of the nursing staff at the Warner Hospital for the last five years, and Herbert W. Roger, Emmitsburg. The wedding took place, July 23, at Alexandria, Virginia, in St. Mary's Catholic Church. The Rev. Fr. Joseph Leitch, the rector, officiated.

Soldier's Widow Dies At 91: Has 211 Survivors: Mrs. Eliza Jane Richardson, 91, one of Fairfield's oldest residents and last Civil War

Today's Talk

TELEPHONE COURTESY

This summer I was made aware of the value and pleasantness of telephone courtesy as I had never noted it before. I depended upon a small exchange that was managed by a Mr. and Mrs. Allen Robinson. It was a joy to talk with them both, for they made you feel that the exchange was their own, and many a time they offered to go out of their way to please in offering their service. Their friendliness was inspiring. Some day I hope to meet them both and thank them in person for their kindness and courtesy.

A kindly and helpful telephone operator is a fine investment for any telephone company. A pleasing voice, and one that is often helpful in an emergency, is to be commended, no matter where it may be located — whether in Wellington, Nova Scotia, or New Orleans, Louisiana.

Often the first contact in a hotel or business organization is through the voice at the telephone. It may be the secretary of a prominent man, whose duty it is to save him from too much interference. Here it is that tact and courtesy play a big part. They often lead to the completion of an important order or new business contact.

The human voice has a strange and fascinating power, especially when it comes over a telephone wire. But it can perform wonders when kindly, pleasant, and courteous. An unfair advantage is taken when a person is angry over the telephone, or perhaps abusive. Such talk should be given face to face with the one addressed, but better not at all at any time! Many a message of hope and consideration is sent over the telephone wires. And many a business deal is consummated through it. Salesmen use it, because it is next to a personal call. Here it is that courtesy plays a big part. The telephone has a multitude of valuable uses, but courtesy in its use stands uppermost. People don't forget courtesy.

Tomorrow Mr. Adams will talk on the subject: "For Love of Dogs" Protected, 1955, By The George Matthews Adams Service

Just Folks

QUATRAINS

WHEN CHILDREN THINK

It would be nice

A pop to drink

Is worth the price.

THE SHAKER

Unless you have some one to care

How goes your struggle for success

And in the joy of triumph share.

Then victory adds to loneliness.

SAD NEWS

The saddest words a man can hear

Are whispered in the barber shop

By him who works with comb and shear:

"Your hair is getting thin on top."

PRAISEWORTHY

To such a trick he wouldn't stoop

Since skillful aid is worth the price.

When we'd a doctor in the group

He never asked for free advice.

FAULTY PATCH IS BLAMED FOR FATAL CRASH

CUMBERLAND, Md. (AP) — A faulty patch on an air-brake hose was blamed today for the death of five persons killed by a runaway truck last Wednesday.

Sgt. William F. Baker of the Maryland State Police said he and two Cumberland trucking experts examined the hose on the truck which roared out of control down Big Savage Mountain, smashing into a second truck and an automobile on Cumberland's west outskirts.

Baker said there had been a break in the hose, the break had been patched with friction tape, and the tape had worn out, causing the leak to reappear.

Two inspectors from the Interstate Commerce Commission who conferred with Baker yesterday planned to examine the hose today.

Paul Stewart Myers, 25-year-old driver of the truck, was charged yesterday with manslaughter and Ray Wells, owner of the vehicle, was arrested as a material witness.

The men, both from Dover, Pa., were released on bond for appearance before the January term of the Allegany County Circuit Court.

Myers, on of a Pennsylvania motor operator, escaped with only minor injuries as the truck crashed after the nine-mile nightmarish ride down the mountain.

Before coming to rest, it overran an automobile traveling in the same direction and crushed it. Two men and two women in the car were killed. The big tractor-trailer also crashed into a second truck, killing its driver.

BOILING SPRINGS GROUP OPPOSES FLUORIDATION

HARRISBURG (AP)—The Pennsylvania Pure Water Assn. Thursday asked Gov. Leader to stop the state Health Department from promoting fluoridation of water with "tax payers money and time."

At the organization's annual convention at nearby Boiling Springs a resolution was adopted contending the people of the state "show no great demand for the fluoridation program and that the Health Department should drop the program and concentrate on more important health measures."

The association telegraphed Sen. Pechan (R-Armstrong) and Rep. McGee (D-Phila.), chairman of the Senate and House health committees, requesting immediate public hearings on two bills providing for local votes on the fluoridation question.

Dr. S. Milton Zimmerman, an Ardmore dentist, was elected president for the coming year. Other officers named were: Dr. Alfred R. Smith, Yeadon; first vice president; William C. Jahnig, Butler, second vice president; and Harry C. Murray, Glenolden, secretary-treasurer.

LOS ANGELES — Walter B. Clausen, 64, a copy editor for the Los Angeles evening Herald-Examiner, former chief of the Associated Press bureau in Los Angeles and Honolulu and at one time with newspapers in San Francisco and Fresno, Calif. Born in San Francisco. Died Wednesday.

Today's Pattern

Imagine! This slender sheath of a skirt in the latest long 'n' easy silhouette to make from just one yard of your favorite wool or flannel fabric.

No. 2394 is cut in waist sizes 22, 24, 26, 28, 30. Any of these sizes can be sewn from just one yard of 54-in. fabric.

Send 35c in coin (no stamps, please) for Pattern, with Name, Address, Style Number and Size. Address Pattern Bureau The Gettysburg Times.

Box 42, Old Chelsea Station New York 11 N. Y.

For first class mail include an extra 5c per pattern.

The new fall-winter fashion world, just off the press, features all the important changes in the fashion silhouette. Beautifully illustrated in color this book brings you scores of easy-to-sew pattern designs for all ages and occasions. Send now for your copy. Price just 25c.

ELECT HEAD OF STATE CHAMBER

PITTSBURGH (AP) — Willard F. Rockwell Jr., president of the Rockwell Mfg. Co. of Pittsburgh, is the new president of the Pennsylvania State Chamber of Commerce.

He was elected Wednesday at the close of the chamber's annual meeting, succeeding Joseph C. Feagley, vice president of Armstrong Cork Co. of Lancaster.

Rockwell, at 41, is the youngest president in the chamber's history. Feagley was president of the group for three years.

H. B. Bartlett, executive vice president of Parish Pressed Steel Co., Reading, was elected to one of the chamber's four vice presidencies. Other officers were re-elected.

James B. Reston, chief of the Washington Bureau of the New York Times, told a luncheon meeting U.S. policies have forced a change in Soviet tactics. He said: "History probably will show we have won the first phase of the cold war and don't know it and we face the second phase without being ready for it."

MAY PUT IKE'S NAME ON BALLOT IN N. HAMPSHIRE

WASHINGTON (AP)—Sen. Bridges (R-NH) said today that if President Eisenhower delays a second term decision beyond next January, Republicans may enter his name in early primaries "on the assumption he's going to run again."

Bridges, who heads the Senate Republican Policy Committee, said he hopes the President can decide at the latest 30 days ahead of the March 13 New Hampshire primary. That is the filing deadline in that state.

"If the President's decision is delayed, it is going to put Republicans in states with early primaries in a quandary," Bridges said. "If there is no decision we will probably go ahead on the assumption that he will run again."

Despite the primary situation, Sen. H. Alexander Smith (R-NJ) said in a separate interview Eisenhower should have all the time he needs to make up his mind whether he feels physically able to seek a second term. Smith said the President should not be "pressured" into any decision.

MAY DEFER DECISION
GOP National Chairman Leonard W. Hall has said Eisenhower may wait until shortly before next August's party convention before announcing his intentions.

Sen. George (D-Ga.) told a news conference he thinks the nominating conventions of both parties will be "wide open." He said he assumed Eisenhower will not run again.

George said he thinks Adlai E. Stevenson would win the Democratic nomination again if the party convention were held now.

Rugged Test For Bullet Gridders In Muhlenberg Homecoming Game Saturday

This afternoon at 2 o'clock Coach Johnny Yovicsin and his 36-man Gettysburg College football squad left by bus for Allentown where the Bullets will meet Muhlenberg Saturday afternoon at 2 o'clock. The squad will be quartered at the Hotel Taylor, Allentown, tonight.

Despite the heart-breaking defeat at the hands of Lehigh here last Saturday, the entire squad has come back strong during the week of drills and there is little doubt as to a high spirit for the game with the Mules. Thursday afternoon the squad went through a final drill here with all in good condition, barring a few minor bruises.

Laud Mule Backs
The coaching staff and scouts alike expect Muhlenberg to furnish the Orange and Blue with the stiffest kind of competition. Scouts have reported the Mules possess a big, rugged line with two very fine halfbacks in Jackie McDonald, 180, and Bob Lee, 155, and a powerhouse fullback in Tony Sadtler, 208, who has been converted from tackle.

Muhlenberg has a 2-2 record but its setbacks were to highly-regarded Lafayette 7-0 and Rutgers 21-0. The triumphs were over Albright 26-13 and 32-0 over Lebanon Valley.

Coach Tom Triplett has 16 lettermen on his squad and is confident his lads will play consistent winning ball the remainder of the way.

Saturday's game will be Homecoming for the Mules which make them doubly dangerous for the locals.

Coach Yovicsin reported today he anticipates no change in his regular lineup, the starters depending upon whether the Bullets receive or kickoff.

35th In Series

The game will mark the 35th in the series between the schools which had its inception in 1907. Gettysburg leads in victories, 19 to 15. The Bullets have won during the

past four years, Muhlenberg's last triumph being a 28-7 triumph in 1950.

Frank Gagliardi, star quarterback for the Bullets, is expected to go over the 2,000-yard mark in total offense for his college career against the Mules. He needs but 35 yards to reach that figure, having already compiled 1,965 yards. The Long Branch, N. J., lad has tossed 24 touchdown passes and rushed for 10 more.

Mount Harriers Outrun Terrors

Ray DellaPesta finished first to lead the Mt. St. Mary's College cross-country runners to an 18-46 victory over Western Maryland at Emmitsburg, Thursday.

DellaPesta turned in a 19.40 mark for the 3.4 mile course. Robert Ivanko was second, being clocked at 20.22, and Ken Phillips third with a 20.23 mark to give the Mountaineers a clean sweep of the three positions. The victory boosts the Mount record to 2-2.

CARDS AND BUMS ARE DICKERING FOR BIG TRADES

By THE ASSOCIATED PRESS
Frank Lane's in operation again and the hot stove league is blazing. Speculation has it that Lane, now operating as general manager for the St. Louis Cardinals, and the Brooklyn Dodgers are going to mention big names when they sit down to talk baseball in Havana this weekend.

The Cards, of course, need pitching. A shortstop would help, too. The Dodgers? They're still looking for a left fielder—despite the World Series heroics of Sandy Amoros. Rumors? Try these for size: Brooklyn to send Don Newcombe, a 20-game winner but a Series disappointment, to St. Louis in return for one of Gussie Busch's fine young outfielders—Bill Virdon, Wally Moon or Rip Repulski. Or Brooklyn to part company with righthanders Billy Loes or Russ Meyer or outpawp Ken Lehman, a big winner for Montreal, and/or smooth fielding Chico Fernandez, a slap-hitting shortstop at Montreal, for one of the outfield dandies.

Pirates Seek Chief
Stockholders in the Pittsburgh Pirates will meet next week to name a successor to General Manager Branch Rickey, who's determined to step down as of Nov. 1. Joe L. Brown, son of comedian Joe E. Brown, and a past minor league GM for the Bucs, and Branch Rickey Jr. are the likely candidates. Brown appears to have the edge.

The Bucs also have to pick a new manager, after giving Fred Haney the gate, Fred (Dixie) Walker, Bobby Bragan, who managed Hollywood, or Andy Cohen, New Orleans' manager, have been most frequently mentioned for the job. Walker, believed on the inside track, appreciates the compliment but says "It's all news to me."

Little Leaguers To Dine Tuesday

A banquet in honor of all players in the Little League during the past season will be held Tuesday evening at 6:30 o'clock at the Shetter House, it was announced today by Dick Altomose, league president.

In addition to members of the four teams, Rotary, Lions, Moose and Glenn L. Bream, league officials will attend.

CANNER SCRUBS TOP CARLISLE FOR THIRD WIN

A 65-yard run by Ken Baltzley late in the final period broke a 7-7 tie and gave the unbeaten Biglerville High School junior varsity a 13-7 win over Carlisle Thursday on the Cannert's gridiron.

The victory was the third in as many starts for Coach Don Stiermer's outfit.

Biglerville scored in the first period when Dick Barker hurled a 30-yard pass to Parker Coble, end, with Ken Baltzley plunging over to add the extra point.

Carlisle tied 7-0 until early in the last frame when Shover broke away on an 18-yard scamper for the visitors to make it 7-6. Mumper's placement tied the count at 7-7.

Biglerville came roaring back and pounded out two first downs to its 35 after receiving the kickoff. At that point Baltzley broke away on his long victory-clinching run. Carlisle halted a Canner plunge for the point.

Next Thursday Biglerville goes after its fourth straight at Shippenburg.

Biglerville
The lineup: Ends—Shovers, Coble. Tackles—H. Baltzley, G. McCauslin, Hess. Guards—Weigle, Wagaman. Center—Beatty. Backs—Byers, K. Baltzley, Harman, Bolen, Shaffer, Shetter, Howery.

Carlisle
Ends—Rahilly, Quilas. Tackles—Everts, Bistline. Guards—Mumper, Baltzhoover. Center—Alspaugh. Backs—Roney, Shover, Manning, Brown.

YOUNG LOGART BATTLES TURNER THIS EVENING

NEW YORK (AP)—Isaac Logart, a 22-year-old welterweight who comes from Kid Gavilan's home province of Camaguey and hopes to follow in his countryman's footsteps, makes the jump to the big time tonight against experienced Gil Turner at Madison Square Garden.

The young Cuban, latest idol of the metropolitan area's Latin-American set, is a 9-5 underdog.

NBC will broadcast and televise the 10-rounder at 9 p.m. EST.

Logart has 13 brothers and three sisters. He once fought a main event for \$1.50 in Cuba. Tonight he not only will get a chance to crash the national spotlight but he'll pick up a check of around \$5,000.

"This is my big chance," he said. "All the time I want to fight in the Garden like Kid Chocolate (his idol) and Kid Gavilan. I show

Next Thursday's Games
Gettysburg at Hanover.
Chambersburg at Waynesboro.
Shippensburg at Washington Twp.

A safety registered by the visitors with less than three minutes of play remaining enabled Waynesboro Junior High to nip the Gettysburg Junior High gridders 15-13 here Thursday evening in a South Penn league game.

With the score deadlocked 13-13, Gettysburg took possession on its own 10 late in the game following a Cyclone punt. Two successive penalties put Ned Brownley's lads back on the one. Joel Riddlemeyer, quarterback, was trapped in the end zone on the next play to give the invaders their winning margin. Until that time the Braves had dominated play.

Gettysburg drove 70 yards for its first score in the opening quarter after taking over on the 30 via a punt. Bob Furney, who scored both Brave six-pointers, crashed over from the 5 and George Mitchell added the point on a right end sweep.

Penalties Hurt
The Braves became victims of two 15-yard penalties when they threatened in the second quarter. They drove from midfield to the Waynesboro 2 after which two successive penalties set them back to the 32. Waynesboro intercepted a screen pass and ran it back to the Gettysburg 20. A Cyclone aerial put the ball on the 2 from where Ken Keller ripped over on a quarterback sneak. Keller flipped a pass to Scott to tie the count at 7-7.

Gettysburg took the lead shortly after the second half got under way. The Braves marched 80 yards with Furney finally smashing over from the 1. Gary Mauland was halted when he attempted to run for the point.

Kickoff TD Run
The Cyclones tied the score with cyclonic suddenness. Ronnie Mowen took the ensuing kickoff and raced 70 yards to tally. Gettysburg's line, who turned in a brilliant exhibition throughout the evening, smothered the plunge for the point. There were no more serious threats until the waning moments when the safety was scored.

The Braves now have a 1-3 mark. Next Thursday afternoon they will play at Hanover. Waynesboro has a 2-0 mark.

The Lineups:
Gettysburg
Ends—Graham, Dearing.
6 Tackles—Harman, Steinour, Renzel, Skidmore.
6 Guards—W. Rudisill, Woodsom, R. Rudisill.
6 Center—Coldsmith.
Backs—Riddlemeyer, Mitchell, Furney, Maitland, Richardson, Nichols, Taylor.

Waynesboro

Both Rarin' To Go
The is rarin' to go but so is Turner. Gil, now 25, was only 22 when he was knocked out in 11 rounds by Kid Gavilan, then the welterweight champion. That was his first defeat after winning 31 straight. He'd like to get even with Camaguey even if the opponent is Logart and not Gavilan.

Although he is ranked as the No. 10 middleweight contender, the windmill puncher from Philadelphia said he is aiming for another shot at the 147-pound welterweight crown. Logart is the eighth-ranked welter contender.

Turner's record is 48-9-1 with 33 knockouts. Logart, winner of four of his last five fights, has a 38-5-4 record. He has topped 18 foes.

GHS Entertains Hershey Tonight; Bolts At Home

One of the best opportunities for crashing into the win column will be presented the Gettysburg High Warriors this evening when they tangle with the Hershey Trojans on the local field at 8 o'clock.

Hershey shows but on victory in six engagements. However, the Trojans have been improving steadily and conceivably could sweep their remaining games. An all-out effort by the Warriors is needed to produce an upset.

Other games on tonight's program include Carlisle at Hanover, the winner of which will probably clinch the South Penn title, and Middletown at Chambersburg.

Littlestown goes after the Laurel Conference title and its 13th straight victory tonight when it meets Kennard-Dale on the Littlestown gridiron.

Delone Catholic travels to Lebanon for a non-conference tilt with Lebanon Catholic.

DELONE BEATS PENBROOK IN FINAL SECONDS

An extra point pass from John Gastley, of Gettysburg, to Paul Gephart provided the winning margin as Delone Catholic Junior High, McSherrystown, defeated Penbrook Junior High 7-6 Thursday afternoon.

After Penbrook had scored its lone touchdown in the final four minutes, Delone took the ensuing kickoff and drove back to win. A 20-yard pass from Larry Lawrence to Gephart set up the touchdown on the two yard line. John Gastley plunged for the six pointer. Gastley passed to Gephart for the extra point but Delone was offside and was penalized to the seven yard line. Gastley's second pass attempt in the final 40 seconds gave Delone the victory by a point.

Delone Stalled Twice
After Delone had penetrated to the Penbrook 25, Richard Wix recovered a fumble to start Penbrook's TD drive. Penbrook appeared stalled on the 30, but on fourth down Dave Palley gained 10 yards to keep the drive moving. Palley finally scored from life seven, going over left tackle after taking a handoff from Daryl Swager. Jim Briggins tried to plunge for the PAT, but was stopped short.

Penbrook, which lost its third in four starts, had the edge in statistics with a total of 200 yards to 175. But Delone, undefeated in three starts, had two touchdown drives stalled.

Lineups:
Delone
Ends—Thomsey, J. Gastley, Gephart.
Tackles—Sanders, Jacoby, Hertz, Guards—Hartlaub, Long, Center—Staub.
Backs—Lawrence, Houcksmith, Gastley, Weaver, Bair, Shaeffer.

Penbrook
Ends—Kenyuck, Conrad, Mills. Tackles—Harr, Stine, Lingle. Guards—Bennett, Wix. Centers—Brown, Kunkle. Backs—Swager, Palley, Hoffman, Fisher, Briggins, Fair, Snyder.

SAN FRANCISCO—Hank Greenberg, general manager of the Cleveland Indians, said he was prepared to take over the financially-narced San Francisco Seals if the Pacific Coast League would donate the franchise.

GHS RESERVES WHIP HOUNDS FOR 34-0 WIN

Gettysburg High School's football reserves chalked up their third win against a single setback by easily defeating Shippensburg here Thursday afternoon 34-0.

Coach Don Bickel's outfit hopped off to a 13-0 lead in the first period and were never in serious trouble thereafter.

Midway in the opening period Charley Washington went off tackle to race 72 yards for the opening score. Rex Baltzley plunged for the extra point.

On the second play following the ensuing kickoff Shippensburg fumbled and Kenny Mummert scooped up the leather and dashed 25 yards to tally. The try for the point failed.

The Warrior reserves drove approximately 80 yards for their second in the second period, Washington driving over from the six-yard line. Baltzley added the point on a line smash.

Keeler Intercepts
After a scoreless third period, Coach Bickel's lads added a pair of TDs in the final stanza. The first came when Kenny Keeler scampered 45 yards after intercepting a Greyhound aerial. Dick Pyle whipped a pass to Kenny Keeler for the point.

Keeler scored a short time later from the 13-yard stripe after the locals had recovered a fumble. Baltzley accounted for his third extra point on another plunge.

Shippensburg twice threatened and both came in the second quarter when the Warriors held within the 20-yard line.

Gettysburg will be idle until Thursday, Nov. 3, when Chambersburg will be met at Chambersburg to wind up the campaign.

The Lineups:
Gettysburg
Ends—G. Keeler, Wheeler, Cook, Kimpke, Becker.
Tackles—Eckert, Fissel, Clapsaddle.
Guards—James, Poole, Heffler, Shearer.
Centers—Staley, Thomas.
Backs—K. Keeler, Mummert, Pyle, Sauter, Baltzley, Kitzmiller, Washington, Helsel, Crouse.

Shippensburg
Ends—Funk, L. Coy.
Tackles—Long, Reed.
Guards—Freeman, D. Coy.
Center—Nichols.
Backs—Lester, Shoat, Marpoel, Kilpatrick.

Score by periods:
Gettysburg 13 7 0 14—34
Shippensburg 0 0 0 0—0
Touchdowns—Washington two, Mummert, K. Keeler, two. PAT, Baltzley three, plunges; K. Keeler, pass.

WES SANTEE IN GOOD SHAPE

NEW YORK (AP)—Wes Santee won't be any less effective in the 1956 Olympics because of his hitch in the Marine Corps.

In fact, it may help. "I haven't been running the mile at all since I've been in the Marines," said Santee before heading back to Quantico, Va., today. "We've been running strictly distance races down there, but it's kept me in real good shape."

The gangling University of Kansas graduate certainly looked like money in the bank last night in the Olympic Carnival in Madison Square Garden. He ran the mile in 4:05.2—second fastest ever in the Garden and sixth fastest indoors.

The six-spot carnival was the unofficial kickoff of the 1956 Olympic fund-raising campaign. Saturday has been proclaimed Olympic Day by President Eisenhower and that will signify the official start of the drive.

In wrestling, Pete Blair, Navy's NCAA champion, outpointed Bill Oberly of Penn State in a free style match, and Jim Peckham of Boston decimated Henry Hansen of New York, in a Greco-Roman match. Both are national champions.

A gymnastic demonstration also was held, headlined by Karl Schwendler of Penn State, the national all-around champion.

Maryland Vs Syracuse, Oklahoma Vs Colorado Are Top Games Of Week

By JOHN CHANDLER
The Associated Press

College football heads into the second half of its 1955 schedule this weekend, and most conference championships and the big New Year's Day bowl games are far from settled. But the men are being separated from the boys, and a lot of light is beginning to filter through the shadows.

One of the major games tomorrow involving conference rivals brings together Oklahoma, perennial champs of the Big Seven, and Colorado, both undefeated. Oklahoma is favored, although if there is any Big Seven team with a chance to beat them out of an Orange Bowl assignment it's Colorado.

Maryland, which is expected to represent the Atlantic Coast Conference in the Orange Bowl, will have a scrap on its hands against once-beaten Syracuse in another big battle of the day.

Michigan Vs. Gophers
Michigan, the nation's No. 1 team just ahead of Maryland, has

LAST NIGHT'S FIGHTS
By THE ASSOCIATED PRESS

LOS ANGELES—Piml Barajas Jimenez, 115½, Tijuana, Mexico, outpointed Jackie Purgeon, 112, New York, 10.

SAN FRANCISCO—Tanny Campop, 116, Philippines, outpointed Johnny Ortega, 112, Oakland, Calif., 10.

BOISE, Idaho—Mickey Rhodes, 150, Boise, outpointed Dick Lane, 149, Billings, Mont., 10.

HOUSTON, Tex.—Ray Rojas, 135, Houston, outpointed Roland Abrams, 134, Philadelphia, 10.

Tune In WGET, 1450 On Your Dial
Washington, a winner over Southern California, takes on Stanford tomorrow and should win without too much difficulty.

Auburn, winner over Georgia Tech and with the Southeastern Conference and Sugar Bowl pecking over a far-off horizon, picks on a patsy—Furman.

The Southwest Conference championship may not be settled for another few Saturdays, with Baylor, Texas A&M and Southern Methodist still in the running. However, Baylor meets Texas A&M tomorrow.

In the other four top attractions tonight, Texas Christian plays Miami, Denver goes against Brigham Young, unbeaten Boston College meets Marquette and Oklahoma A&M tackles Detroit.

Out Of The Past

From the Files of the Star and Sentinel and The Gettysburg Times

FIFTEEN YEARS AGO
Miss Rita Jackson Becomes Bride Of Dr. Knox Today: Dr. John H. Knox, son of Mr. and Mrs. John H. Knox, Gettysburg R. 3, and Miss Rita Helene Jackson, daughter of Mr. and Mrs. J. Emerson Jackson, Gloucester City, New Jersey, were united in marriage at 9 o'clock in St. Mary's Catholic Church at Gloucester City. The ceremony was performed by the rector, the Rev. Fr. Lucetti. Doctor Knox began the practice of medicine at 27 York St. one year ago today.

The couple was attended by a sister of the bride, Miss Kathryn Jackson, Gloucester City, as the maid of honor and Dr. Frederick J. Vollmer, Baltimore, as best man. Doctor Vollmer was a classmate of the bridegroom for four years at Mt. St. Mary's college and at the medical school of the University of Maryland.

The bridesmaids were Miss Madeline Jackson, Philadelphia, a sister of the bride; Miss Ann Gartland, Gloucester City; and Miss Adelaide Bausbach, who was a classmate of the bride at St. Joseph's hospital nurses' training school at Philadelphia.

The ushers were Richard Hamilton, Gloucester City; Roy Countryman, Audubon, New Jersey, and Emerson Jackson, Gloucester City, a brother of the bride.

The bride, who was given in marriage by her father, wore a white brocaded satin gown and carried a bouquet of white roses and orchids.

York-Hanawalt: Miss Dorothy Hanawalt, daughter of Mr. and Mrs. W. C. Hanawalt, Gettysburg R. D., and Holden E. York, Washington, D. C., were united in marriage Friday afternoon at 4 o'clock in the chapel of the First Presbyterian Church in Washington.

Snow Flurries Reported Over Entire County — Mercury Drops To Three Below Freezing: The mercury dropped to three below freezing early this morning and brought snow flurries to all sections of the county between 9 and 10 o'clock. At 11 o'clock this morning the official temperature was 51 degrees.

Local Surgeon Honored: Dr. Bruce N. Wolff, of Gettysburg, was among the 14 Pennsylvanians inducted into the American College of Surgeons at its annual meeting that opened in Chicago on Monday. Doctor Wolff, Warner Hospital surgeon, is attending the Chicago sessions this week.

Fever Quarantine: William I. Shields, Adams County health officer, has quarantined the home of Mr. and Mrs. Francis Dick, Reading Township, where the couple's son, Donald, aged three, is ill with scarlet fever.

Albert Rose Is Named Head Of Future Farmers: The Adams County chapter of the Future Farmers of America met Tuesday evening at the Gettysburg high school building and elected officers for the coming year. They will be installed at the next meeting when new members will be admitted to the chapter. Representatives of the six branch chapters in as many communities in the county attended the meeting.

Weddings: Mrs. Joseph Kreitz, Easton, Pa., has announced the marriage of her sister, Miss Gertrude Meyer, who has been a member of the nursing staff at the Warner Hospital for the last five years, and Herbert W. Rorer, Easton, Pa. The wedding took place July 23 at Alexandria, Virginia, in St. Mary's Catholic Church. The Rev. Fr. Joseph Leitch, the rector, officiated.

Today's Talk

TELEPHONE COURTESY
This summer I was made aware of the value and pleasantness of telephone courtesy as I had never noted it before. I depended upon a small exchange that was managed by a Mr. and Mrs. Allen Robinson. It was a joy to talk with them both, for they made you feel that the exchange was their own, and many a time they offered to go out of their way to please in order to get their service. Their friendliness was inspiring. Since then I hope to meet them both and thank them in person for their kindness and courtesy.

A kind and helpful telephone operator is a fine investment for any telephone company. A pleasant voice, and one that is helpful in an emergency, is to be commended, no matter where it may be located — whether in Wellington, Nova Scotia, or New Orleans, Louisiana.

Often the first contact in a hotel or business organization is through the voice at the telephone. It may be the secretary of a prominent man, whose duty it is to save him from too much interference. Here it is that tact and courtesy play a big part. They often lead to the completion of an important order or new business contact.

The human voice has a strange and fascinating power, especially when it comes over a telephone wire. But it can perform wonders when a person is angry over the telephone, or perhaps abusive. Such talk should be given face to face with the one addressed, but better not at all at any time!

Many a message of hope and consideration is sent over the telephone wires. And many a business deal is consummated through it. Salesmen use it, because it is next to a personal call. Here it is that courtesy plays a big part. The telephone has a multitude of valuable uses, but courtesy in its use stands uppermost. People don't forget courtesy.

Tomorrow Mr. Adams will talk on the subject: "For Love of Dogs" Protected, 1955, by The George Mathew Adams Service

FAULTY PATCH IS BLAMED FOR FATAL CRASH

CUMBERLAND, Md., Oct. 20 — A faulty patch on an air-brake hose was blamed today for the death of five persons killed on a runaway truck last Wednesday.

Sgt. William F. Baker of the Maryland State Police said he and two Cumberland trucking experts examined the hose on the truck which ran out of control down B. 2 State Mountain, smashing into a school truck and an automobile on Cumberland's west outskirt.

Baker said there had been a break in the hose the break had been patched with friction tape, and he tape and worn out, causing the leak to reappear.

Two inspectors from the Interstate Commerce Commission who conferred with Baker yesterday planned to examine the hose today.

Paul Stewart Myers, 25-year-old driver of the truck, was charged yesterday with manslaughter and Ray Webb, owner of the vehicle, was arrested as a material witness.

The men, both from Dover, Pa., were released on bond for appearance before the January term of the Allegheny County Circuit Court.

Myers, on a Pennsylvania motel operator, escaped with only minor injuries as the truck crashed after the nine-mile nightmarish ride down the mountain.

Before coming to rest, it overran an automobile traveling in the same direction and crushed it. Two men and two women in the car were killed. The big tractor-trailer also crashed into a second truck, killing its driver.

BOILING SPRINGS GROUP OPPOSES FLUORIDATION

HARRISBURG (AP)—The Pennsylvania Pure Water Assn. Thursday asked Gov. Leader to stop the state Health Department from promoting fluoridation of water with "tax payers money and time."

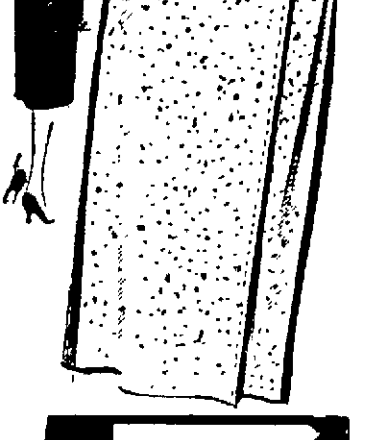

At the organization's annual convention at nearby Boiling Springs a resolution was adopted contending the people of the state "show no great demand for the fluoridation program and that the Health Department should drop the program and concentrate on more important health measures."

The association telegraphed Sen. Pechan (R-Armstrong) and Rep. McGee (D-Phila.), chairman of the Senate and House health committees, requesting immediate public hearings on two bills providing for local votes on the fluoridation question.

Dr. S. Milton Zimmerman, an Ardmore dentist, was elected president for the coming year. Other officers named were: Dr. Alfred R. Smith, Yeading; first vice president; William C. Jahng, Butler, second vice president; and Harry C. Murray, Glenolden, secretary-treasurer.

LOS ANGELES — Walter B. Clausen, 64, a copy editor for the Los Angeles evening Herald-Examiner, former chief of the Associated Press bureaus in Los Angeles and Honolulu and at one time with newspapers in San Francisco and Fresno, Calif. Born in San Francisco, died Wednesday.

ELECT HEAD OF STATE CHAMBER

PITTSBURGH (AP)—Willard F. Rockwell Jr., president of the Rockwell Mfg. Co. of Pittsburgh, is the new president of the Pennsylvania State Chamber of Commerce.

He was elected Wednesday at the close of the chamber's annual meeting, succeeding Joseph C. Feagley, vice president of Armstrong Cork Co. of Lancaster.

Rockwell, at 41, is the youngest president in the chamber's history. Feagley was president of the group for three years.

H. B. Barnett, executive vice president of Parish Pressed Steel Co., Reading, was elected to one of the chamber's four vice presidencies. Other officers were re-elected.

James B. Reston, chief of the Washington Bureau of the New York Times, told a luncheon meeting U.S. policies have forced a change in Soviet tactics. He said: "History probably will show we have won the first phase of the cold war and don't know it and we face the second phase without being ready for it."

MAY PUT IKE'S NAME ON BALLOT IN N. HAMPSHIRE

By JACK BELL
WASHINGTON (AP)—Sen. Bridges (R-NH) said today that if President Eisenhower delays a second term decision beyond next January, Republicans may enter his name in early primaries "on the assumption he's going to run again."

Bridges, who heads the Senate Republican Policy Committee, said he hopes the President can decide at the latest 30 days ahead of the March 13 New Hampshire primary. That is the filing deadline in that state.

"If the President's decision is delayed, it is going to put Republicans in states with early primaries in a quandary," Bridges said. "If there is no decision we will probably go ahead on the assumption that he will run again."

Despite the primary situation, Sen. H. Alexander Smith (R-NJ) said in a separate interview Eisenhower should have all the time he needs to make up his mind whether he feels physically able to seek a second term. Smith said the President should not be "pressured" into any decision.

May Defer Decision
GOP National Chairman Leonard W. Hall has said Eisenhower may wait until shortly before next August's party convention before announcing his intentions.

Sen. George (D-Ga.) told a news conference he thinks the nominating conventions of both parties will be "wide open." He said he assumed Eisenhower will not run again.

George said he thinks Adlai E. Stevenson would win the Democratic nomination again if the party convention were held now.

Blame Driver In Fatal Truck Crash

CUMBERLAND, Md., Oct. 20 — Police said they would file a manslaughter charge, probably Thursday, against the driver of a tractor-trailer truck which ran out of control down Big Savage Mountain Wednesday, killing five persons.

The driver, Paul Stewart Myers, 25, of Dover, Pa., suffered minor cuts and bruises and complained of a soreback. He remained in Sacred Heart Hospital overnight for observation.

State police Sgt. William F. Baker said Myers would be charged with manslaughter by motor vehicle as soon as he is released.

KANSAS CITY (AP)—A Kansas City bank had a clock painted on a billboard advertising the bank. The painter did such a good job depicting the clock that dozens of persons have been calling the bank to complain about its time being wrong.

Arthur B. Eisenhower, a bank vice president and brother of President Eisenhower, said: "We're going to have to put a real clock there."

but added that developments in the next few months may change that picture.

MACARTHUR OPPOSED GIFTS

NEW YORK (AP)—Gen. Douglas MacArthur said Thursday the Pentagon report released Wednesday "fully confirms that I was never consulted" concerning the Yalta conference.

MacArthur said: "The issue involved at the origin of this controversy was not whether Russia should have been brought into the Pacific war — this should have clearly been done at the very beginning — but whether we should have made vital territorial concessions at the expense of Chinese sovereignty to induce Russia to come in at the end."

The former Far East commander said he had urged on Dec. 13, 1941, shortly after Pearl Harbor, that Russia attack from the north. This, he said, would have "saved countless lives, billions of dollars, and spared the Philippines."

ARE "SOUPED-UP" JALOPIES FASTER THAN LATE MODEL STOCK CARS???

This has been the \$64,000 question ever since the inception of the so-called Jalopies. At Williams Grove Speedway next Sunday, October 23 (rain date October 30), this question will be decided once and for all. And for the first time in the history of Jalopies they will run under exactly the same conditions as the great Indianapolis Classic, with time trials under the supervision of George Dietrich, Official AAA Timer, with his electric clocks, at 11:00 A.M.

Jalopies are limited to American Passenger Cars with Motors, Bodies, and Chassis from 1932 to 1948. Only through the skill and ingenuity of the owners, mechanics and drivers have these old cars been able to attain such terrific speed and stamina.

The reason they may prove faster than late model Stock Cars, including 1955 and 1956 models, is that they are allowed overbore of .008 plus .020 for wear, maximum .108 with 235 cubic inches, and also locked rear ends, same as Indianapolis Cars, while strictly stock cars must run as is.

This race is limited to members of the Williams Grove Jalopy Stock Car Association in good standing.

GERMAN LEADER FREED BY REDS AFTER 5 YEARS

CAMP FRIEDLAND, Germany (AP) — Leo Bauer, German Communist leader who befriended the Noel Field family, returned Thursday after five years of Soviet captivity.

Bauer, 43, was expelled from the party in 1950 and jailed as an alleged spy for the United States. At that time, he was editor-in-chief for the Communist East Berlin radio. Previously, he had headed the Communist deputies in the Hessian Parliament.

His name was on a letter to Mrs. Erika Glaser Wallach promising to help her find her missing foster father, Noel Field.

Sentenced To Death
She went to East Berlin to meet Bauer. Both were arrested. Bauer Thursday said he and Mrs. Wallach were sentenced to death for espionage in a joint trial in East Germany Dec. 28, 1953 — three years after they were arrested. Mrs. Wallach also has been released and is in Moscow.

Bauer told reporters East German Communist boss and Deputy Premier Walter Ulbricht used the Field case to "liquidate me."

"I had been in opposition to him since 1946. He regarded me as an enemy because I had spoken up against the Oder-Neisse border with Poland," he said.

Permanent Peace Border
Communist East Germany has agreed to make the Oder and Neisse rivers the "permanent peace border" with Poland, renouncing claim to German territories in the East annexed by Poland at the end of World War II.

Bauer said he became a friend of Noel Field and of Allen W. Dulles, then with the American Office of Strategic Services, while he was a refugee from Nazi Germany in Switzerland during the war.

"I don't want to have anything to do with communism any more," Bauer told reporters. "But I am still a Socialist."

Mrs. Wallach was the last of four members of the Field family to be released by the Russians.

Noel Field and his wife, Herta, were released last November from prison by Communist Hungary and asked for political asylum there. Hermann Field, Noel's brother, was freed in Poland last year and is now in England.

CEYLON JUNKET FOR MARGARET IN FEB. 1957

LONDON (AP) — A Buckingham Palace spokesman said Thursday Queen Elizabeth II has given her approval for Princess Margaret and the Queen Mother to visit Ceylon in February 1957. But there is no certainty they will make the trip.

This routine statement had the effect of throwing a mantle of confusion about the romance of Princess Margaret and Capt. Peter Townsend.

The first supposition—and it was only that—was that Princess Margaret would be following the round of her official functions even as far ahead as that date. That did not square with the equally unsupported assumption that the pretty 25-year-old princess might give up such activities if she and Townsend marry, as millions of Britons confidently believe.

Trip Not Certain

Nor was there any certainty that the princess and her mother would go to Ceylon. As is customary, the governor-general, Sir Oliver Goonetilleke, asked the Queen's formal approval for the visit to coincide with a Colombo plan exhibition in the commonwealth country.

The palace spokesman said the Queen advised the governor general her mother and sister would have to make the final decision themselves on whether they would make the visit and asked him to write to them.

U.S. To Help Asians In Atomic Training

SINGAPORE (AP) — The United States offered today to help set up an atomic reactor center in south and southeast Asia for nuclear research and training under President Eisenhower's atom-for-peace program.

Canada also announced at the ministerial conference of the Colombo Plan nations now under way here that she had agreed in principle to help India build an atomic reactor which will be "available for use of scientists from other countries."

The U.S. proposal, put forward by John B. Hollister, administrator of the U.S. foreign economic aid program, did not suggest any location for the reactor. But he said its "guiding purpose must be complete availability to all Colombo Plan countries on an equal basis."

Hollister said the United States would contribute funds for training the Asians, laboratory facilities and equipment, and particularly a "reactor suitable for research and training."

Also the following Borough, Ward, and Precinct offices in the County are to be filled as set forth on the ballot for each respective Borough, Ward, and Precinct:

School Directors, Constables, Auditors, Justice of the Peace, Councilmen, Judge of Election, Inspector of Election.

Also the following Township and Precinct Offices are to be filled as set forth on the ballot for each respective Township and Precinct:

Supervisors, Justice of the Peace, Constables, Auditors, School Directors, Judge of Election, Inspector of Election.

To vote a straight party ticket, mark a cross (X) in the square, in the Party Column opposite the name of the party of your choice.

A cross mark in the square opposite the name of any candidate indicates a vote for that candidate.

To vote for a person whose name is not on the ballot, write or paste his or her name in the blank space provided for that purpose. This shall count as a vote without the cross mark.

To vote for an individual candidate of another party after making a mark in the party square, mark a cross (X) opposite his or her name.

For an office where more than one candidate is to be elected, the voter after marking in the party square, may divide his or her vote by marking a cross (X) to the right of each candidate for whom he or she desires to vote. For such office votes shall not be counted for candidates not individually marked.

If you make a mistake, do not erase. Ask for a new ballot. Use only pencil or indelible pencil.

Menallen Friends Meeting
Flora Dale
Sabbath School at 10 a.m.; meeting for worship at 11 a.m.

Sunday School Lesson

By
Rev. Dr. Howard R. and Margaret C. Gold

SUNDAY SCHOOL LESSON
STRUGGLE IN THE WILDERNESS
Luke 4:1-15

Key Verse: You shall worship the Lord your God, and him only shall you serve. Luke 4:8.

When Jesus came to the Jordan and was baptized by John the Baptist, He was ready to face life's alternatives. Undoubtedly some of the questions He had been pondering over during the silent years at Nazareth came to a climax that brought clarity and certainty. The role of the Messiah was proclaimed by John; the Holy Spirit descended upon Him in the form of a dove; a voice from heaven declared His Sonship.

The spiritual crisis of the baptism and the temptation in the wilderness which followed immediately after were closely associated in the mind of Luke when he wrote his Gospel. The Sonship of Jesus which was publicly announced at His baptism was tested in the 40-day struggle in the wilderness. Into the lonely, desolate hill country rising abruptly from the Jordan valley, Jesus strode to prove to Himself and mankind that spiritual forces in any individual can overcome physical and mental desires.

On "Special Mission"
From His youth Jesus had known that His mission was a very special mission, one that would be misunderstood and condemned even by the religious leaders of the day. His conception of the Messiah's role was quite different from that of the Jews. They looked for a king who would restore Israel's prestige, such as David or Solomon. And because He knew the meaning of

the Kingdom, He came to establish. He must be the One to fulfill it. To face these issues fairly He sought the rocky gorges to fast and meditate upon His future work. There in the solitude He met the tempter and won a victory.

The human soul of the Man Jesus was the scene of inner conflict and this struggle could have taken place in one spot. We must not be influenced by artists' interpretations of Jesus resisting Satan as the latter stands ready to hurl Him from the pinnacle of the temple. Time or space or place was relatively unimportant. We know Jesus faced temptation as other men do. Too often Satan deceives by being so eminently respectable.

There is nothing evil in the impulse to satisfy physical hunger, or in depending upon the Providence of God to buoy you up, or in an honest desire to win men's esteem. But these seemingly harmless desires were the issues which caused our Lord's inner struggle. He did not argue with the tempter. His knowledge of the Scripture, innate wisdom, and values of personal religious experience helped Him

to settle the issues firmly. Personal Battles Hardest
Men's personal battles are usually the hardest. Laws may condition one's environment but they cannot give you power to resist temptation. Often temptation takes the form of trying to achieve right ends by wrong methods. Here is where man's power to determine right from wrong, and his power to resist the wrong comes in. Religious influences and complete faith in God provide the safe-guard needed when sorely tempted.

In each phase of Jesus' temptation the devil tried to compromise. He challenged the Lord's spirit. He used the word "If" "If thou art the Son of God, command this stone that it become bread"; "If thou therefore wilt worship before me, it shall all (the kingdoms of the world) be thine." Quiet, insidious, confusing! At the close Jesus said to the tempter, "It is said, thou shalt not make trial of the Lord thy God." So the devil "departed from him for a season."

The forty days in the wilderness was not the end of all temptations. Throughout Jesus' entire ministry

there were many occasions when the devil waited to break down Jesus' spiritual resources. Was He not sorely tempted that last evening as He prayed in Gethsemane? Why is the account of the temptation of Jesus included in each of the first three Gospels? The early church firmly believed that this account furnished "a criterion by which the character and claims of Jesus Christ can be contrasted with those of false prophets and false Christs, of whom there are many."

This experience of being tempted must have strengthened Jesus and given Him a greater awareness of the struggles confronting each and everyone. It made Him more eager to assume His responsibility — to turn back the forces of evil with a new Gospel of Salvation.

Based on outlines prepared by the Division of Christian Education of the National Council of Churches of Christ in the U.S.A. and used by permission.

Only 1796 per cent of Arizona land is privately owned, the rest being federal, state and Indian reservation lands.

These are the SCRUBS!

They're warming the bench today. But next year most of these boys will be "regulars"—a few will become stars. They're waiting their chance.

And don't think that they spend most of their time on the sidelines. They see plenty of action at every practice—they come up against the "varsity" in every scrimmage. They're getting ready for their chance.

Have you ever thought of your youngster as one of today's "scrubs"? He has his dreams and hopes; he's waiting his chance to realize every childish ambition.

Are you helping him to get ready for tomorrow's opportunity? Are you giving him the advantage of religious training in the Church?

Now, while your youngster knows life only as a fascinating game, the Church can teach him the rules, can guide him toward the right goals, can develop his spiritual and moral strength.

For the Church there is no substitute!

THE CHURCH FOR ALL... ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

Sunday	Philippians 3:12-16
Monday	1 Corinthians 9:22-27
Tuesday	Proverbs 15:25-33
Wednesday	1 Timothy 6:11-19
Thursday	Mark 7:24-30
Friday	Acts 9:1-6
Saturday	1 Corinthians 13:9-13

If you desire a schedule of readings for the year write to American Bible Society, Dept. U, 450 Park Ave., N. Y. 22, N. Y.

SUNDAY SCHOOL LESSON

STRUGGLE IN THE WILDERNESS

Luke 4:1-15

Key Verse: You shall worship the Lord your God, and him only shall you serve. Luke 4:8.

When Jesus came to the Jordan and was baptized by John the Baptist, He was ready to face life's alternatives. Undoubtedly some of the questions He had been pondering over during the silent years at Nazareth came to a climax that brought clarity and certainty. The role of the Messiah was proclaimed by John; the Holy Spirit descended upon Him in the form of a dove; a voice from heaven declared His Sonship.

The spiritual crisis of the baptism and the temptation in the wilderness which followed immediately after were closely associated in

the mind of Luke when he wrote his Gospel. The Sonship of Jesus which was publicly announced at His baptism was tested in the 40-day struggle in the wilderness. Into the lonely, desolate hill country rising abruptly from the Jordan valley, Jesus strode to prove to Himself and mankind that spiritual forces in any individual can overcome physical and mental desires.

On "Special Mission"

From His youth Jesus had known that His mission was a very special mission, one that would be misunderstood and condemned even by the religious leaders of the day. His conception of the Messiah's role was quite different from that of the Jews. They looked for a king who would restore Israel's prestige such as David or Solomon. And because He knew the meaning of

the Kingdom, He came to establish. He must be the One to fulfill it. To face these issues fairly He sought the rocky gorges to fast and meditate upon His future work. There in the solitude He met the tempter and won a victory.

The human soul of the Man Jesus was the scene of inner conflict and this struggle could have taken place in one spot. We must not be influenced by artists' interpretations of Jesus resisting Satan as the latter stands ready to hurl Him from the pinnacle of the temple. Time or space or place was relatively unimportant. We know Jesus faced temptation as other men do. Too often Satan deceives by being so eminently respectable. There is nothing evil in the impulse to satisfy physical hunger, or in depending upon the Providence of God to buoy you up, or in an honest desire to win men's esteem. But these seemingly harmless desires were the issues which caused our Lord's inner struggle. He did not argue with the tempter. His knowledge of the Scripture, innate wisdom, and values of personal religious experience helped Him

to settle the issues firmly.

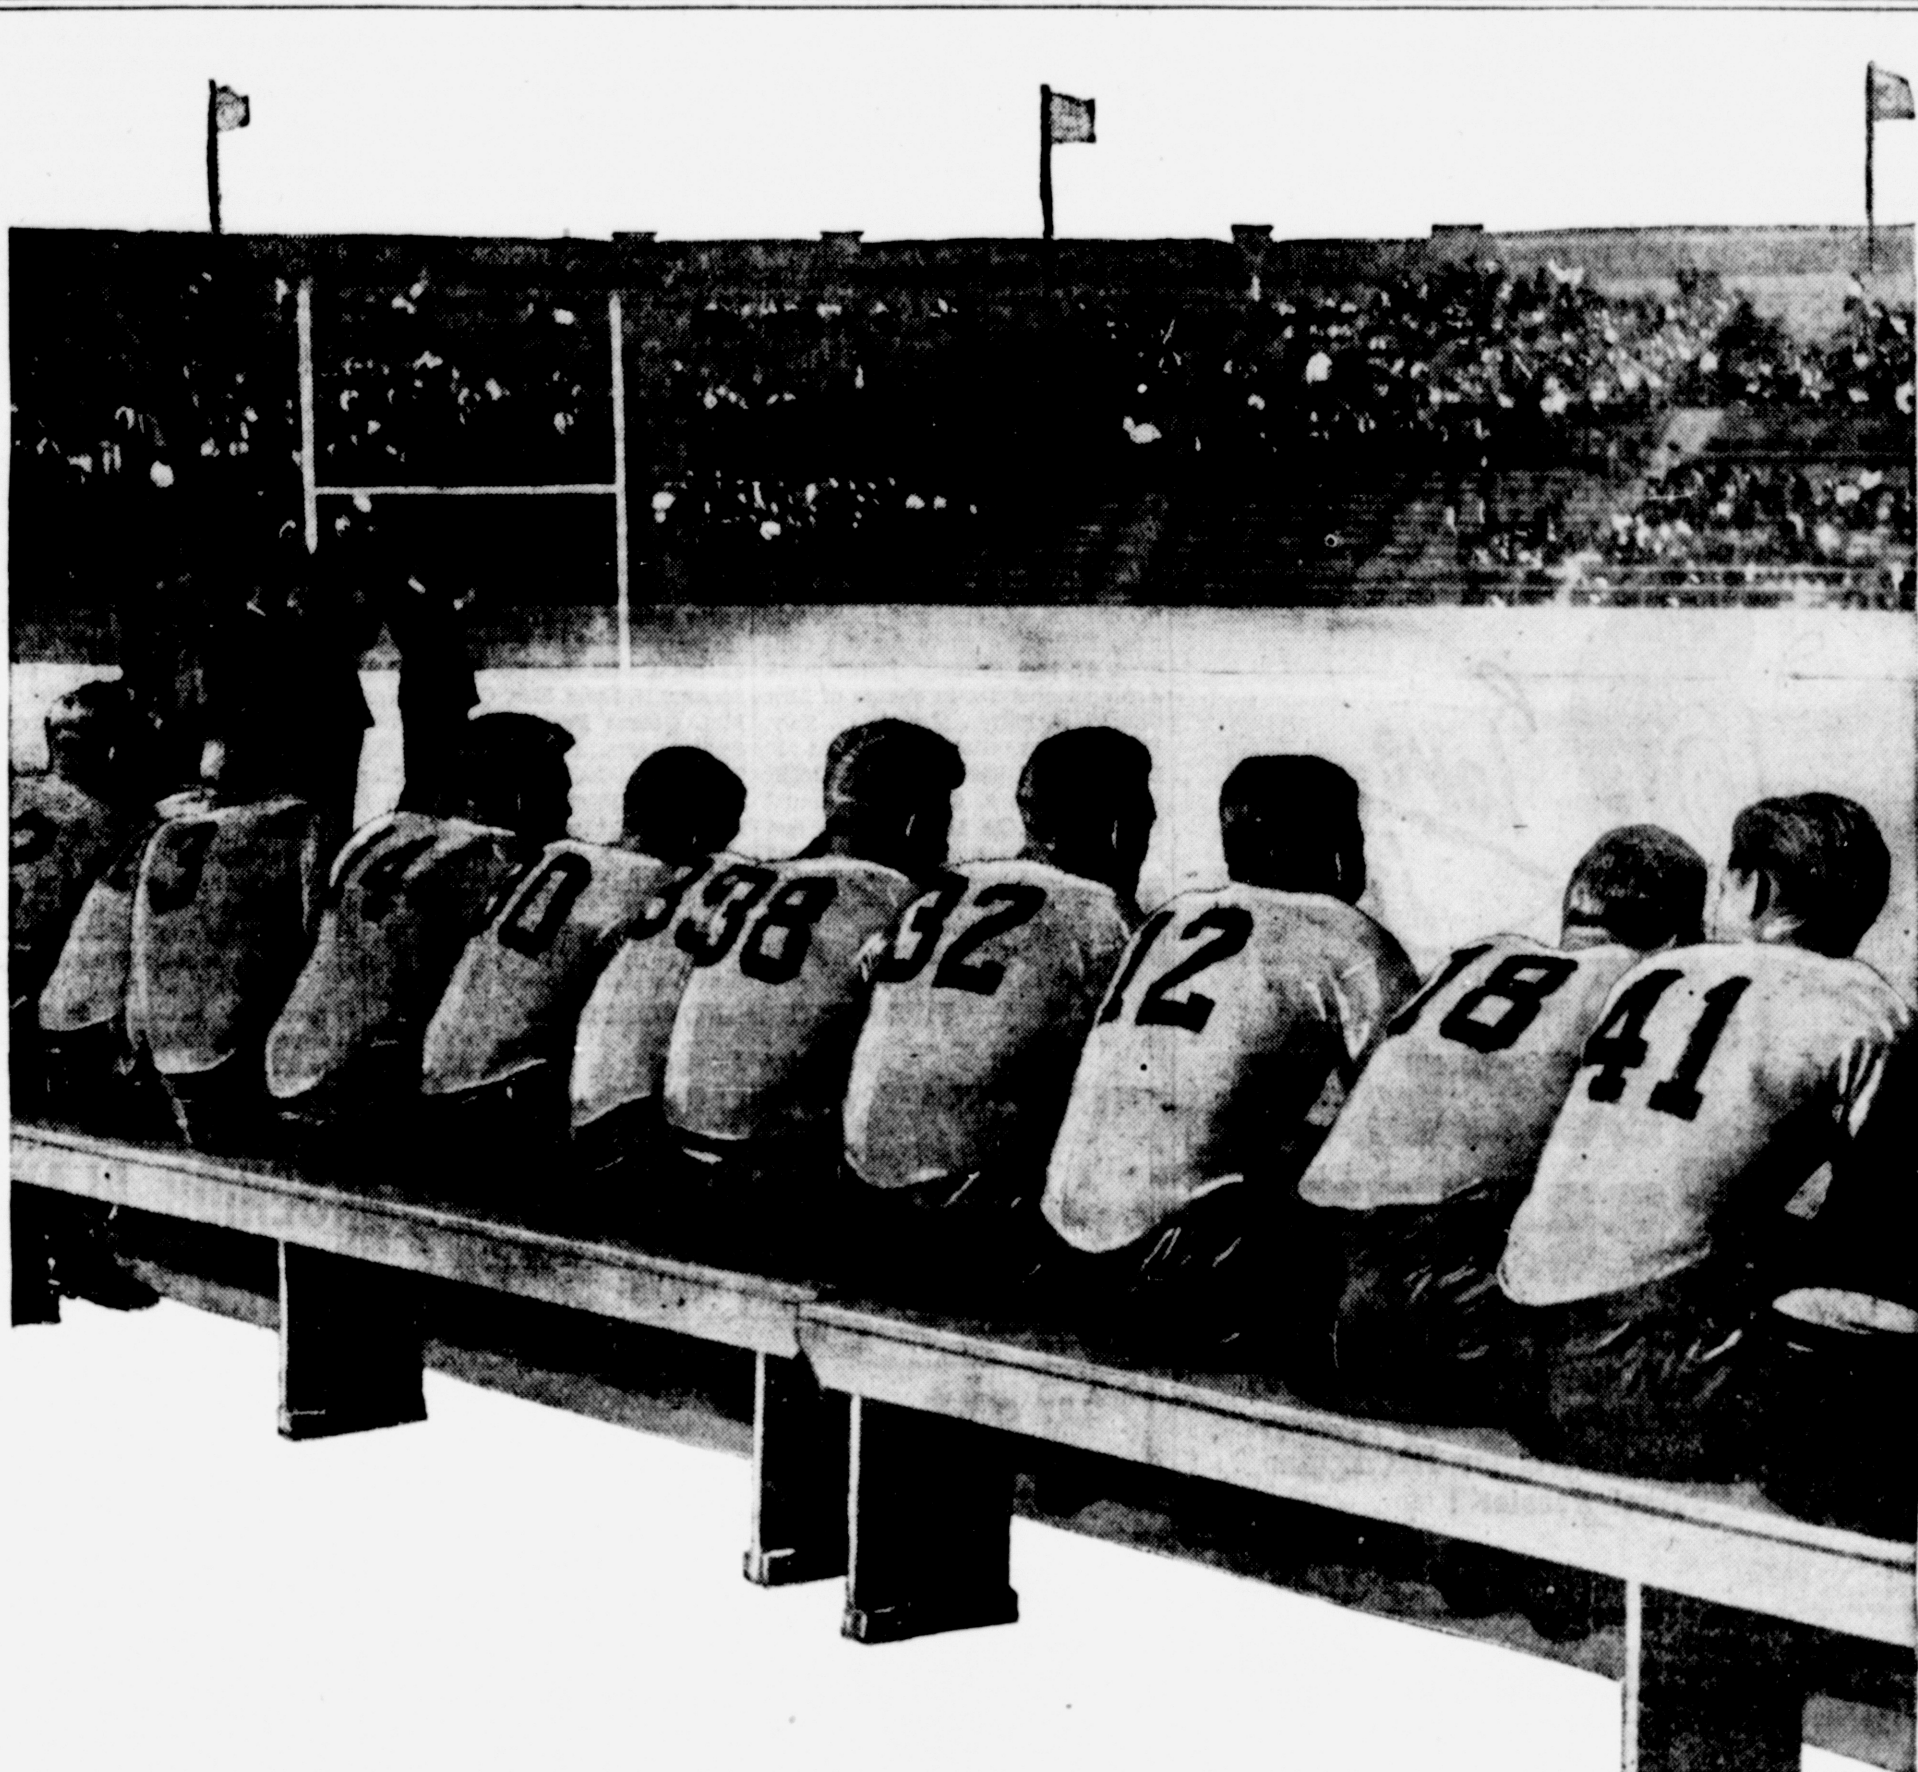

Personal Battles Hardest

Men's personal battles are usually the hardest. Laws may usually one's environment but they can not give you power to resist temptation. Often temptation takes the form of trying to achieve right ends by wrong methods. Here is where man's power to determine right from wrong, and his power to resist the wrong comes in. Religious influences and complete faith in God provide the safe-guards needed when sorely tempted.

In each phase of Jesus' temptation the devil tried to compromise. He challenged the Lord's spirit. He used the word "If": "If thou art the Son of God, command this stone that it become bread"; "If thou therefore wilt worship before me, it shall all (the kingdoms of the world) be thine." Quiet, insidious, confusing! At the close Jesus said to the tempter, "It is said, thou shalt not make trial of the Lord thy God." So the devil "departed from him for a season." The forty days in the wilderness was not the end of all temptations. Throughout Jesus' entire ministry

there were many occasions when the devil waited to break down Jesus' spiritual resources. Was He not sorely tempted that last evening as He prayed in Gethsemane? Why is the account of the temptation of Jesus included in each of the first three Gospels? The early church firmly believed that this account furnished "a criterion by which the character and claims of Jesus Christ can be contrasted with those of false prophets and false Christs, of whom there are many." This experience of being tempted must have strengthened Jesus and given Him a greater awareness of the struggles confronting each and everyone. It made Him more eager to assume His responsibility — to turn back the forces of evil with a new Gospel of Salvation. (Based on outlines prepared by the Division of Christian Education of the National Council of Churches of Christ in the U.S.A. and used by permission.)

Only 17.96 per cent of Arizona land is privately owned, the rest being federal, state and Indian reservation lands.

These are the SCRUBS!

They're warming the bench today. But next year most of these boys will be "regulars"—a few will become stars. They're waiting their chance.

And don't think that they spend most of their time on the sidelines. They see plenty of action at every practice—they come up against the "varsity" in every scrimmage. They're getting ready for their chance.

Have you ever thought of your youngster as one of today's "scrubs"? He has his dreams and hopes; he's waiting his chance to realize every childish ambition.

Are you helping him to get ready for tomorrow's opportunity? Are you giving him the advantage of religious training in the Church?

Now, while your youngster knows life only as a fascinating game, the Church can teach him the rules, can guide him toward the right goals, can develop his spiritual and moral strength.

For the Church there is no substitute!

THE CHURCH FOR ALL ... ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

Sunday ... Philippians 3:12-16
Monday ... 1 Corinthians 9:22-27
Tuesday ... Proverbs 15:26-33
Wednesday ... 1 Timothy 6:11-19

GERMAN LEADER
FREED BY REDS
AFTER 5 YEARS

CAMP FRIEDLAND, Germany (AP) — Leo Bauer, German Communist leader who befriended the Noel Field family, returned Thursday after five years of Soviet captivity.

Bauer, 43, was expelled from the party in 1950 and jailed as an alleged spy for the United States. At that time, he was editor-in-chief for the Communist East Berlin radio. Previously, he had headed the Communist deputies in the Hessian Parliament.

His name was on a letter to Mrs. Erika Glaser Wallach promising to help her find her missing foster father, Noel Field.

Sentenced To Death

She went to East Berlin to meet Bauer. Both were arrested. Bauer Thursday said he and Mrs. Wallach were sentenced to death for espionage in a joint trial in East Germany Dec. 28, 1953 — three years after they were arrested. Mrs. Wallach also has been released and is in Moscow.

Bauer told reporters East German Communist boss and Deputy Premier Walter Ulbricht used the Field case to "liquidate me."

"I had been in opposition to him since 1946. He regarded me as an enemy because I had spoken up against the Oder-Neisse border with Poland," he said.

Permanent Peace Border

Communist East Germany has agreed to make the Oder and Neisse rivers the "permanent peace border" with Poland, renouncing claim to German territories in the East annexed by Poland at the end of World War II.

Bauer said he became a friend of Noel Field and of Allen W. Dulles, then with the American Office of Strategic Services, while he was a refugee from Nazi Germany in Switzerland during the war.

"I don't want to have anything to do with communism any more," Bauer told reporters. "But I am still a Socialist."

Mrs. Wallach was the last of four members of the Field family to be released by the Russians.

Noel Field and his wife, Herta, were released last November from prison by Communist Hungary and asked for political asylum there. Hermann Field, Noel's brother, was freed in Poland last year and is now in England.

CEYLON JUNKET
FOR MARGARET
IN FEB. 1957

LONDON (AP) — A Buckingham Palace spokesman said Thursday Queen Elizabeth II has given her approval for Princess Margaret and the Queen Mother to visit Ceylon in February 1957. But there is no certainty they will make the trip.

This routine statement had the effect of throwing a mantle of confusion about the romance of Princess Margaret and Capt. Peter Townsend.

The first supposition—and it was only that—was that Princess Margaret would be following the round of her official functions even as far ahead as that date. That did not square with the equally unsupported assumption that the pretty 25-year-old princess might give up such activities if she and Townsend marry, as millions of Britons confidently believe.

Trip Not Certain

Nor was there any certainty that the princess and her mother would go to Ceylon. As is customary, the governor-general, Sir Oliver Goonetilleke, asked the Queen's formal approval for the visit, to coincide with a Colombo plan exhibition in the commonwealth country.

The palace spokesman said the Queen advised the governor general her mother and sister would have to make the final decision themselves on whether they would make the visit and asked him to write to them.

U.S. To Help Asians
In Atomic Training

SINGAPORE (AP) — The United States offered today to help set up an atomic reactor center in South and Southeast Asia for nuclear research and training under President Eisenhower's atoms-for-peace program.

Canada also announced at the ministerial conference of the Colombo Plan nations now under way here that she had agreed in principle to help India build an atomic reactor which will be "available for use of scientists from other countries."

The U.S. proposal, put forward by Dean B. Hollister, administrator of the U.S. foreign economic aid program, did not suggest any location for the reactor. But he said its primary purpose must be complete availability to all Colombo Plan countries on an equal basis.

Hollister said the United States would contribute funds for training the Asians, laboratory facilities and equipment, and particularly a "reactor suitable for research and training."

Tube In WGET, 1450 On Your Dial

COMMONWEALTH OF PENNSYLVANIA
MUNICIPAL ELECTION PROCLAMATION

We, the County Board of Elections of Adams County, Commonwealth of Pennsylvania, do hereby make known and give this notice to the electors of the county aforesaid, that an election will be held in said county of Adams

ON TUESDAY, NOVEMBER 8, 1955

It being the first Tuesday after the first Monday of November (the polls to be opened at 7 A. M., Eastern Standard Time, and to be closed at 8 P. M., Eastern Standard Time) at which time the electors of the County of Adams will vote by ballot for the following officers, namely:

- One person duly qualified for the office of Judge of the Court of Common Pleas.
- One person duly qualified for the office of Associate Judge.
- One person duly qualified for the office of District Attorney.
- One person duly qualified for the office of Prothonotary.
- One person duly qualified for the office of Register and Recorder.
- Three persons duly qualified for the office of County Commissioner.
- Three persons duly qualified for the office of Auditor.
- One person duly qualified for the office of Coroner.
- One person duly qualified for the office of County Surveyor.

Also the following Borough, Ward, and Precinct offices in the County are to be filled as set forth on the ballot for each respective Borough, Ward, and Precinct:

School Directors, Constables, Auditors, Justice of the Peace, Councilmen, Judge of Election, Inspector of Election.

Also the following Township and Precinct Offices are to be filled as set forth on the ballot for each respective Township and Precinct:

Supervisors, Justice of the Peace, Constables, Auditors, School Directors, Judge of Election, Inspector of Election.

To vote a straight party ticket, mark a cross (X) in the square, in the Party Column opposite the name of the party of your choice.

A cross mark in the square opposite the name of any candidate indicates a vote for that candidate.

To vote for a person whose name is not on the ballot, write or paste his or her name in the blank space provided for that purpose. This shall count as a vote without the cross mark.

To vote for an individual candidate of another party after making a mark in the party square, mark a cross (X) opposite his or her name.

For an office where more than one candidate is to be elected, the voter after marking in the party square, may divide his or her vote by marking a cross (X) to the right of each candidate for whom he or she desires to vote. For such office votes shall not be counted for candidates not individually marked.

If you make a mistake, do not erase. Ask for a new ballot. Use only pencil or indelible pencil.

PUPILS ATTAIN \$2,000 GOAL IN ANNUAL DRIVE

The Littlestown Junior-Senior High School students have concluded their annual magazine campaign by attaining the goal of \$2,000. The proceeds will go into the school music and athletic funds. Clara Rider, senior, was manager for the campaign. The co-champions for sales were David Crouse, Eighth grader, who received a camera with flash attachments and a photo-identification bracelet; Richard Mackley, Seventh grade, who received a radio and a photo-identification bracelet; James Patterson, Ninth grade, who received photo-identification bracelet. The high salesman for each day was given all the pennies he could grasp in one hand out of a jar filled with pennies. The largest number of "coppers" a student grasped was 73. The mystery number, drawn from the student body at the opening of the campaign, was Irene Hankey, who received \$10.

The captains from each grade were: Seniors, Carol Richter and Beverly Kunkle; Juniors, Edward Kunkle and Winifred Redding; Sophomores, Shirley Hoff and Judy Ruggles; Freshmen, Martha Selwell and Michael Collins; Eighth Grade, Edward Leister and Laura Bowers; Seventh Grade, Grizelda Hahn, Larry Unger and Ruth Myers.

Paul E. King, supervising principal of the school; Lloyd Stavey and Frank E. Basehoar, administrative assistants, attended the meeting of the Adams County Schoolmen's Group held at the Gettysburg College cottage at Laurel Lake Wednesday evening.

The Littlestown High School Band recently elected the following officers: President, Fay Fissel; vice president, Suzi Long; secretary-treasurer, Nadine Crouse; librarians, Anne Karns, Leonard Potter, and Susie Blocher; managers, Fred Miller, Albert Snyder and Tony Maitland.

Future events at the school include: Tonight, 8:15 o'clock, football game with Kennard Dale on Memorial Field; Tuesday, 8 p.m., meeting of the Athletic Council at the high school; Wednesday afternoon weekly assembly, home room program, William Penn observance; Friday, Oct. 28, football game, Red Lion, away; Monday, Oct. 31, 2:30 p.m., special assembly with Melvin Ehrin.

SENIOR PLAY NOVEMBER 10

The annual Littlestown High School Senior Class play, "Oh, Father," will be presented on Thursday, Nov. 10, at 8 p.m., in the school auditorium. Miss LeOra L. Held, director, today announced the following cast: Suzanne Long, Lorraine Snyder, Nancy Slusser, Carol Richter, Susan Baumgardner, Kathryn Strevig, Clara Rider, Fay Fissel, Joyce Brown, Barbara Brown and Stanley Mummert. Promoters will be Anne Karns and Marybel Marshman. The publicity and ticket committee includes: Lois Shull, Shirley Fesser, Nadine Crouse and Beverly Kunkle.

The Senior Class will hold a food

sale on Nov. 4 at 4 p.m. in the engine house.

The counselors, officers, commission and committee chairmen of the Senior High Youth Fellowship and the Junior High Youth Fellowship of Redeemer's Reformed Church will hold a retreat Saturday afternoon at the Reagle Cottage, near East Berlin. The group will leave from the church at 2 p.m. Each person is asked to take a bag lunch and a beverage. The group will plan programs for the winter meetings.

Brownie Girl Scout Troop No. 51 will go on a hike on Saturday leaving at 10 a.m. from the engine house. Each girl is asked to take a wiener and a paper cup.

The Littlestown Girl Scout troop committee members, leaders and assistant leaders of Girl Scouts and Brownies will meet Oct. 26 at 7:30 p.m. at the engine house. Refreshments will be served by the leaders of troop 43, Mrs. Kenneth K. Kohn, Mrs. Robert H. Miller and Mrs. E. Paul Bigelow.

VOTE \$30 TO SCHOOL GROUP

The Littlestown Lions Club voted a contribution of \$30 to the Art Department of the Littlestown High School to be used for the Halloween decorating contest, at a meeting of the club directors Thursday evening. Students will paint decorations on the windows of community stores. Prizes will be awarded.

Tickets for the District 14-C Ladies' Night dinner meeting in the playground auditorium, North York, may be secured from Secretary Chester S. Byers.

The dinner meeting in St. John's Lutheran Church social hall preceded the directors session. A movie on sale was shown. President Monroe J. Stavey announced that there will be a public education meeting in the Gettysburg High School auditorium on Tuesday, Nov. 1, which several club members will attend.

The Lions will meet again Nov. 3 at 7 p.m. at St. John's when the program will be in charge of John H. Kiley and John W. LeGore. The Ladies' Auxiliary of the Eagles will hold a public party December 2 at the Eagles home according to plans made at a meeting Wednesday evening.

Mrs. Learna Bowman, president, presided. Mrs. Genevieve Hood was appointed to purchase a birthday gift for the unit's foundation boy. Plans were discussed for the fourth anniversary banquet to be held in the near future. The guest package, given by Ethel Rmel, was received by Mrs. Helen Weaver. A report was heard from Mrs. Betty Hankey, secretary. Refreshments were served by Mrs. Clara Jacoby and Mrs. Mabel Rittase. Members attended the meeting in Halloween costume. The next meeting will be held November 2.

The quarterly meeting of the Conewago Deacons' Council of the NCCW will be held at 2 p.m. Sunday at Immaculate Heart of Mary Parish, Abbottstown. Rev. Louis S. Dougherty will speak.

"MISS WORLD"

LONDON (AP)—Susana Djuim, a tall brunette model from Caracas, today wore the crown of "Miss World," a title that covers a lot of territory.

Wearing a bathing suit that did not cover so much, the 19-year-old Venezuelan beauty won the title in competition with 20 other

FINE BUSINESS PREDICTED FOR MONTHS AHEAD

HOT SPRINGS, Va. (AP)—Top-ranking industrialists today forecast high-level business activity extending well into 1956 at least.

Several members of the Business Advisory Council, beginning a two-day, closed-door conference here with Secretary of Commerce Weeks, told reporters they expect no economic sinking spell to result from President Eisenhower's illness.

While avoiding quotation on the question, because of its political aspects, most of the industry men interviewed discounted "loss of confidence" as a factor which might produce a setback in business or employment.

Good Xmas Buying

Most council members expect an unprecedented Christmas buying season and profess to see no reason for a subsequent letdown, in view of three significant third-quarter figures released Wednesday by the President's Council of Economic Advisors. Personal income climbed to a rate of 306 billion dollars annually, consumer spending rose to a 256 billion rate and total production went to 392 billion—each a record.

The towering total of consumer

Nixon Says Labor Hits Highest Mark

NEW YORK (AP)—Vice President Nixon says "American wage earners Thursday have more jobs at higher wages, with greater purchasing power and less strikes than at any time in history."

"And they have peace to boot," he adds.

Nixon credited this to the Eisenhower administration—and what he called its "dynamic conservatism"—in a speech Wednesday night at the 25th annual dinner of the New York group of the Investment Bankers Assn. of America.

The vice president answered what he said was an opposition effort to give the administration the political "kiss of death" by pinning "the business label" on it.

credit appeared to be a major concern of the council, however. Members hoped to get answers here on two aspects of that problem—first, whether the installment buying binge is an inflationary hazard and second whether the administration's efforts to curb credit inflation have gone so far as to be a possible depressant on business.

The council has been advising the secretary of commerce under both Democratic and Republican administrations for the last 22 years.

ADVERTISE IN THE TIMES

ACCUSE WORKER OF MURDER IN NUMBERS' CASE

TOWSON, Md. (AP)—An auto plant worker was charged with murder today and an Army sergeant and a waitress were accused of being accessories in the slaying of John I. Adams, key figure in a six-million-dollar numbers raid.

Baltimore County police said the 39-year-old victim was strangled for his money and that the murder weapon apparently was a "woman's stocking."

They said they had located the \$1,000 Adams reportedly was carrying when he disappeared a week ago last night.

Police Chief Hamilton R. Atkinson said Pedro Finley Grooms, 33-year-old auto plant worker, was charged with the murder.

Former Student

Atkinson said Helen Jefferson, 30, and Sgt. Robert Palmer, stationed at Ft. Holabird, were charged with "being accessories after the fact to the murder."

Palmer was identified as a former UCLA premedical student who has a wife and children in Texas.

The defendants and the victim were Negroes.

Adams was one of six arrested

Trust Business Is Near Golden Future

LANCASTER, Pa. (AP)—A New York advertising executive said Thursday the trust business in America is on the threshold of "golden years" through reaching a greater number of persons than ever before.

"Trust business today is no longer a service only for persons of wealth," said John F. Donlon, executive vice president for Edwin Bird Wilson, Inc.

"Trust institutions have brought their services within the reach of many more people in the last decade through more economical operating procedures and improved administrative techniques."

Donlon spoke before 200 Pennsylvania bankers attending the opening session of the Pennsylvania Banking Assn. Trust School.

SENT TO HOSPITAL

WILKES-BARRE, Pa. (AP)—Mrs. Ruth Christman, 53, accused of the slaying of her husband June 9 in their Sugarloaf Twp farm home, has been ordered committed to the Danville State Hospital.

Sept 28 when state police raided an establishment at Turner Station. They said the place was headquarters for a six-million-dollar-a-year numbers ring operating in the Baltimore metropolitan area.

TAX CASE FACES ANDREWS FIRM

WASHINGTON (AP)—The Washington Post & Times Herald says a tax deficiency case now involving \$1.2 million dollars has been pending three years against the firm which outgunning Revenue Commissioner T. Coleman Andrews will head.

The paper quoted Andrews, however, that he knows little about the case and will have no further connection with it "out of an abundance of caution." He outlined the situation in a letter to Secretary of the Treasury Humphrey Oct. 10, five days before he announced his resignation.

Andrews announced Saturday he is resigning at the end of this month to become chairman of the board and chief executive officer of American Fidelity & Casualty Co., with headquarters in his home town of Richmond, Va.

Filed Before Andrews

The paper said the notice of alleged tax deficiency was filed against that firm and its affiliate, Market Services, Inc., a year before Andrews became revenue commissioner.

The case is pending in U. S. Tax Court, where attorneys for the company contend the firms have overpaid, rather than underpaid, taxes for the questioned years 1944-49. An attorney said the dispute involves technical interpretations of insurance accounting.

NORTH HOLLYWOOD, Calif. (AP)

Funeral services will be conducted privately in a mortuary here tomorrow for actor John Hodiak, who died of a heart attack Wednesday. He was 41.

FINE BUSINESS PREDICTED FOR MONTHS AHEAD

HOT SPRINGS, Va. (AP)—Top-ranking industrialists today forecast high-level business activity extending well into 1956 at least.

Several members of the Business Advisory Council, beginning a two-day, closed-door conference here with Secretary of Commerce Weeks, told reporters they expect no economic sinking spell to result from President Eisenhower's illness.

While avoiding quotation on the question, because of its political aspects, most of the industry men interviewed discounted "loss of confidence" as a factor which might produce a setback in business or employment.

Good Xmas Buying
Most council members expect an unprecedented Christmas buying season and profess to see no reason for a subsequent letdown, in view of three significant third-quarter figures released Wednesday by the President's Council of Economic Advisers. Personal income climbed to a rate of 306 billion dollars annually, consumer spending rose to a 256 billion rate and total production went to 392 billion—each a record.

The towering total of consumer

Nixon Says Labor Hits Highest Mark

NEW YORK (AP)—Vice President Nixon says "American wage earners Thursday have more jobs at higher wages, with greater purchasing power and less strikes than at any time in history."

"And they have peace to boot," he adds.

Nixon credited this to the Eisenhower administration—and what he called its "dynamic conservatism"—in a speech Wednesday night at the 25th annual dinner of the New York group of the Investment Bankers Assn. of America.

The vice president answered what he said was an opposition effort to give the administration the political "kiss of death" by pinning "the business label" on it.

credit appeared to be a major concern of the council, however. Members hoped to get answers here on two aspects of that problem—first, whether the installment buying binge is an inflationary hazard and second whether the administration's efforts to curb credit inflation have gone so far as to be a possible depressant on business.

The council has been advising the secretary of commerce under both Democratic and Republican administrations for the last 22 years.

ADVERTISE IN THE TIMES

ACCUSE WORKER OF MURDER IN NUMBERS' CASE

TOWSON, Md. (AP)—An auto plant worker was charged with murder today and an Army sergeant and a waitress were accused of being accessories in the slaying of John I. Adams, key figure in a six-million-dollar numbers raid.

Baltimore County police said the 39-year-old victim was strangled for his money and that the murder weapon apparently was a "woman's stocking."

They said they had located the \$1,000 Adams reportedly was carrying when he disappeared a week ago last night.

Police Chief Hamilton R. Atkinson said Pedro Finley Crooms, 33-year-old auto plant worker, was charged with the murder.

Former Student
Atkinson said Helen Jefferson, 30, and Sgt. Robert Palmer, stationed at Ft. Holabird, were charged with "being accessories after the fact to the murder."

Palmer was identified as a former UCLA premedical student who has a wife and children in Texas.

The defendants and the victim were Negroes.

Adams was one of six arrested

Trust Business Is Near Golden Future

LANCASTER, Pa. (AP)—A New York advertising executive said Thursday the trust business in America is on the threshold of "golden years" through reaching a greater number of persons than ever before.

"Trust business today is no longer a service only for persons of wealth," said John F. Donlon, executive vice president for Edwin Bird Wilson, Inc.

"Trust institutions have brought their services within the reach of many more people in the last decade through more economical operating procedures and improved administrative techniques."

Donlon spoke before 200 Pennsylvania bankers attending the opening session of the Pennsylvania Banking Assn. Trust School.

SENT TO HOSPITAL

WILKES-BARRE, Pa. (AP)—Mrs. Ruth Christman, 53, accused of the slaying of her husband June 9 in their Sugarloaf Twp. farm home, has been ordered committed to the Danville State Hospital.

Sept. 28 when state police raided an establishment at Turner Station. They said the place was headquarters for a six-million-dollar-a-year numbers ring operating in the Baltimore metropolitan area.

ADVERTISE IN THE TIMES

TAX CASE FACES ANDREWS FIRM

WASHINGTON (AP)—The Washington Post & Times Herald says a tax deficiency case now involving 5½ million dollars has been pending three years against the firm which outgrowing Revenue Commissioner T. Coleman Andrews will head.

The paper quoted Andrews, however, that he knows little about the case and will have no further connection with it "out of an abundance of caution." He outlined the situation in a letter to Secretary of the Treasury Humphrey Oct. 10, five days before he announced his resignation.

Andrews announced Saturday he is resigning at the end of this month to become chairman of the board and chief executive officer of American Fidelity & Casualty Co., with headquarters in his home town of Richmond, Va.

Filed Before Andrews
The paper said the notice of alleged tax deficiency was filed against that firm and its affiliate, Market Services, Inc., a year before Andrews became revenue commissioner.

The case is pending in U. S. Tax Court, where attorneys for the company contend the firms have overpaid, rather than underpaid, taxes for the questioned years 1944-49. An attorney said the dispute involves technical interpretations of insurance accounting.

NORTH HOLLYWOOD, Calif. (AP)

Funeral services will be conducted privately in a mortuary here tomorrow for actor John Hodiak, who died of a heart attack Wednesday. He was 41.

News Items From Littlestown

REV. W. C. KARNIS IS SPEAKER AT CHRIST CHURCH

The Rev. William C. Karnis, pastor of St. John's Lutheran Church, will deliver the sermon at the union vesper service on Sunday at 7:30 p.m. in Christ Evangelical and Reformed Church. The worship will be in charge of the host pastor, the Rev. G. Howard Koons. Rev. Karnis will speak on the subject "Meet Simon the Magician."

The union vesper service on Sunday, Oct. 30, will be held in St. Luke's Union Church, near White Hall, with the Rev. Joseph Wood, pastor of Centenary Methodist Church, presenting the message. Vespers are sponsored by the Littlestown Ministerium.

Announcements made by pastors of the churches of Littlestown and vicinity for the weekend and coming week include:

Grace Lutheran Church, Two Taverns. Rev. Oscar E. Feeman, pastor. Sunday, 9 a.m., worship service, sermon by the pastor; 10 a.m., Sunday School; 10:15 a.m., choir rehearsal. Thursday, 7:30 p.m., monthly meeting of the Sunshine Sunday School Class at the home of Mrs. Kenneth Stair, near town, and all members are asked to attend in costume. Tuesday, Nov. 8, 4 p.m., annual Election Day roast turkey and oyster supper in the parish hall. November 18, annual father and son banquet.

St. Luke's Lutheran Church, near

White Hall, Rev. Oscar E. Feeman, pastor. Tonight, 7:30 o'clock, monthly meeting of the Women's Missionary Society at the church. Mrs. Parr R. Breighner, leader. Saturday, 4 p.m., roast beef supper, family style, in the parish hall, sponsored by the Men's Bible Class. Sunday, 8 a.m., Sunday School; 10:15 a.m., worship service; 7 p.m., Young People's Society meeting at the church. Tuesday, 8 p.m., annual public Halloween party, in the parish hall, sponsored by the Ladies' Aid Society, with entertainment, prizes and refreshments. The arrangement committee includes Mrs. Junior Blithe, Mrs. Glenn Whisler, Mrs. Garland Leatherman, Mrs. Robert Dayhoff, Mrs. Howard Cook, Mrs. Fred Hartlaub, Mrs. Merle Blithe, Mrs. Rodney Ernst, Mrs. Melvin Good and Miss Frances Rucker. Sunday, Oct. 30, 7:30 p.m., union vesper service. November 12, public supper. Saturday, Oct. 22, 10 a.m., meeting of St. James' and St. Luke's confirmation class at St. Luke's Church.

Robert Snyder and Mrs. William R. Keefe in charge of arrangements; 7:30 p.m., Halloween party for the children of the Primary Department. Arrangements are in charge of Mrs. Charles E. Ritter, Mrs. A. G. Ealy, Mrs. Robert Gitt, Mrs. Fred P. Blocher and Mrs. David Shildt. Monday, Nov. 7, 6:30 p.m., annual banquet for the Loyalty class and the Men's Class. The pastor and

PUPILS ATTAIN \$2,000 GOAL IN ANNUAL DRIVE

The Littlestown Junior-Senior High School students have concluded their annual magazine campaign by attaining the goal of \$2,000. The proceeds will go into the school music and athletic funds.

Clara Rider, senior, was manager for the campaign. The co-champions for sales were David Crouse, Eighth grader, who received a camera with flash attachments and a photo-identification bracelet; Richard Mackley, Seventh grade, who received a radio and a photo-identification bracelet; James Patterson, Ninth grade, who received photo-identification bracelet. The high salesman for each day was given all the pennies he could grasp in one hand out of a jar filled with pennies. The largest number of "coppers" a student grasped was 149 and the smallest number was 73. The mystery personality, drawn from the student body at the opening of the campaign, was Irene Hankey, who received \$10.

The captains from each grade were: Seniors, Carol Richter and Beverly Kunkle; Juniors, Edward King and Winifred Redding; Sophomores, Shirley Hoff and Judy Ruggles; Freshmen, Martha Seiwel and Michael Collins; Eighth Grade, Edward Leister and Laura Bowers; Seventh Grade, Grizelda Hahn, Larry Unger and Ruth Myers.

Paul E. King, supervising principal of the school; Lloyd Staveland and Frank E. Basehoar, administrative assistants, attended the meeting of the Adams County Schoolmen's Group held at the Gettysburg College cottage at Laurel Lake Wednesday evening.

The Littlestown High School Band recently elected the following officers: President, Pay Fissel; vice president, Suzi Long; secretary-treasurer, Nadine Crouse; librarians, Anne Karnis, Leonard Potter, and Susie Blocher; managers, Fred Miller, Albert Snyder and Tony Maitland.

Future events at the school include: Tonight, 8:15 o'clock, football game with Kennard Dale on Memorial Field; Tuesday, 8 p.m., meeting of the Athletic Council at the high school; Wednesday afternoon weekly assembly, home room program, William Penn observance; Friday, Oct. 28, football game, Red Lion, away; Monday, Oct. 31, 2:30 p.m., special assembly with Melvin Ehrin.

VOTE \$30 TO SCHOOL GROUP

The Littlestown Lions Club voted a contribution of \$30 to the Art Department of the Littlestown High School to be used for the Halloween decorating contest, at a meeting of the club directors Thursday evening. Students will paint decorations on the windows of community stores. Prizes will be awarded.

Tickets for the District 14-C Ladies' Night dinner meeting in the playground auditorium, North York, may be secured from Secretary Chester S. Byers.

The dinner meeting in St. John's Lutheran Church social hall preceded the directors session. A movie on salt was shown. President Monroe J. Staveland announced that there will be a public education meeting in the Gettysburg High School auditorium on Tuesday, Nov. 1, which several club members will attend.

The Lions will meet again Nov. 3 at 7 p.m. at St. John's when the program will be in charge of John H. Faley and John W. LeGore.

The Ladies' Auxiliary of the Eagles will hold a public party December 2 at the Eagles home according to plans made at a meeting Wednesday evening.

Mrs. Learma Bowman, president, presided. Mrs. Genevieve Hood was appointed to purchase a birthday gift for the unit's foundation boy. Plans were discussed for the fourth anniversary banquet to be held in the near future. The guest package, given by Ethel Rimeel, was received by Mrs. Helen Weaver. A report was heard from Mrs. Betty Hankey, secretary. Refreshments were served by Mrs. Clara Jacoby and Mrs. Mabel Rittase. Members attended the meeting in Halloween costume. The next meeting will be held November 2.

The quarterly meeting of the Conewago Deaneary Council of the NCCW will be held at 2 p.m. Sunday at Immaculate Heart of Mary Parish, Abbotstown. Rev. Louis S. Dougherty will speak.

LEADER CALLS SENATORS 'BAND OF WILFUL MEN'

UNIONTOWN, Pa. (P)—The 26 Republican state senators who defeated him classified income tax proposal are a "band of wilful men," says Gov. Leader.

He spoke Wednesday night before 1,300 at the annual Fayette County Democratic dinner.

"The Republicans say to cut 131 million dollars from the budget. But they want to cut out the industrial development program, cut out mental health, cut out the program for crippled and handicapped children. These things should be above partisan politics," Leader declared.

No Party Politics

Referring to the industrial development program, Leader said: "I am not going to play partisan politics with putting bread and butter into the mouths of the children of working people in this state and

I don't think the Republicans will either."

He added: "I make no apologies, I am proud of what we are doing in Harrisburg. There is hope in Pennsylvania, there is hope in America. And that hope is the Democratic party because it is the party that thinks of the human being first instead of dollars."

NOBEL PRIZE IS AWARDED SWEDEN

STOCKHOLM, Sweden (P)—The 1955 Nobel prize in medicine was awarded Thursday to Dr. Hugo Theorell, a Swedish biochemist, "for his discoveries concerning the nature and mode of action of oxidation enzymes."

He will receive a record Nobel cash award equal to \$36,720.85 along with his Nobel insignia from King Gustaf VI Adolf at ceremonies here Dec. 16. The money comes from a nine-million-dollar foundation established by the will of Alfred Nobel, inventor of dynamite.

The Swedish Academy of Liter-

Emmitsburg

School will be closed today and Friday so that teachers may attend the three-day eighty-eighth annual convention of the Maryland State Teachers' Association, to be held in the Fifth Regiment Armory, Baltimore, Md.

The Honorable G. Mennen Williams, governor of Michigan, will keynote the initial gathering with an address, "Education—The Key To America's Future." Other highlights of the convention will be a concert given by the All Maryland High School Chorus. Members are allotted each school on the basis of enrollment, Emmitsburg High having two representatives, Leslie Greger, first bass, and Lois Linn, first alto. The guest choral conductor is Helen Hosmer, director of Crane Department of Music, State University Teachers' College, Potsdam, New York.

The Tom's Creek Methodist Church has planned an oyster and turkey supper to be held in the social rooms of the church on Saturday, Nov. 5. Food will be served family style.

George Wivell, Baltimore, and John Wivell, Walkersville, spent Sunday with their parents, Mr. and Mrs. William Wivell.

Mrs. Edward Selzer, St. Anthony's remains seriously ill at the Frederick Memorial Hospital.

Dr. Forbes Burgess, county health officer, announced this week that second inoculations for polio will be given in Frederick County beginning on Nov. 8. Vaccine will be available to present second and third grade children; however it will be necessary for parents to sign new request slips and return them to the schools at once, since no child will receive the vaccine unless the parental request slip is signed.

On Tuesday afternoon, Nov. 3, Dr. Williams and his staff will be at the Emmitsburg Public School, and on Wednesday morning at St. Anthony's and St. Euphemia's. Morning clinics 9:30 to 12, afternoon clinics 1 to 3:30 p.m.

Chief of Police Daniel H. Kaas has returned from the Warner Hospital, Gettysburg.

The following were received in to the Elias Evangelical Lutheran Church at the sacrament of baptism, Sunday, Oct. 16: Michael Edward Olinger, son of Mr. and Mrs. Charles E. Olinger; William

ature will choose the literary prize winner Oct. 27. Physics and chemistry winners will be selected by the Swedish Academy of Science Nov. 2. A committee from the Norwegian Parliament selects the peace prize winner.

FRIENDS SUPPORT MRS. M. KNOWLES

PHILADELPHIA (P)—The representative meeting of the Philadelphia Religious Society of Friends (Quakers) has authorized the collection of funds to aid in the legal defense of Mrs. Mary Knowles, a librarian who refused to testify about alleged Communist affiliations before a congressional committee.

Mrs. Knowles is librarian of the William Jeanes Memorial Library under the care of the Plymouth Monthly Meeting of Friends, outside Norristown.

The library was given a \$5,000 check by the Fund of the Republic, a research group created by the Ford Foundation, for retaining Mrs. Knowles in its employ after she refused to answer questions.

"The Messenger," a publication of the Philadelphia Yearly Meeting of Friends, said Mrs. Knowles "is under heavy legal expense in maintaining her civil rights and liberties" and asked Quakers to contribute aid "while her case is still under investigation."

Thomas Umbel, son of Mr. and Mrs. William H. Umbel; Edward Patrick and Donald Thomas, sons of Mr. and Mrs. Edward L. Schratwieser.

The annual Harvest Festival ham and oyster supper for the benefit of Elias Evangelical Lutheran will be held in the Parish House on Saturday. Suppers will be served from 4 o'clock family style.

The Luther League will sponsor a roast turkey banquet for all people of the parish Wednesday evening, Oct. 26, at 6 o'clock. There will be no charge for the banquet which is open to all youths of the congregation from 12 to 22 years of age. Guest speakers will be Paul McKay, president of the Maryland Synod Youth League, and Larry Cameron, vice president of the Synod League. Mothers of leaguers and adult advisors will help with the banquet and with the program.

Members of Elias Lutheran Church Council will attend the Maryland Synod Councilmen's supper meetings at Frederick Oct. 26, and Waynesboro, on Oct. 27, 1955.

Dr. W. R. Cadie was elected president of the Emmitsburg Little League at the special meeting on Tuesday evening at the Fire House. Other officers elected included: Thomas Bollinger, vice president; J. Edward Houck, treasurer; John J. Dillon, secretary; John White, player representative; Allen Bouey, umpire in chief; and Thomas Saylor, chief scorer. Officers of the league voted to secure a franchise in the National Little League organization. Guests at the meeting were Kirby Whittle and Ham Spalding of Thurmont, who explained operation of their league.

Farmers in the United States use more than 60 per cent of the world's tractors.

LEADER MEETING STATE LEADERS

HARRISBURG (P)—Gov. Leader will make a three-day trip next week to compile first hand information on what is needed for his "top priority" industrial development program in Pennsylvania.

Leader will meet with government, business, industry and labor leaders in Wilkes-Barre on Monday, Erie on Tuesday and Johnstown on Wednesday.

The Wilkes-Barre meeting will encompass a 19-county region, Erie seven counties and Johnstown 20 counties.

"I have given economic development and particularly industrial development a top priority in the program of my administration," the governor said in a statement Wednesday, adding:

"It is my purpose to marshal all of the pertinent services and facilities of our state government to create new jobs, new business opportunities, new payrolls and profits."

Leader said he would be accom-

Photographer Makes Hit With Physician

LOUISVILLE, Ky. (P)—Photographer Charlie Pence was going about the routine of taking pictures and getting names at an engagement cocktail at the home of a physician.

While he was finishing the assignment, the doctor walked up, put his hand on Pence's shoulder and said:

"You've been so nice to us I want to do something for you ... so I'm giving you a due-bill for an appendectomy."

panied to the conferences by Secretary of Commerce William R. Davlin, and Secretary of Labor and Industry John R. Torquato.

The meetings were viewed as a means of drumming up sentiment in behalf of administration-backed legislation to create a state industrial development authority with an appropriation of 20 million dollars to create industrial sites and attract new industry to economically distressed areas of the state.

Stilbestrol-Fed Farm Animals Yield Fine Meat, Says Zettle

By FRANK S. ZETTLE
Adams County Farm Agent

Preliminary results in test feeding of stilbestrol to beef steers at the Agricultural Research Center, Beltsville, Md., confirm previous findings that the hormone-like chemical can increase rate of gain without adverse effect on meat quality.

The Beltsville experiments were undertaken last May following widespread reports that using stilbestrol as a growth stimulant for feed-lot animals resulted in poor-quality carcasses. No evidence supporting such reports has been found so far in the limited tests at Beltsville, nor in stilbestrol-feeding studies at other agricultural experiment stations.

A 90-day feeding test, using 10 Hereford and crossbred Angus-Hereford steers with starting weights averaging about 900 pounds, has been completed. Five of these animals were fed stilbestrol in a mixed-protein feed at the approved rate—10 milligrams per day per animal, for steers weighing not less than 600 pounds. The other five animals were used as controls.

The steers on stilbestrol gained an average of about 1/4 pound a day more than the controls in this 3-month test. This amounts to a gaining-rate advantage of approximately 6 per cent in favor of the cattle receiving stilbestrol.

At slaughter, both lots of these steers had live and carcass grades of low choice. Separation of fat and lean meat showed that the control group, which received no stilbestrol, was slightly fatter. This finding agrees with results obtained by state experiment stations, which have increased lean rather than fat.

In other respects, there was no significant difference between meat

Mack Truck Strikes End With Increases

NEW YORK (AP)—A one-day strike at four Mack Trucks Inc. manufacturing plants in New Jersey and Pennsylvania ended Wednesday night in agreement on a three-year contract providing wage increases and other benefits.

The settlement came after marathon negotiations starting Monday morning between management representatives and officials of the CIO United Auto Workers Union.

Affected are 6,000 workers at plants in Plainfield, New Brunswick and Bridgewater Township in New Jersey and one at Allentown, Pa.

The union, which set up picket lines yesterday, has promised its members will be on the job today.

heifers off pasture and into their quarters for the winter. So right now would be a mighty good time for you to do some checking on their growth. Because many pastures in Adams County did not produce as well this year, the heifers may not have fared perfectly all the way. You can check their growth with a cloth measuring tape, and see whether they're of normal size for their age.

Here's how to go about it. Measure around the smallest part of the heart girth, just back of the forelegs, and the height at the point of the shoulders. Then compare these measurements with those found on a growth chart for your particular breed of cow. You can get a growth measurement tape from our office. Some feed dealers have them, too.

Now, if you run across any heifers small for their age, give them more and better feed, so they have a chance to catch up. The important thing is to give them all they can use of the best hay you have. Limited amounts of good silage and up to five or six pounds of grain will complete a ration that will help under-sized heifers make up for lost time. Don't try to fatten the animals with too much grain. Keep them growing in good, thrifty condition. Remember, those under-sized heifers should get your very best hay.

When your baby is ready for his first taste of solid food, take it easy! Offer no more than a tiny sample of the food on the end of a small spoon. Gradually offer more until baby is really used to the new flavor and texture.

SCHOOL LUNCH SUBSIDIZATION FACES CUTBACK

HARRISBURG (AP)—A one-cent-a-pupil cut in the subsidized school lunch program was imminent Thursday because of what the Department of Public Instruction said was an expansion of the state program and a reduction in federal aid.

"There doesn't seem to be anything else to do but cut back," said Dr. Ralph C. Swan, acting superintendent of public instruction.

A formal order reducing the per meal allotment from seven to six cents is being drafted for his signature. The order would take effect Nov. 1 since October payments have already been made on a seven-cent basis.

Funds Slashed

Miss Frances L. Hoag, chief of the department's school lunch and nutrition division, attributed the reduction to the taking in of more schools and children under the program and less money available from the federal government.

She said the federal allocation to Pennsylvania for the program was \$2,866,000 for the current school year or \$130,000 less than last year.

During the last school year almost five million lunches a month were served under the program, she said, adding:

"This year it looks from the data available and from the applications for participation that we have received that the figure will be a little over six million lunches a month."

Miss Hoag said, however, that the reduction in government aid does not necessarily mean all children will have to pay the difference as it is possible some school districts may be able to absorb the penny or make it up through other federal aid.

Typical Lunch

The seven-cent figure applies to what is classified as a Type A lunch which includes a half pint of milk, two ounces of protein rich food such as fish, cheese, meat or chicken, two servings of fruit or vegetables, bread and butter.

School lunches generally cost under 20 cents.

The 1946-47 school year was the

REMOVE BLOCK ON SHIPMENT

PHILADELPHIA (AP)—The United Electrical Workers Union (Ind.) announced Thursday it would permit shipment from Westinghouse Electric Corporation's nearby Lester plant of a turbine spindle whose removal was blocked yesterday by UE pickets.

The executive committee of UE Local 107 said it reached its decision in a conference late last night with L. A. Heckscher, attorney for the Ohio Valley Electric Corp. which ordered two giant spindles, each weighing 73 tons and valued at \$300,000.

REMOVE BLOCK ON SHIPMENT

HERLESHAUSEN, Germany (AP)—Four policemen from Communist East Germany swam the icy Werra River three times Thursday to seek asylum in the West.

West German authorities said the fugitives swam across and then realized they had left their boots in the East, so they swam back to get them and then returned.

All four asked political asylum "so we can live as free men," authorities said.

A locomotive that was to pick up the spindles was blocked from entering the Lester plant yesterday by UE pickets who said the spindles were "unfinished work."

The UE executive committee said, however, it had been assured one was finished and was needed for an Atomic Energy Commission project. They said a wire from an AEC representative had assured the union of the need for the turbine, which was to be transferred to the Maryland Drydock Co., Sparrows Point, Md.

The blocking of the diesel followed by several hours the granting of a temporary injunction by President Judge Henry O. Sweney of the Delaware County Court at Media against mass picketing by the UE. The injunction was issued after the company charged that the UE had seized the plant by process of mass picketing. The UE said it would contest the injunction at a hearing Monday.

Kansas has 9,439 miles of railroad.

Stilbestrol-Fed Farm Animals Yield Fine Meat, Says Zettle

By FRANK S. ZETTEL

Adams County Farm Agent Preliminary results in test feeding of stilbestrol to beef steers at the Agricultural Research Center, Beltsville, Md., confirm previous findings that the hormone-like chemical can increase rate of gain without adverse effect on meat quality.

The Beltsville experiments were undertaken last May following widespread reports that using stilbestrol as a growth stimulant for feed-lot animals resulted in poor-quality carcasses. No evidence supporting such reports has been found so far in the limited tests at Beltsville, nor in stilbestrol-feeding studies at other agricultural experiment stations.

A 90-day feeding test, using 10 Hereford and crossbred Angus-Hereford steers with starting weights averaging about 900 pounds, has been completed. Five of these animals were fed stilbestrol in a mixed-protein feed at the approved rate—10 milligrams per day per animal, for steers weighing not less than 600 pounds. The other 5 animals were used as controls.

The steers on stilbestrol gained an average of about 1/2 pound a day more than the controls in this 3-month test. This amounts to a gain in rate of gain of approximately 5 per cent in favor of the cattle receiving stilbestrol.

At slaughter, both lots of these steers had live and carcass grades of low choice. Separation of fat and lean meat showed that the control group, which received no stilbestrol, was slightly fatter. This finding agrees with results obtained by state experiment stations, which have increased lean rather than fat.

In other respects, there was no significant difference between meat

from the stilbestrol-fed steers and that from control animals. Marbling, intra-muscular fat, and water content of lean from both groups were practically the same. Flesh of the cattle fed stilbestrol was at least as firm and as high in solids content as that of the controls.

Treat Wheat Before Cold Weather Examine wheat stored in farm bins and fumigate any infested by weevils before cold weather.

Wheat not treated at harvest time with weevil protective powder, or any put in uncleaned bins, can be infested easily by these insects. Two per cent weevil damage constitutes grain contamination according to federal food and drug rulings. Also the presence of rodent pellets per cent classifies it as unfit for milling into flour. Weevily and rodent contaminated grain is subject to down grading and can be sold only for livestock feed.

Some country elevators already have reported carloads of wheat intercepted and rejected for milling because of such contamination.

Chemicals sold for grain fumigation usually carry 2 or 3 carbon compounds and must be used at the proper dosage to be effective. To find the number of bushels in a bin multiply the cubic foot volume of the grain by 0.8.

Wheat fumigated by the middle of October has an excellent chance of going through the normal storage period in good condition for milling. Beware of warm spots in the grain. During the winter weevils ball up in local areas and keep such grain warm. Turning the grain is all that can be done at that time as fumigants are ineffective in unheated rooms.

Most dairymen are bringing their

Mack Truck Strikes End With Increases

NEW YORK (AP)—A one-day strike at four Mack Trucks Inc. manufacturing plants in New Jersey and Pennsylvania ended Wednesday night in agreement on a three-year contract providing wage increases and other benefits.

The settlement came after marathon negotiations starting Monday morning between management representatives and officials of the CIO United Auto Workers Union.

Affected are 6,000 workers at plants in Plainfield, New Brunswick and Bridgewater Township in New Jersey and one at Allentown, Pa.

The union, which set up picket lines yesterday, has promised its members will be on the job today.

Helpers off pasture and into their quarters for the winter. So right now would be a mighty good time for you to do some checking on their growth. Because many pastures in Adams County did not produce as well this year, the helpers may not have fared perfectly all the way.

You can check their growth with a cloth measuring tape, and see whether they're of normal size for their age.

Here's how to go about it. Measure around the smallest part of the heart girth, just back of the forelegs, and the height at the point of the shoulders. Then compare these measurements with those found on a growth chart for your particular breed of cow. You can get a growth measurement tape from our office.

Some feed dealers have them, too. Now, if you run across any helpers small for their age, give them more and better feed, so they have a chance to catch up. The important thing is to give them all they can use of the best hay you have. Limited amounts of good silage and up to five or six pounds of grain will complete a ration that will help under-sized helpers make up for lost time. Don't try to fatten the animals with too much grain. Keep them growing in good, thrifty condition. Remember, those under-sized helpers should get your very best hay.

When your baby is ready for his first taste of solid food, take it easy! Offer no more than a tiny sample of the food of the end of a small spoon. Gradually offer more until baby is really used to the new flavor and texture.

SCHOOL LUNCH SUBSIDIZATION FACES CUTBACK

HARRISBURG (AP)—A one-cent-a-pupil cut in the subsidized school lunch program was imminent Thursday because of what the Department of Public Instruction said was an expansion of the state program and a reduction in federal aid.

"There doesn't seem to be anything else to do but cut back," said Dr. Ralph C. Swan, acting superintendent of public instruction.

A formal order reducing the per meal allotment from seven to six cents is being drafted for his signature. The order would take effect Nov. 1 since October payments have already been made on a seven-cent basis.

Funds Slashed Miss Frances L. Hoag, chief of the department's school lunch and nutrition division, attributed the reduction to the taking in of more schools and children under the program and less money available from the federal government.

She said the federal allocation to Pennsylvania for the program was \$2,866,000 for the current school year or \$130,000 less than last year. During the last school year almost five million lunches a month were served under the program, she said, adding:

"This year it looks from the data available and from the applications for participation that we have received that the figure will be a little over six million lunches a month."

Miss Hoag said, however, that the reduction in government aid does not necessarily mean all children will have to pay the difference as it is possible some school districts may be able to absorb the penny or make it up through other federal aid.

Typical Lunch The seven-cent figure applies to what is classified as a Type A lunch which includes a half pint of milk, two ounces of protein rich food such as fish, cheese, meat or chicken, two servings of fruit or vegetables, bread and butter.

School lunches generally cost under 20 cents.

The 1946-47 school year was the

first in which the state took part in the federal aid program. At that time the figure was nine cents a meal. The reimbursement figure was dropped to eight cents in 1953-54 and seven cents in 1954-55.

HERLESHAUSEN, Germany (AP)

Four policemen from Communist East Germany swam the icy Werra River three times Thursday to seek asylum in the West.

West German authorities said the fugitives swam across and then realized they had left their boots in the East, so they swam back to get them and then returned.

All four asked political asylum "so we can live as free men," authorities said.

REMOVE BLOCK ON SHIPMENT

PHILADELPHIA (AP)—The United Electrical Workers Union (Ind.) announced Thursday it would permit shipment from Westinghouse Electric Corporation's nearby Lester plant of a turbine spindle whose removal was blocked yesterday by UE pickets.

The executive committee of UE Local 107 said it reached its decision in a conference late last night with L. A. Heckscher, attorney for the Ohio Valley Electric Corp., which ordered two giant spindles, each weighing 73 tons and valued at \$300,000.

A locomotive that was to pick up the spindles was blocked from entering the Lester plant yesterday by UE pickets who said the spindles were "unfinished work."

The blocking of the diesel followed by several hours the granting of a temporary injunction by President Judge Henry G. Sweeney of the Delaware County Court at Media against mass picketing by the UE. The injunction was issued after the company charged that the UE had seized the plant by process of mass picketing. The UE said it would contest the injunction at a hearing Monday.

LEADER CALLS SENATORS 'BAND OF WILFUL MEN'

UNIONTOWN, Pa. (AP)—The 26 Republican state senators who defeated his classified income tax proposal are a "little band of wilful men," says Gov. Leader.

He spoke Wednesday night before 1,300 at the annual Fayette County Democratic dinner.

"The Republicans say to cut 131 million dollars from the budget. But they want to cut out the industrial development program, cut out mental health, cut out the program for crippled and handicapped children. These things should be above partisan politics," Leader declared.

No Party Politics

Referring to the industrial development program, Leader said:

"I am not going to play partisan politics with putting bread and butter into the mouths of the children of working people in this state and

I don't think the Republicans will either."

He added:

"I make no apologies. I am proud of what we are doing in Harrisburg. There is hope in Pennsylvania, there is hope in America. And that hope is the Democratic party because it is the party that thinks of the human being first instead of dollars."

NOBEL PRIZE IS AWARDED SWEDEN

STOCKHOLM, Sweden (AP)—The 1955 Nobel prize in medicine was awarded Thursday to Dr. Hugo Theorell, a Swedish biochemist, "for his discoveries concerning the nature and mode of action of oxidation enzymes."

He will receive a record Nobel cash award equal to \$36,720.83 along with his Nobel Institute from King Gustaf VI Adolf at ceremonies here Dec. 16. The money comes from a nine-million-dollar foundation established by the will of Alfred Nobel, inventor of dynamite.

The Swedish Academy of Liter-

Emmitsburg

School will be closed today and Friday so that teachers may attend the three-day eighty-eighth annual convention of the Maryland State Teachers' Association, to be held in the Fifth Regiment Armory, Baltimore, Md.

The Honorable G. Mennen Williams, governor of Michigan, will keynote the initial gathering with an address, "Education—The Key To America's Future." Other highlights of the convention will be a concert given by the All Maryland High School Chorus. Members are allotted each school on the basis of enrollment. Emmitsburg High having two representatives, Leslie Gregger, first bass, and Lois Linn, first alto. The guest choral conductor is Helen Hoemer, director of Crane Department of Music, State University Teachers' College, Potsdam, New York.

The Tom's Creek Methodist Church has planned an oyster and turkey supper to be held in the social rooms of the church on Saturday, Nov. 5. Food will be served family style.

George Wivell, Baltimore, and John Wivell, Walkersville, spent Sunday with their parents, Mr. and Mrs. William Wivell.

Mrs. Edward Selzer, St. Anthony's remains seriously ill at the Frederick Memorial Hospital.

Dr. Forbes Burgess, county health officer, announced this week that second inoculations for polio will be given in Frederick County beginning on Nov. 8. Vaccine will be available to present second and third grade children; however it will be necessary for parents to sign new request slips and return them to the schools at once, since no child will receive the vaccine unless the parental request slip is signed.

On Tuesday afternoon, Nov. 3, Dr. Williams and his staff will be at the Emmitsburg Public School, and on Wednesday morning at St. Anthony's and St. Euphemia's. Morning clinics 9:30 to 12, afternoon clinics 1 to 3:30 p.m.

Chief of Police Daniel H. Kaas has returned from the Warner Hospital, Gettysburg.

FRIENDS SUPPORT MRS. M. KNOWLES

PHILADELPHIA (AP)—The representative meeting of the Philadelphia Religious Society of Friends (Quakers) has authorized the collection of funds to aid in the legal defense of Mrs. Mary Knowles, a librarian who refused to testify about alleged Communist affiliations before a congressional committee.

Mrs. Knowles, a librarian of the William Jeanes Memorial Library under the care of the Plymouth Monthly Meeting of Friends, outside Norristown.

The library was given a \$5,000 check by the Fund of the Republic, a research group created by the Ford Foundation, for retaining Mrs. Knowles in its employ after she refused to answer questions.

"The Messenger," a publication of the Philadelphia Yearly Meeting of Friends, said Mrs. Knowles "is under heavy legal expense in maintaining her civil rights and liberties" and asked Quakers to contribute and "while her case is still under investigation."

Thomas Umbel, son of Mr. and Mrs. William H. Umbel; Edward Patrick and Donald Thomas, sons of Mr. and Mrs. Edward L. Schratwieser.

The annual Harvest Festival Ham and oyster supper for the benefit of Elias Evangelical Lutheran will be held in the Parish House on Saturday. Suppers will be served from 4 o'clock family style.

The Luther League will sponsor a roast turkey banquet for all people of the parish Wednesday evening, Oct. 26, at 6 o'clock. There will be no charge for the banquet which is open to all youths of the congregation from 12 to 22 years of age. Guest speakers will be Paul McKay, president of the Maryland Synod Youth League, and Larry Cameron, vice president of the Synod League. Mothers of leaguers and adult advisors will help with the banquet and with the program.

Members of Elias Lutheran Church Council will attend the Maryland Synod Councilmen's supper meetings at Frederick, Oct. 26, and Warnersboro, on Oct. 27, 1955.

Dr. W. R. Cadle was elected president of the Emmitsburg Little League at the special meeting on Tuesday evening at the Fire House. Other officers elected included: Thomas Bollinger, vice president; J. Edward Houck, treasurer; John J. Dillon, secretary; John White, player representative; Allen Bouey, umpire in chief; and Thomas Saylor, chief scorer. Officers of the league voted to secure a franchise in the National Little League organization. Guests at the meeting were Kirby Whetlie and Ham Spalding of Thurmont, who explained operation of their league.

Farmers in the United States use more than 60 per cent of the world's tractors.

LEADER MEETING STATE LEADERS

HARRISBURG (AP)—Gov. Leader will make a three-day trip next week to compile first hand information on what is needed for his "top priority" industrial development program in Pennsylvania.

Leader will meet with government, business, industry and labor leaders in Wilkes-Barre on Monday, Erie on Tuesday and Johnstown on Wednesday.

The Wilkes-Barre meeting will encompass a 19-county region, Erie seven counties and Johnstown 20 counties.

"I have given economic development and particularly industrial development a top priority in the program of my administration," the governor said in a statement Wednesday, adding:

"It is my purpose to marshal all of the pertinent services and facilities of our state government to create new jobs, new business opportunities, new payrolls and profits."

Leader said he would be accompanied to the conferences by Secretary of Commerce William R. Davin, and Secretary of Labor and Industry John R. Torquato.

The meetings were viewed as a means of drumming up sentiment in behalf of administration-backed legislation to create a state industrial development authority with an appropriation of 20 million dollars to create industrial sites and attract new industry to economically distressed areas of the state.

Photographer Makes Hit With Physician

LOUISVILLE, Ky. (AP)—Photographer Charlie Pence was going about the routine of taking pictures and getting names at an engagement cocktail at the home of a physician.

While he was finishing the assignment, the doctor walked up and put his hand on Pence's shoulder and said:

"You've been so nice to us I want to do something for you... so I'm giving you a due-bill for an appendectomy."

Voters Determine Amendment To Insure Support To State Employees, Teachers, Retired

By BOB HOLTON

HARRISBURG (P)—Pennsylvania voters will decide at the Nov. 8 election if the state constitution should be amended to insure continued payment of some 2 1/4 million dollars in added benefits to commonwealth employees and teachers already in retirement.

The proposed amendment—only one to appear on the ballot—will have the effect of making certain the legality of a system under which the increased benefits now are being paid to some 4,500 former teachers and former employees of the Department of Public Instruction.

The bulk of those receiving the additional money to provide a minimum monthly pension of not less

ROADS PROGRAM HAS OPPOSITION FROM SEN. WADE

Proposed Amendment

"Shall Sect. 11 of Art. 3 of the constitution of Pennsylvania be amended to empower the Legislature to authorize increases in retirement allowances or pensions of employees who are members of a retirement or pension system now in effect or hereafter enacted by the commonwealth or any of its political subdivisions and agencies, after the termination of the services of said members?"

There is some question as to the validity of the method we are now employing in giving these additional funds to those who retired a decade or two ago and this constitutional change will merely insure the validity of that method," said Rep. Bower (R-Northumberland).

Bower said the amendment would "empower the Legislature to authorize increases in retirement allowances or pensions already being paid."

Termed Safety Factor

A co-sponsor of the amendment proposal in the current session, Bower pictures it as "merely a safety factor against possible court testing of our present system."

He said some school teachers who retired more than 20 years ago with 32 years service and aged 62, were receiving as little as \$35 a month before the added payments were instituted.

Dr. Ralph Swan, acting superintendent of public instruction, described the granting of additional pension funds to the 4,000 persons under the school retirement fund as "a very fine thing."

He said it would be "impossible" to estimate the number of teachers reaping the benefits of the system at present.

However, a department spokesman said it is "safe to say that a good many of them are retired teachers."

Full Retirement Eligibility

Full retirement eligibility under the state retirement fund calls for 25 years service and 60 years of age.

"This amendment also would allow 30 other county and municipal pension funds to seek General Assembly approval for institution of similar retirement increases."

The Public Instruction Department has asked for \$2,100,000 in its proposed budget for the current biennium to cover the cost of the additional payments.

No figure on the added funds to be paid through the state retirement were available—but a spokesman said the amount is "very small."

ROADS PROGRAM HAS OPPOSITION FROM SEN. WADE

HARRISBURG (P)—Chairman Wade of the Senate Highways Committee contends that Gov. Leader's proposed road program contains "some very deceptive sleight of hand."

"Before we boost your license fees and compromise your state's credit I want to see a pretty clear picture of what the money's going for and what controls ride herd on it," the Cumberland County Republican said.

The administration's highway bills, including an increase of \$5 in the annual passenger car registration fee and much larger state grants for local road use, is before the House. If passed by that Democratic-controlled chamber it would be referred to Wade's committee.

Rural Areas Suffer

"It looks to me as if the rural areas will wind up far behind the standards which Republican administrations have set for them," Wade said in a statement Wednesday.

He said one of the Leader proposals, to remove the 80 million dollar borrowing limit of the state Highway and Bridge Authority, would divert "hard earned gas-tax and license plate money . . . into non-highway channels."

He said such an idea "might well require tremendous drafts on the motor license fund for interest and debt service—and that's diversion."

Tie Up Funds

Wade also said he would insist "we stay away from dispersion of motor license funds through the hands of agencies who can spend it uncontrolled on projects only remotely tied in with our important highway system."

One of the administration proposals would permit the state Highway and Bridge Authority to finance and undertake any highway project authorized by the General Assembly although no appropriation has been made.

Plan New Lighting For Turnpike Tunnels

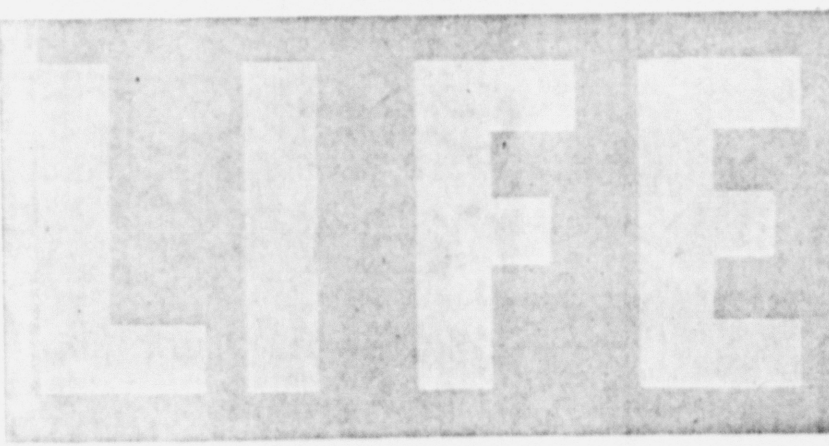

HARRISBURG (P)—The Pennsylvania Turnpike Commission is planning a new lighting system for the seven miles of tunnels on the toll highway through the Allegheny Mountains.

Commissioner David E. Watson said the commission expects to receive completed plans within a month from the Westinghouse Electric Corp., Pittsburgh, for the revised lighting system to replace the present staggered overhead lights in the tunnels.

Westinghouse, he said, has been working for a year on methods of improving the tunnel lighting.

Says Federal Power Is Fraud, Delusion

WHITE SULPHUR SPRINGS, W. Va. (P)—Industrialist Ben V. Morell assailed federal public power today as "a fraud and a delusion."

"There is no logical reason for the popular appeal of public power," he said, "but demagogues have been able to hoodwink the public into believing that it is an important factor in their cost of living."

Morell, a retired admiral, is board chairman of Jones & Laughlin Steel Corp. and headed a Hoover Commission task force on water resources and power. His address was prepared for a convention of the Association of Edison Illuminating Companies.

REDS ENGAGING MANY WOMEN TO DO HARD LABOR

Editor's Note — Richard R. Kasischke is one of the few U.S. reporters to visit Communist Romania in recent years. He went to Bucharest from Moscow, where he served as AP chief of bureau for two years.

By RICHARD R. KASISCHKE
BUCHAREST, Romania (P)—Travel notes from Bucharest:

A number of simple things are available in Bucharest which one can't find in Moscow. A city telephone directory, for instance. In the two years I was in Moscow I never saw a telephone directory. Here the one in my hotel room is complete with dialing instructions and a section listing everything from the crematory to the sports stadiums.

Soviet influence is great in Romania. This month is Romanian-Soviet Friendship Month and most of the movie houses are putting on a Soviet film festival. Others are showing Polish and Czechoslovak films. But no Western pictures. Posters in downtown Bucharest advertise Pravda, Izvestia and other Soviet newspapers and magazines.

PUBLIC SALE
of Real Estate and Personal Property
FRIDAY, OCTOBER 28, 1955
6:00 P.M., D.S.T.

The undersigned will offer at public sale on the premises, about one-fourth (1/4) mile south of Mt. Tabor and one-eighth (1/8) mile west of the road leading from Mt. Tabor to Pitzer's Corner, on Friday, October 28, 1955, at 6:00 P.M., D.S.T., the following real estate and personal property:

Real Estate

A tract of land containing five (5) acres and twenty-one (21) perches, improved with a five-room cement block house, 2 small log houses and a new concrete block chicken house with shingle roof, approximately 60 feet by 16 feet.

Voters Determine Amendment To Insure Support To State Employees, Teachers, Retired

By BOB HOLTON
HARRISBURG (AP)—Pennsylvania voters will decide at the Nov. 8 election if the state constitution should be amended to insure continued payment of some 2 1/4 million dollars in added benefits to commonwealth employees and teachers already in retirement.

The proposed amendment—only one to appear on the ballot—will have the effect of making certain the legality of a system under which the increased benefits now are being paid to some 4,500 former teachers and former employees of the Department of Public Instruction.

The bulk of those receiving the additional money to provide a minimum monthly pension of not less

than \$100 are persons who went on the rolls of the Public School Employees Retirement Fund 15 or more years ago.

Only a few hundred recipients of the state Employees Retirement Fund—a separate pension system—are receiving the additional money.

"This plan makes it possible to allow the person who paid good hard dollars into the retirement funds years ago to get a fair return today," said Miles Horst, Republican state chairman.

The proposed amendment, which passed both houses of the General Assembly in two consecutive sessions, carries the backing of both parties.

The amendment would apply to

ROADS PROGRAM HAS OPPOSITION FROM SEN. WADE

HARRISBURG (AP)—Chairman Wade of the Senate Highways Committee contends that Gov. Leader's proposed road program contains "some very deceptive sleight of hand."

Before he boost your license fees and compromise your state's credit, I want to see a pretty clear picture of what the money's going for and who controls, ride herd on it," the Cumberland County Republican said.

The administration's highway bills, including an increase of \$5 in the annual passenger car registration fee and much larger state grants for local road use, is before the House. If passed by that Democratic-controlled chamber it would be referred to Wade's committee.

Says Federal Power Is Fraud, Delusion

WHITE SULPHUR SPRINGS, W. Va. (AP)—Industrialist Ben V. Morell assailed federal public power today as "a fraud and a delusion."

There is no logical reason for the popular appeal of public power," he said, "but demagogues have been able to hoodwink the public into believing that it is an important factor in their cost of living."

Morell, a retired admiral and board chairman of Jones & Laughlin Steel Corp. and headed a Hoover Commission task force on water resources and power. His address was prepared for a convention of the Association of Edison Illuminating Companies.

Love Rich Pastries

Romanians love rich pastries, topped with cream and chocolate. Big and little shops sell these but they are expensive. A single portion of a cream-topped cake in a hotel restaurant cost nearly a dollar at the unrealistic monetary exchange rate.

There is very little motor traffic in Bucharest, a city of 1 1/2 million. Perhaps it is just as well, for nearly all the main streets are torn up for repair. Authorities are employing more and more women in manual labor and one sees scores of them in the pick-and-shovel crews.

Although Romanians generally look pretty well dressed by Eastern European standards—and in some respects smarter than the people of Moscow—one can see barefoot people in Bucharest, even in October. Most of these are reported to be Gypsies. There are some beggars, children and old people willing to pose for pictures for a coin.

A businessman from West Berlin parked his Ford Taurus sedan, 1954 model in the center of Bucharest. There are thousands of these vehicles on German highways, but here this was a sensation. All day and into the night men, women and children flocked around, looking into and under it and testing the bumper. Romanians do not manufacture any automobiles. Most of the cars seen here are Soviet-made with a sprinkling of second or third-hand American Buicks, Fords and Chevrolets.

India estimates there are a million cases of leprosy in the country.

NO TRESPASSING

All persons are warned not to trespass on the premises of the undersigned with dog, gun or trap for the purpose of taking game in any manner or for fishing or any way injuring or destroying property. All persons violating the laws of the Commonwealth with regard to trespassing on land of the undersigned will be dealt with under the provision of the Act of June 24, 1939, P.L. 872, Section 854.

Termed Safety Factor
A co-sponsor of the amendment proposal in the current session Bower pictures it as "merely a safety factor against possible court testing of our present system."

He said some school teachers who retired more than 20 years ago with 32 years service and aged 62, were receiving as little as \$30 a month before the added payments were instituted.

Dr. Ralph Swan, acting superintendent of public instruction, described the granting of additional pension funds to the 4,000 persons under the school retirement fund as "a very fine thing."

He said it would be "impossible" to estimate the number of teachers reaping the benefits of the system at present.

However, a department spokesman said it is "safe to say that a good many of them are retired teachers."

Full Retirement Eligibility
Full retirement eligibility under the state retirement fund calls for 25 years service and 60 years of age.

"This amendment also would allow 30 other county and municipal pension funds to seek General Assembly approval for institution of similar retirement increases."

The Public Instruction Department has asked for \$2,100,000 in its proposed budget for the current biennium to cover the cost of the additional payments.

No figure on the added funds to be paid through the state retirement were available but a spokesman said the amount is "very small."

Rural Areas Suffer
"It looks to me as if the rural areas will wind up far behind the standards which Republican administration have set for them," Wade said in a statement Wednesday.

He said one of the Leader proposals to remove the 80 million dollar borrowing limit of the state Highway and Bridge Authority, would divert "hard earned gas-tax and license plate money... into non-highway channels."

He said such an idea "might well require tremendous drafts on the moor license fund for interest and debt service—and that's diversion."

Tie Up Funds
Wade also said he would insist "we stay away from dispersion of motor license funds through the hands of agencies who can spend it uncontrolled on projects only remotely tied in with our important highway system."

One of the administration proposals would permit the state Highway and Bridge Authority to finance and undertake any highway project authorized by the General Assembly although no appropriation has been made.

Plan New Lighting For Turnpike Tunnels

HARRISBURG (AP)—The Pennsylvania Turnpike Commission is planning a new lighting system for the seven miles of tunnels on the toll highway through the Allegheny Mountains.

Commissioner David E. Watson said the commission expects to receive completed plans within a month from the Westinghouse Electric Corp., Pittsburgh, for the revised lighting system to replace the present, staggered overhead lights in the tunnels.

REDS ENGAGING MANY WOMEN TO DO HARD LABOR

Editor's Note — Richard R. Kasischke is one of the few U.S. reporters to visit Communist Romania in recent years. He went to Bucharest from Moscow, where he served as AP chief of bureau for two years.

By RICHARD R. KASISCHKE
BUCHAREST, Romania (AP) — Travel notes from Bucharest.

A number of simple things are available in Bucharest which one can't find in Moscow. A city telephone directory, for instance. In the two years I was in Moscow I never saw a telephone directory. Here the one in my hotel room is complete with dialing instructions and a section listing everything from the crematory to the sports stadiums.

Soviet influence is great in Romania. This month is Romanian-Soviet Friendship Month and most of the movie houses are putting on a Soviet film festival. Others are showing Polish and Czechoslovak films.

Westinghouse, he said, has been working for a year on methods of improving the tunnel lighting.

PUBLIC SALE

of Real Estate and Personal Property
FRIDAY, OCTOBER 28, 1955
6:00 P.M., D.S.T.

The undersigned will offer at public sale on the premises, about one-fourth (1/4) mile south of Mt. Tabor and one-eighth (1/8) mile west of the road leading from Mt. Tabor to Pitzer's Corner, on Friday, October 28, 1955, at 6:00 P.M., D.S.T., the following real estate and personal property:

SEND PLANES TO BRING SENATORS, WIVES TO U. S.

WASHINGTON (AP)—Senators McClellan (D-Ark.) and Chavez (D-NM) say they have not asked for special government planes to fly them and their wives home from Europe.

And an aide of Sen. Stennis (D-Miss) said in Washington he knew of no such request by his senator. Stennis himself could not be reached immediately.

All three legislators are members of the Senate Appropriations Committee in Europe on committee business. The Defense Department said yesterday it is sending two big four-engine transport planes to bring them home, at an estimated round-trip cost of \$20,000.

"Couldn't Wait"

Asst. Secretary of Defense Robert T. Ross said the special trips had to be ordered when the senators were reported unable to wait two or three days for government planes due on "regular scheduled missions."

One of the two government planes took off yesterday for Madrid, where it was due to pick up McClellan and Stennis Sunday. The second is slated to leave here Monday for Paris to fetch Chavez.

Senatorial aides in Washington said the Air Force had known for weeks the senators would have to return by certain dates to meet home commitments, and therefore could have arranged to bring them home on regular flights.

Ross said the Defense Department "has a duty to provide without question" the transport for members of Congress on official trips. The senators have been on a three-week survey of U. S. defense aid spending in Britain, Spain and Turkey.

Reds Issue Hurry Call For Meeting

UNITED NATIONS, N.Y. (AP)—Puzzled Western delegates hoped to find out today what prompted Russia's urgent call for a U. N. Disarmament Commission huddle on the eve of the Big Four foreign ministers' conference.

American circles expressed open curiosity as to what was in the mind of Chief U. S. Delegate Henry Cabot Lodge Jr. and representatives of the 11 other commission members prepared to meet.

A U. S. spokesman said Russia's request came as a surprise since it had been generally agreed to hold off any disarmament debate in the U. N. until the foreign ministers had a chance to thresh out the issue at their meeting beginning Oct. 27 in Geneva.

Ike Grants Peters Recess Appointment

DENVER (AP)—President Eisenhower has given a recess appointment to Montgomery County (Pa.) Republican leader Fred Peters as collector of customs for the port of Philadelphia.

The appointment made Wednesday is subject to confirmation by the Senate when it reconvenes in February.

Peters, 71, president of the Montgomery County commissioners, succeeds Louis V. D'Orp of East Norriton Twp., Pa., who resigned last May.

Peters had announced he would not seek reelection for a commissioner's post this year after the GOP county policy committee said it would not support re-election any candidate who had served in an office for more than two terms. Peters has been a commissioner since 1936.

The winner's purse was \$7,500, bringing his lifetime earnings to \$275,000. His time was 2:03 2-5.

Lord Steward paid \$4.60, \$2.80 and \$2.80. Stenographer, owned by Max Hempf of Mechanicsburg, Pa., was second and paid \$3.20 and \$2.90. Maximilian returned \$5.50 for show.

COURT VOIDS DISMISSAL OF ONE TEACHER

PHILADELPHIA (AP)—Common Pleas Court has set aside the dismissal of one of 30 Philadelphia High school teachers fired after refusing to testify about alleged Communist affiliations, ruling that the school board followed incorrect procedure.

The court ruled yesterday the Board of Education should have acted under the Pennsylvania Loyalty (Pechan) Act in firing 43-year-old Herman A. Beilan, a high school English teacher. The board dismissed him in January, 1954, charging "incompetency" under the Teachers Tenure Act.

That act specifies incompetency as one of the grounds for dismissal.

The decision by President Judge Curtis Bok and Judges Gerald F. Flood and Louis E. Levinthal was the first affecting the 30 teachers fired after invoking the Fifth Amendment when questioned about alleged Communist activities by the then superintendent of schools, Dr. Louis P. Hoyer. Some also invoked the Constitutional privilege in appearances here and in Washington before a congressional group.

Beilan's appeal of his dismissal.

OVERCOME BY GAS

WILKES-BARRE, Pa. (AP)—Noticing the shades drawn later than usual in a neighbor's house, residents investigated yesterday and found Mr. and Mrs. John Klimmovich overcome by coal gas in their Ashley home. They were revived by an inhalator squad. Firemen said the recent heavy rains apparently loosened soot in the chimney of the Klimmovich home, blocking it off.

which had been upheld by the Pennsylvania superintendent of public instruction, was considered a test case. However, court observers could not say what affect the court decision would have on the status of the other 29.

COLLEGE PLANS LAND ADDITION

YORK, Pa. (AP)—Plans for acquisition of 57½ acres of the Out Door Country Club in South York for a new campus site have been announced by York Junior College.

At the same time, the college said Wednesday it planned a two million dollar public subscription to finance acquisition of the \$250,000 site and the construction of dormitories.

The college secured a two-year option on the land and sale is subject to approval of the country club membership. If approved the college plans to occupy the site in 1957.

Facilities would be built for 1,000 day students and another 1,000 part-time evening and adult education students. The college presently has an enrollment of 292 but officials said they expect that to double within the next three to five years.

The school's present site near the center of the city would be sold if the acquisition of new land is approved.

There are about 74 million horses in the world, about 22 per cent fewer than before World War II.

Public Acceptance Of Natural Gas And "All Gas" Homes Are Enthusiastically Received

Public acceptance of natural gas and of modern, automatic gas appliances is at a record level in Gettysburg and communities of the Adams-Franklin-York County area, according to Julian Estep, local manager of the Manufacturers Light and Heat Company.

"Instead of leveling-off — as might be expected after ten years of unprecedented growth — the trend to gas seems on the threshold of an era even more fabulous than that just passed," he said.

"On the immediate horizon, area dealers, plumbers and distributors are predicting new peaks in gas appliance sales by the end of 1955. Another banner year is expected in 1956.

"And, to spark long-range gains, three new uses for gas — all introduced here in the past few years — are already taking hold and growing in popularity.

"The new uses are gas 'all year' air-conditioning, gas laundry and gas incineration. Joining the established superiority of gas for cooking, water heating, househeating and refrigerator, they bring to seven the uses of gas in the home.

"Brought under one roof, these seven uses make possible an entirely new concept in modern living — the 'all gas' home — a development revolutionizing the home building industry.

"Intense public enthusiasm for 'all gas' homes has already been demonstrated here by thousands of area residents who visited model 'Blue Flame Homes' this summer in Littlestown and Arendtsville.

"What's behind today's sensational trend to gas?" "One of the major factors," according Estep, "has been the public demand for modern living conveniences.

"Coupled with that demand has been the determination of local gas appliance dealers, plumbers, distributors and home builders to keep pace with the emphasis on high styling and improved performance.

"And, underlying the entire phenomenon, are the attributes which combine to make natural gas today's 'most wanted fuel' — economy, dependability, efficiency, cleanliness and convenience.

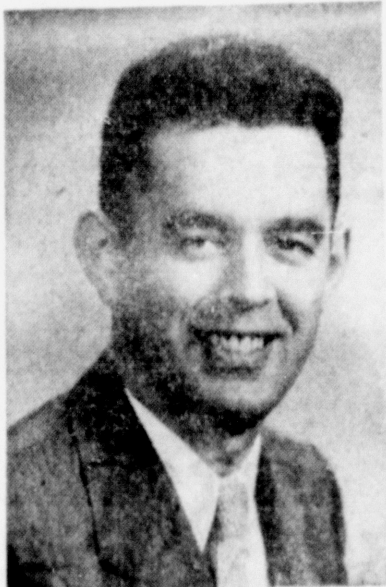

"The economy of gas, together with the public's sense of 'cost consciousness' — inevitable in a period of high prices and inflation — are probably the most important factors.

"Homemakers have found that they are money ahead every year by going 'all gas' in preference to electricity, oil, coal or any combination of other fuels.

"Dependability is important, too. With gas, people

JULIAN ESTEP
Manager

HAROLD MILLER
Publicity

don't have to contend with storms and power failures holding up their meals or knocking out their refrigeration with costly spoilage of food."

"To insure its customers maximum benefits of the dependability of natural gas, Manufacturers Light and Heat Company has invested over \$111-million since 1945 in new and improved gas

Freezing Weather Causes Gas Jams

Like the Christmas mail rush, a Fourth-of-July traffic jam and bargain day in Macy's basement all rolled into one!

That's the effect on a gas delivery system when temperatures hit sub-freezing levels and thousands of homeowners simultaneously turn up their gas heat thermostats.

To cope with its seasonal rush periods, Manufacturers Light and Heat Company pumps millions of cubic feet of gas each summer into its big underground storage fields.

The storage gas provides a close-at-hand supply of fuel when demands for gas exceed the volumes which can be piped here through long-distance pipelines.

GAS HEATER LIGHTENS CHORE

No part-time servant is your automatic gas water heater. You can call on it for all sorts of chores in addition to the day-to-day jobs of baths, clothes washing and shampooes.

From the food experts in the home service department of your gas company comes the tip that warm water is a great help in vegetable cleaning. Dirt and flecks of soil are more easily and comfortably removed and you'll be delighted to find how much easier it is to scrub potatoes for baking or jacket-on boiling with warm water than with cold.

And that old bugaboo of cleaning the garage floor will seem a lot less tedious if you brush on a warm sudsy solution with an old broom and flush it down the drain with warm water.

Warm Water Role
Warm water plays an important role in the housecleaning chore of wall and paint washing. Detergents dissolve more quickly in warm water and a good supply of warm

delivery facilities," Estep continued.

"All these things point to ever-increasing sales of gas appliances by local dealers, plumbers and distributors, and to greater public enjoyment of modern living conveniences through natural gas," he added.

"For builders and contractors, the advent of the 'all gas' home is proving a 'shot-in-the-arm' to the residential construction industry and paving the way to a brighter and more prosperous tomorrow."

GAS YEARBOOK HAS COMPLETE FUEL HISTORY

The 1955 edition of "Gas Facts," the annual statistical yearbook of the American Gas Association, containing 1954 statistics on the gas utility and pipeline industry, is now available. This 272-page publication contains pertinent information on energy reserves, production, transmission and distribution, underground storage, sales and utilization, finance, labor, and prices, in addition to a brief section containing Canadian statistics.

While the current edition contains 1954 totals for virtually all of the statistics contained in previous issues, it also includes considerable new material. Among the new features are a separate income statement and balance sheet for pipeline companies alone, from 1941 to 1954; additional statistics on exploratory drilling for natural gas and/or oil; detailed tables showing appliance shipments by size, type of unit, and month of the year. The new edition also includes a 'table showing, for selected cities, the cost (in cents per million Btu.) of various residential heating fuels since 1941, together with suggested fuel efficiency factors.

Extra copies of "Gas Facts" are available from the Bureau of Statistics, American Gas Association, at its headquarters in New York at \$2 per copy for the first five copies and \$1.50 per copy for additional copies.

Statistics Issued
A condensed summary of gas industry statistics has been prepared and now is available for distribution. Entitled "The Gas Data Book," it is a pocket-sized publication, measuring 3½ by 6½, and its 22 pages contains historical information on the principal measures of gas industry growth.

It is intended for easy reference when access to "Gas Facts" the

water makes it possible to change the water frequently on big wall washing jobs.

Any proud papa who has ever staggered out of bed with one eye open to warm the 2 a.m. bottle knows full well what a joy an automatic gas water heater is in a home where there's a baby. So all around the clock, in every department of your homemaking, you can count on your automatic gas water heater to make life easier and more pleasant.

ADVERTISE IN THE TIMES

detailed annual statistical year book of the gas industry, is not available. It also is convenient and economical for distribution to large numbers of people desiring only a brief analysis of the gas industry. For detailed information "Gas Facts" will still be necessary, but it is hoped the summary will make available to a larger audience some of the basic industry facts. Many organizations may wish to make this pocket reference volume available to employees or use it for distribution at local meetings with customers, housewives, business men, stockholders or similar groups. Costs are 50 cents for the first copy and additional copies at 25 cents each. Copies of the "Gas Data Book" also are available at the A.G.A. Bureau of Statistics.

Poll Shows People Aren't All Heroes

BALTIMORE (AP) — An inquiring photographer's poll here on the question, "What would you do if you were in a bank while it was being held up?" doesn't reveal any really Daring Dan's.

The fightingest answer came from a young man who said: "If I had a chance to get away I would. If not, I'd stand there with all the other scared people."

Another man, said he "wouldn't do a thing, the money I had wouldn't be worth fighting over."

Of the three women interviewed, one said she would "hand over my money with no fuss." But she add-

ed she thinks she'd remember to get all the identifying marks of the robbers. Another said she might try hiding her money in her

blouse or a trash can, but "I certainly would not do anything foolish." The third said she would "drop dead on the spot."

Would you like your kitchen or laundry remodeled...

FREE?

Enter McCALLS Kitchen and Laundry Contest...

Plan the room you've dreamed about; you may win it, installed in your own home, with every last detail... exactly as you imagined it!

214 PRIZES IN ALL

WHEN YOU CHOOSE
GAS
APPLIANCES YOU
CHOOSE THE BEST

If you are one of the four top prize winners, your kitchen or laundry will be completely remodeled and equipped by McCall's, exactly to your specifications. The equipment you named in your prize winning entry will be there. And you will have it all without spending a penny! Ten second prize winners will receive their choice of major kitchen or laundry equipment.

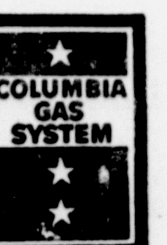

And one hundred third prizes of smaller equipment plus one hundred merit prizes of housewares will be awarded. If you would like a kitchen that's easy to work in, and so attractive that it turns routine into fun... or a smart modern laundry with all the latest automatic equipment, be sure to enter this easy — full of fun contest.

Customer Shirks From Dull Technical Data; Defines Gas As Form Of Stored Sunshine

What is gas?

That question ought to be an easy one for anybody in our business. Ought to be! But let's suppose a customer has just walked over to you and asked — just like that — "What is gas?" How would you answer him?

Would you reach for a textbook and read "Gas consists chiefly of a light, colorless vapor which is found in a natural state and which can also be manufactured . . . ?"

Or would you reel off a lot of trade jargon about "CH₄," "methane," "propane," "psi," "BTU," "cubic feet," "therms," and so on?

Technical Data Is Dull

Not on your gas meter you wouldn't! Or shouldn't. Because, even though those answers might be technically correct, the chances are 100-to-1 they won't mean a thing to that Very Important Person you're talking to. And they don't begin to tell the fascinating story of our industry and our fuel.

Then what? There he stands — Mr. John Q. Customer, V.I.P. — and his question is still hanging unanswered in the air: "What is gas?"

We overheard an excellent handling of that question the other day, at Manufacturers Light and Heat Company office. Our representative was really on his toes? "Well, Mr. Customer," he began, "there are a lot of interesting answers to that question. But here's one basic definition: Gas is Energy In Its Most Efficient Form. Ever think of it that way? Well, look; natural gas comes from deep in the earth. Nature 'manufactured' it from animal and vegetable organisms trapped underground when the earth was being formed a billion years ago. Since the sun supplies energy for every form of life, natural gas actually is a form of 'stored sunshine.' Now, one of the wonderful things about gas is that you can use it just as it comes out of the ground. All you need is a pipe to carry it from the well to where you want to put it to use."

Convert Coal And Oil

"But what about coal and oil?" our customer asked. "They come out of the ground, too, don't they?"

TRAINED LABOR TEAMS INSURE GAS SERVICES

The nation's gas companies work round-the-clock to serve millions of homes, factories, institutions and business establishments.

More than 165,000 skilled employees of the country's 1,400 gas companies put in more than a million manhours a day to supply this miracle fuel to utilities customers.

The task of getting "stored sunshine" from the wells in far away fields to the consumer's gas appliances is only partially done when the fuel reaches the gas company's "city gate."

Border Station

Just before the gas reaches the city gate it passes through what is known as a "TBS" — town border station. Although the overall function of the TBS varies in different communities, there are two vital operations that take place there.

One important job is the measurement of the gas that flows through the town border station. Delicate instruments operated by gas technicians calculate the many characteristics of the gas and its flow to determine the volume of gas entering the city gate.

An equally important task is the regulation of gas pressure. Although the gas is maintained at as much as a thousand pounds of pressure in the huge pipelines in the open country, its pressure must be reduced before it goes to the community gas company. Before the gas is used by the customer, its pressure is further reduced to a few ounces per square inch.

Handled In Scrubber

In many cases, the gas goes through a scrubber — the same device used by pipelines — which filters any foreign particles from the fuel. Before gas enters the city mains it is often odorized because natural gas has no odor. As a safety measure, a harmless chemical is injected to provide an odor to aid leakage detection.

The gas company maintains a 24-hour vigil to determine the pulse of its labyrinth of gas mains under the city's streets. This is the job of the dispatcher and his skilled crew.

The newest communications devices and up-to-date scientific instruments are used to regulate the pressure of the gas to fit the varied needs of each customer. Elaborate studies are made to calculate the needs of the community far in advance.

Monthly Meter Readings

At the same time, the customer's month-to-month meter readings and bills are carefully checked to provide additional seasonal data. The softly-whirring meter with its owl-eyed dials records the data needed by the company.

The meter-reader who visits each home as unobtrusively as possible each month is probably the most widely known gas company employee. However, it takes a legion of other employees to operate a gas utility efficiently.

Installing new mains and keeping an uninterupted flow of gas moving is an endless job for many workmen.

Protecting Mains

Protecting gas mains from rust and corrosion is a highly technical operation that is a vital concern of the nation's gas companies. Scientists have learned that when a pipe corrodes or rusts it is, in effect, returning to its original state of ore as mined.

The chemical changes that occur the rusting process are accompanied by a transfer of electrical energy so the job is either to halt the transfer or provide a harmless withdrawal of current.

One method is called cathodic protection — a system of electrical wiring that draws off the current necessary for the corrosion process.

Trained Employees

Another valuable aid in combating corrosion is the coating of new gas mains with a tar-like material. The gummy substance is wrapped with paper before the main is placed underground. The paper protects the coating and the coating resists corrosion.

The maintenance of company facilities and the combined efforts of trained employees to meet every demand of the customer involve scores of behind-the-scenes operations.

This huge team of skilled workers handles everything from paper

GAS APPLIANCES EASE PROBLEMS FOR HOUSEWIFE

Grandmother's cozy kitchen with its big black iron stove was an inviting center for many family activities. After grandmother's day came an era when the kitchen was just a room for cooking — shining, white, colorless and about as inviting as a hospital operating room.

Now homemakers are swinging back to the idea of the kitchen as a gathering place for family and friends.

The gentlemen who figure out such things have discovered that the average American homemaker spends 9½ years of her life cooking meals for her family. She certainly deserves an attractive and efficiently arranged workshop for this important and time-consuming job of family feeding. The New Freedom Gas Kitchens of today are a well-balanced combination of handy wife-saving appliances plus colorful, decorative touches that make them as pretty as they are practical.

The experts advise kitchen planners to stick closely to the old saying about "first things first."

First selections for a new or remodeled kitchen should be the range and refrigerator. When the size and location of these two important pieces have been decided on, there's no trick at all to planning the most efficient arrangement of the work centers, cabinets and breakfast nook.

The automatic clock control gas range almost cooks meals by itself, giving the homemaker free time to do other household jobs such as washing, cleaning or making new curtains.

Would the homemaker like a medium-high oven to save stooping when looking at the cake she is baking? She can have it. And

she can have choice, too, in the location of burners for the top of the gas range. All burners give instantly responsive, easily controlled heat.

In a home equipped with an easy to use automatic washer, there is no need for a huge, exhausting washing on blue Monday. The homemaker can do a little every day and this routine is especially handy when the laundry equipment moves upstairs, right into the kitchen. While the laundry does itself, she can do the dishes, prepare lunch or bake a cake or pie. When the home is equipped with a fully automatic gas water heater, there is no chance of the annoyance of running out of hot water.

At the same time, the customer's month-to-month meter readings and bills are carefully checked to provide additional seasonal data. The softly-whirling meter with its owl-eyed dials records the data needed by the company.
The meter-reader who visits each home as unobtrusively as possible each month is probably the most widely known gas company employee. However, it takes a legion of other employees to operate a gas utility efficiently.
Installing new mains and keeping an uninterrupted flow of gas moving is an endless job for many workmen.
Protecting Mains
Protecting gas mains from rust and corrosion is a highly technical operation that is a vital concern of the nation's gas companies. Scientists have learned that when a pipe corrodes or rusts it is, in effect, returning to its original state of ore as mined.
The chemical changes that occur the rusting process are accompanied by a transfer of electrical energy so the job is either to halt the transfer or provide a harmless withdrawal of current.
And can't you put 'em right to work? I don't see that gas has any edge there."
"Oh but it has!" said the Manufacturers' Light and Heat man, warming to his work. "Oil and coal—and any other fuel except gas—have to be converted to gas before you can use 'em. That's actually what oil and coal stoves are, miniature gas-making plants. When solid or liquid fuels burn, they turn into gas, which in turn does your heating or cooking job. But Manufacturers' Company gas, which is neither solid nor liquid, comes to you through your gas meter, all ready to go when you turn on your appliances."
"Hm! Never thought of that," said our customer. "But aren't you forgetting about electricity? You get it through a wire, and surely it's efficient, isn't it?"
Electricity Poses Problem
"As power, electricity's wonderful," the Manufacturers' Company man said. "But look at this: Just like solid or liquid fuels, electricity has a generating problem. You've got to build a generating plant to make electricity. Then, when you've got it into your home or factory, you have to run it through special coils before you can get any heat out of it. But in the case of gas, especially natural gas, you just pump it out of a well, pipe it into your home, and burn it in a simple burner. It gives you a tremendous concentration of heat instantly—something that no other fuel can do. And with gas you have no storage problem, no delivery problem, no soot or ash problem."
"Mighty interesting. Mighty interesting," our customer said. "It's funny, though—until somebody tells you about 'em.'"

One method is called cathodic protection—a system of electrical wiring that draws off the current necessary for the corrosion process.
Trained Employees
Another valuable aid in combating corrosion is the coating of new gas mains with a tar-like material. The gummy substance is wrapped with paper before the main is placed underground. The paper protects the coating and the coating resists corrosion.
The maintenance of company facilities and the combined efforts of trained employees to meet every demand of the customer involve scores of behind-the-scenes operations.

Public Acceptance Of Natural Gas And "All Gas" Homes Are Enthusiastically Received

Public acceptance of natural gas and of modern, automatic gas appliances is at a record level in Gettysburg and communities of the Adams-Franklin-York County area, according to Julian Estep, local manager of the Manufacturers Light and Heat Company.

"Instead of leveling-off — as might be expected after ten years of unprecedented growth — the trend to gas seems on the threshold of an era even more fabulous than that just passed," he said.

"On the immediate horizon, area dealers, plumbers and distributors are predicting new peaks in gas appliance sales by the end of 1955. Another banner year is expected in 1956.

"And, to spark long-range gains, three new uses for gas — all introduced here in the past few years — are already taking hold and growing in popularity.

"The new uses are gas 'all year' air-conditioning, gas laundry and gas incineration. Joining the established superiority of gas for cooking, water heating, househeating and refrigerator, they bring to seven the uses of gas in the home.

"Brought under one roof, these seven uses make possible an entirely new concept in modern living — the 'all gas' home — a development revolutionizing the home building industry.

"Intense public enthusiasm for 'all gas' homes has already been demonstrated here by thousands of area residents who visited model 'Blue Flame Homes' this summer in Littlestown and Arendtsville.

"What's behind today's sensational trend to gas?" "One of the major factors," according to Estep, "has been the public demand for modern living conveniences.

"Coupled with that demand has been the determination of local gas appliance dealers, plumbers, distributors and home builders to keep pace with the emphasis on high styling and improved performance.

"And, underlying the entire phenomenon, are the attributes which combine to make natural gas today's 'most wanted fuel' — economy, dependability, efficiency, cleanliness and convenience.

"The economy of gas, together with the public's sense of 'cost consciousness' — inevitable in a period of high prices and inflation — are probably the most important factors.

"Homemakers have found that they are money ahead every year by going 'all gas' in preference to electricity, oil, coal or any combination of other fuels.

"Dependability is important, too. With gas, people

JULIAN ESTEP
Manager

HAROLD MILLER
Publicity

don't have to contend with storms and power failures holding up their meals or knocking out their refrigeration with costly spoilage of food."

"To insure its customers maximum benefits of the dependability of natural gas, Manufacturers Light and Heat Company has invested over \$111-million since 1945 in new and improved gas

Freezing Weather Causes Gas Jams

Like the Christmas mail rush, a Fourth-of-July traffic jam and bargain day in Macy's basement all rolled into one!

That's the effect on a gas delivery system when temperatures hit sub-freezing levels and thousands of homeowners simultaneously turn up their gas heat thermostats.

To cope with its seasonal rush periods, Manufacturers Light and Heat Company pumps in tons of cubic feet of gas each summer to its big underground storage fields.

The storage gas provides a close-at-hand supply of fuel when demands for gas exceed the volumes which can be piped here through long-distance pipelines.

GAS HEATER LIGHTENS CHORE

No part-time servant's your automatic gas water heater. You can call on it for all sorts of chores in addition to the day-to-day job of bathing clothes washing and shampooing.

From the food experts in the home service department of your gas company comes the tip that warm water is a great help in vegetable cleaning. Dishes and pots of soil are more easily and completely cleaned and will be delighted to find how much easier it is to scrub potatoes for baking or jacket-on boiling with warm water than with cold.

And that old bugaboo of cleaning the garage floor will seem a lot less tedious if you brush on a warm sudsy solution with an old broom and flush it down the drain with warm water.

Warm Water Role
Warm water plays an important role in the housecleaning chore of wall and paint washing. Detergents dissolve more quickly in warm water and a good supply of steam

delivery facilities," Estep continued.

"All these things point to ever-increasing sales of gas appliances by local dealers, plumbers and distributors, and to greater public enjoyment of modern living conveniences through natural gas," he added.

"For builders and contractors, the advent of the 'all gas' home is proving a 'shot-in-the-arm' to the residential construction industry and paving the way to a brighter and more prosperous tomorrow."

GAS YEARBOOK HAS COMPLETE FUEL HISTORY

The 1955 edition of "Gas Facts" the annual statistical yearbook of the American Gas Association, containing 1954 statistics on the gas utility and pipeline industry is now available. In a 272-page publication contains pertinent information on energy reserves, production, transmission and distribution, underground storage sales and utilization, finance, labor and prices, in addition to a brief section containing Canadian statistics.

While the current edition contains 1954 data for virtually all of the statistics contained in previous issues, it also includes considerable new material. Among the new features are a separate income statement and balance sheet for pipeline companies alone, from 1941 to 1954; additional statistics on exploratory drilling for natural gas and/or oil; detailed tables showing appliance shipments by size type of unit, and month of the year. The new edition also includes a table showing, for selected cities the cost (in cents per million BTU) of various residential heating fuels since 1941, together with suggested fuel efficiency factors.

Extra copies of "Gas Facts" are available from the Bureau of Statistics, American Gas Association, at its headquarters in New York at \$2 per copy for the first five copies and \$1.50 per copy for additional copies.

Statistics Issued
A condensed summary of gas industry statistics has been prepared and now is available for distribution. Entitled "The Gas Data Book," it is a pocket-sized publication measuring 3 1/2 by 6 1/4" and its 22 pages contains historical information on the principal measures of gas industry growth.

It is intended for easy reference when access to "Gas Facts" the

water makes it possible to change the water frequently on big wall washing jobs.

Any proud papa who has ever staggered out or oed with one eye open to warm the 2 a.m. bottle knows full well what a joy an automatic gas water heater is in a home where there's a baby.

So all around the clock, in every department of your homemaking you can count on your automatic gas water heater to make life easier and more pleasant.

ADVERTISE IN THE TIMES

detailed annual statistical year book of the gas industry is not available. It also is convenient and economical for distribution to large numbers of people desiring only a brief analysis of the gas industry. For detailed information "Gas Facts" will still be necessary, but it is hoped the summary will make available to a larger audience some of the basic industry facts. Many organizations may wish to make this pocket reference volume available to employees or use it for distribution at local meetings with customers, housewives' business men stockholders or similar groups. Costs are 50 cents for the first copy and additional copies at 25 cents each. Copies of the "Gas Data Book" also are available at the A.G.A. Bureau of Statistics.

Poll Shows People Aren't All Heroes

BALTIMORE (AP) — An inquiring photographer's poll here on the question, "What would you do if you were in a bank while it was being held up?" doesn't reveal any really "Darling Dan's."

The fightingest answer came from a young man who said: "If I had a chance to get away I would. If no I'd stand there with all the other scared people."

Another man, said he "wouldn't do a thing, the money I had wouldn't be worth fighting over."

Of the three women interviewed, one said she would "hand over my money with no fuss." But she added she thinks she'd remember to get all the identifying marks of the robbers. Another said she might try hiding her money in her blouse or a trash can, but "I certainly would not do anything foolish." The third said she would "drop dead on the spot."

GAS PROJECT RACKS NERVES; CREATES RISK

The gas industry's constant probing for new reserves of "stored sunshine" in the depths of the earth is as nerve-racking and financially risky as trying to produce a hit play on Broadway.

Drilling a well thousands of feet down through rock, limestone and clay involves all the drama of a detective "whodunit." The mystery lies in locating a well site by careful exploration and scientific study of soil conditions.

There's adventure aplenty, too. Like a colorful South Sea voyage, a day-by-day log of drilling operations is maintained. Rock samples are periodically tested with chemicals, by smell, and sometimes by taste, to determine the character of the underground formations being penetrated.

Dome Traps Gas

These preliminary scenes set the stage for what is hoped to be the climactic appearance of oil or natural gas-bearing sand which, thousands of years ago, was "capped" by a natural dome of rock. The

dome trapped the oil or gas for use today.

Like a big theatrical production, drilling for gas and oil is a huge financial risk. Preliminary surveys, the leasing of land, the cost of equipment, and the employment of skilled crewmen all add up to an investment of many thousands of dollars.

And, just as many Broadway shows are box office flops, odds against a successful producing well are high. For example, there were 10,675 "wildcat" wells drilled in 1953. Of these, 9,254 were "dusters." Only 133 per cent, or 1,421, of the wells drilled in unproven territory were producers.

Cable Vs. Rotary Drilling
Cable drilling, the oldest but least used method, consists of lifting and dropping a steel chisel which eats its way slowly into the earth. The newer method, rotary drilling, grinds the rock into little chips by turning a toothed cog-wheel against the hard stone surfaces.

Water is poured into the well hole of a cable drilling operation to keep the cutting edge cool and to keep the rock particles in a mud solution for a more precise slicing motion of the steel bit.

A chemical compound, commonly referred to as plain "mud," is used for rotary drilling. The compound is forced down the pipe and back to the surface to remove

the rock particles and also to cool the bit.

Detects Gas Pocket

From the murky cuttings, drillers can tell how near they are to striking the "pocket" containing gas or oil. However, Mother Nature has a flair for mystery too, secreting her bounty of fuel sometimes a few hundred feet from the surface, or thousands of feet away or, perhaps, a few feet to the side of the drilling site.

A casing, which is a lining of pipe in the well hole, offsets many hazards of drilling. After the initial drilling, a string—several lengths of pipe—is sunk into the hole. Each string diminishes the size of drill bit which can be used so the approximate depth of the well must be calculated ahead of time.

The casing, which is cemented into place, is in the shape of a vertical telescope with the big end at the surface and the small end at the bottom.

Tension Rises

The tense moment for the wearied drillers comes when they prepare to tap the reservoir to learn whether the well is a hit or a flop—a dry hole.

A pipe, sealed at the bottom end, is lowered into the hole, followed by a special tool, called a perforating gun. Then, as the helmeted, mud-spattered drillers wait, steel-jacketed bullets are shot through the casing.

If the well is the hoped-for producer, natural gas charges upward at as much as a thousand pounds of pressure. Where the gas-containing formation is not porous enough, a special acid is used to increase the permeability to enable the gas to escape more readily.

Purify Tubing

To assure a clean flow of gas, clear water is fed into the well to wash the tubing and casing.

In a few days, the drilling rig is removed. Nothing remains but a pipe and valve, known as a "Christmas Tree." But the show does not end here. The derrick will be moved to another location to search for more natural gas.

Episcopal Rector Goes Back To Job

HAYES STORE, Va. (AP) — Retirement? Most folks look forward to retirement but not the Rev. Edgar C. Burns, 75, rector of Abingdon Episcopal Church.

He tried it once for five months, but that was seven years ago. He asked the bishop to put him back to work and says he will never try it again. He was an employee of the New York State Prison Department prior to his ordination in 1920 and decided to go into the ministry while teaching printing to prisoners in Sing Sing.

Tune In WGET, 1450 On Your Dial

STORAGE SYSTEM HAS STAR ROLE

The gas industry's underground storage system plays a star role in filling the nation's fuel needs for house heating during the cold winter months, J. N. Estep, of the Manufacturers Light and Heat Company, said today.

Estep explained that since fuel gas demands during the coldest day of winter are likely to be 30 times as great as on the hottest summer day, natural gas must be held in readiness.

He pointed out that although the nation's giant pipeline system is able to carry an average daily load of over 19 billion cubic feet of gas, the demand of more than 30 billion cubic feet on the coldest day of the year must be partially filled with "stored sunshine."

Storage Effect

Estep illustrated the far-reaching effect of underground storage with figures from last year's record. On

the peak day of last year's heating season, 5.1 billion cubic feet of storage gas was fed into the nation's natural gas mains. That was 18 per cent of the total natural gas supply on that day.

Taking another page from the record, Estep said natural gas was stored in 167 fields in 17 states. These fields have an ultimate capacity of one trillion, 735 billion cubic feet. Twelve new pools under construction are expected to add 314 billion, 679 million cubic feet of gas storage space.

Gas utilities which are not located near underground storage pools or are not connected to them still benefit. Filling underground pools in the summer frees other pipelines to carry additional gas for winter peaks.

OLD COW HAND

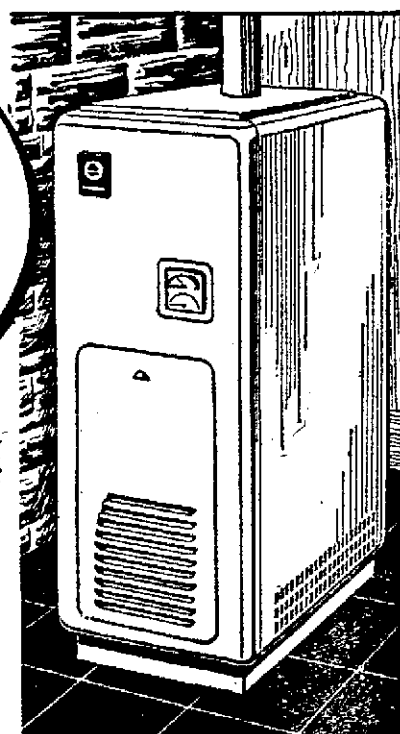

CITRA, Fla. (AP) — When John Hagan says "I'm an old cow hand" he really means it. He's 82 and still rides the range every day. Hagan's 2,000-acre ranch is normally much under water but there is plenty of space to ride.

- Fire Wall Combustion Chamber
- Heated Air Circulation
- American Gas Association Seal

Here's What **DUO-THERM** does For You ...

- Circulates a houseful of clean, quiet, thrifty heat—no work, dirt or ashes.
- Beautifies your home with fine-furniture console styling, smart mahogany finish.
- Exclusive Duo-Therm Equi-flame Burner gives steady, uniform heat at any and every fire setting low to high.
- Extra-large heat chamber and Econoizers put more heat in your home.
- 4 wide-opening radiant doors. Fully vented. Available for any type gas, including bottled gas. 65,000 BTU input.

Exclusive Duo-Therm Automatic Power-Air Blower circulates heat by force, saves up to 25% on fuel.
Duo-Therm Thermostat with Exclusive Comfort-Selector gives fully automatic control, tailors fire to weather.

an **ARMSTRONG** **Steel** **GAS-FIRED** **FURNACE** will heat your home

AUTOMATICALLY... ECONOMICALLY

You can be sure of constant and uniform room temperature when you install an ARMSTRONG gas-fired heating unit. It requires no attention. Just light it in the Fall; set the room thermostat at temperature desired; and forget it. American Gas Association approved—of course. Call us today for additional information.

Heat with

Good-bye to smelly garbage cans and smudgy back-yard fires!

ALL-NEW
DUO-THERM
DIRECT FIRE
Gas Incinerator

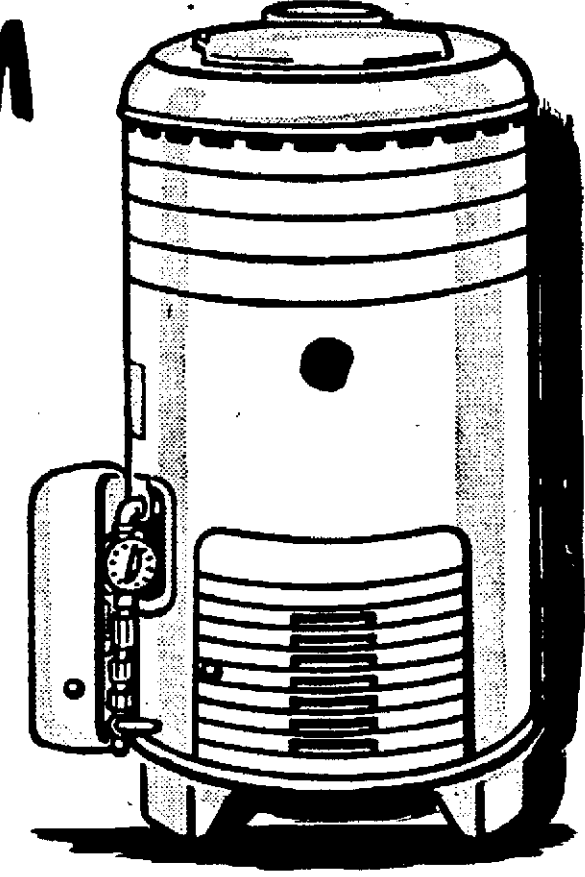

- Gets rid of all garbage wet or dry and all burnable trash... with fast, sanitary Direct Fire! Today's refuse is gone today!
- Saves you messy work and outdoor trips. Discourages rats, flies, pests. None of the fire hazards of back-yard burning.
- Easily installed in basement, garage, yard. Works for a few cents on any type gas. Round design leaves no corners for leftovers. Triple-wall construction keeps sides "touch cool." Lasts for years.

You'll Appreciate Our **EASY TERMS!**

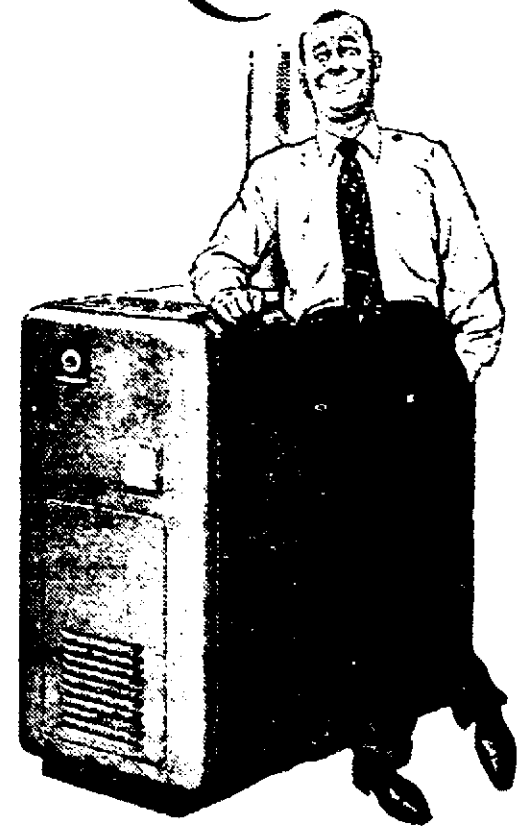

LOAD IT Toss in as much as 2 big bushels of burnable trash and garbage at a time!

DIAL IT Duo-Therm Target Jet Burner quickly reduces refuse to a little fine ash useful as lawn fertilizer.

FORGET IT Shuts itself off when load is consumed (Manual Control models available.)

For clean automatic heat all winter long... Get your new **AMERICAN-Standard** **BOILER** **NOW**

- You get ...
- ★ abundant, even heat ... where you want it
 - ★ automatic, work-free heat ... when you want it
 - ★ clean, draft-free heat
 - ★ reduced fuel bills and upkeep
 - ★ dependable heating ... year after year

Metal Seal With Blue Star On White Circle Is Approval Symbol On Modern Gas Range

The lady of the house has made up her mind. She wants a gas range.

But in the store, surrounded by handsome new models, she is stuck by an appalling thought: How can she be sure the one she picks out will work right in her home, stand up after years of wear, be safe?

She can be sure — if the range she selects bears a little metal seal with a blue star on a white circle.

That is the American Gas Association's Approval Seal, the sign that takes the guess out of buying a gas range. And 95 per cent of all gas appliances wear it.

Before being awarded the A. G. A. Approval Seal, a range has to pass hundreds of tests for safety,

durability and performance.

One test, for example, is a rugged workout of the burner valves. A machine turns the valves on and off 10,000 times within a few hours. And if the valves stand up after that kind of treatment, they're really cooking with gas.

Stiffer Tests

And each year the tests get stiffer. As scientific research develops appliances with even greater safety and durability, the requirements are constantly being upgraded.

The range, of course, is not the only appliance tested by A. G. A. Laboratories in Cleveland, Ohio, and Los Angeles, Calif. Tests take in more than 6,000 models of gas equipment, divided into 31 classifica-

tions including ranges, clothes dryers, water heaters, and refrigerators.

Established 30 years ago by the gas industry on a purely voluntary basis, the A. G. A. Laboratories have won acclaim from numerous governmental groups.

The U. S. Bureau of Mines, for example, says: "The American Gas Association Laboratories have achieved a leading position in creating public confidence in gas equipment carrying the A. G. A. Blue Seal, thus promoting safe, durable and efficient gas appliances."

Sample Tested

In fact, the testing program has been so effective, the A. G. A. Approval Seal is now required on all gas appliances sold in many areas.

How does a manufacturer go about getting the seal for his appliance, to reassure the homemaker she's getting the best possible product?

When a manufacturer develops a new model, he ships a sample to A. G. A. Laboratories. Then the

HEY, WHAT'S COOKIN'? This small boy loves what comes out of the oven. His mother appreciates the oven's dependable performance. The oven in this matchless gas range lights automatically and preheats in jig time when gas is turned on — no matches, no waiting around for warm-up. Heat is evenly distributed for even browning. The oven heat control automatically maintains an even temperature. In meat roasting, this controlled heat decreases shrinkage.

tests for construction safety and performance get under way.

Take what happens to the range: Engineers inspect the range to make sure it is neat, sturdy and smooth-edged. It must be easy to install, repair, clean and adjust.

Further, it must be impossible to put the removable parts back improperly after they've been taken apart for cleaning. This is in behalf of all those ladies who are not mechanical geniuses.

That's only the first step, though. The engineers get rough with the range next. It's squeezed, pushed and loaded down with weights.

Temperature Watched

Walls and floors near the range have their temperature taken while the stove is operating at capacity to make sure they remain far below the danger point for causing a fire.

To determine the baking evenness of the oven, the engineers whip up a four-layer cake. The four layers are baked at the same time, two on the bottom shelf and two on the top. After they have cooled they are examined with a photoelectric reflectometer, a delicate instrument which indicates any variation in color. All four layers must be baked an even brown to meet A. G. A. requirements.

For the cook's convenience, burner trays must have raised sides and tight corners to catch spill-overs, smooth edges, rust-resistant finishes and easy removability.

And this is only the beginning. Few new models make the grade the first time, says the director of the Laboratories in Cleveland.

After an appliance has passed all tests, has been awarded the approval seal, the manufacturer may produce that model with the seal. Only, of course, if each appliance

GAS HEATER IS SILENT SERVANT

In the days when all the hot water for the household had to be heated on the kitchen stove, the American people did not go in as enthusiastically for soap-in-water routines as they do now when they can get all the hot water they want with a simple twist of a faucet. With the convenience of modern gas water heating, it's no wonder the average person consumes 11 gallons of hot water per day.

The gas water heater is a silent servant, on duty every hour of the day and night — seven days a week — bathing the baby, softening dad's whiskers, shampooing hair, washing clothes and dishes and supplying baths for the whole family. It serves countless purposes.

is exactly like the one that passes the tests.

Inspection Continues

The Laboratories' work doesn't end there. A team of inspection engineers drops in unannounced on a manufacturer's plant, in a dealer's display room, or in a home to see that the approved models don't vary a whit from the original.

The homemaker, standing in the dealer's store surrounded by the handsome new ranges, has decisions to make about color, size, style and other specifications dear to a lady's heart. But as for performance, durability and dependability — if there's that little metal seal with a blue star on a white circle, she needn't give them a worry.

The steel industry used more than 13 billion tons of water last year in its plants.

GAS PROVIDES CLEANER, SAFER EFFECTIVE FUEL

The production of natural gas for millions of consumers in America is as arduous and complicated as the training and development of a champion colt.

The initial step in preening this thoroughbred for its ultimate place in the flue flame winner's circle is a process of separating gas from its field mates — chemicals and impurities.

Sand is the first to be left by the wayside. Sand settles out when the speed of the gas flow is reduced. The gas is passed through a tall tank larger in diameter than the pipeline. Entering the tank at the middle, the gas passes out at the top while the sand drops to the bottom. When oil is present with gas it is removed in much the same way.

Undergoes Scrubbing

A good scrubbing is in order after the sand is removed. A scrubber is a tank partially filled with oil. As the gas passes up through the oil and rises to the top outlet, the dust is trapped by the sticky petroleum.

A "drip" takes over the next phase of natural gas production. A drip, in this case, is a catch basin connected to the pipeline. The water is carried off as the lighter-than-air gas flows over the

mouth of a basin located at a level lower than the pipeline.

Water vapor is another troublemaker that must be withdrawn. It can be removed by heating the gas to condense the vapor into a liquid state or through a process of dehydration. Through dehydration, the gas is brought into contact with a liquid or solid which is "thirsty" for water — like an ordinary sponge.

Extract By-products

Hydrocarbons are often valuable stabilizers of natural gas. They are extracted by methods similar to those used to remove impurities — condensation into a liquid state or by absorption. Most of these prized by-products become liquids under certain pressure conditions.

Bottled gas is one of the important hydrocarbons and, others serve as raw materials for a wide range of chemical products, including synthetic fibers, synthetic rubber, alcohol, plastics, insecticides and ammonia fertilizers.

Helium, a non-inflammable light gas, better known for its use in inflating dirigible balloons, also is an important gas by-product. One of its newer applications is its use with electric arcs during the welding of magnesium. Helium is used to prevent the magnesium from bursting into flames.

Devise Conservation Method

Trillions of cubic feet of natural gas were flared or blown into the air by oil well producers in the past but a conservation method known as recycling has proved to be a boon to both the gas and the oil industries.

Oil wells, which produce at least

GAS HOT WATER HEATER ROLES

A constant supply of good hot water from your automatic gas water heater is more than a convenience for ordinary soap and water chores around the house — it is also a help in keeping your family as healthy as possible.

Health authorities are always stressing the importance of frequent warm water hand washing for children and adults as a form of disease prevention.

Proper washing of eating utensils in hot water is another always-to-be-observed family health rule.

Is one of your small fry in the toy chewing stage of his development? Better keep his possessions well scrubbed. And heating Junior's bottle to just the proper temperature is an easy health routine in the home equipped with a modern gas water heater.

An automatic water heater is a blessing in the home where illness makes it necessary for the homemaker to double as a nurse. The easy regulation of temperatures on a modern gas water heater insures a ready supply of water at the right temperature for frequent washing of night clothes and bed linens, giving sponge baths and sterilizing.

a third of the supply of natural gas, are re-pressured by the gas to force additional petroleum to the surface.

Gas Industry Stages Major Treasure Hunt; Probe Depths For Natural Gas Reservoirs

The industry operates a unique banking system thousands of feet below the surface of the earth where its treasury is filled—not with gold and silver ingots—but with billions of cubic feet of natural gas.

Depleted oil or gas fields and natural formations of porous earth and rock in the depths of the globe are used as air-tight vaults, in which a ready supply of miracle fuel is kept on hand.

Underground storage is a comparatively new engineering development, but within the last few years it has become vital to the conservation of America's natural resources and to the economy of gas industry operations.

Underground Storage
The reduction of waste is one of the greatest contributions from the underground storage program. Gas which cannot be used immediately can be saved for a "rainy day."

Much of the gas which in the past would have had to be flared in the field because of lack of markets, is now delivered to underground storage facilities. Underground storage permits gas produced in excess of requirements in the summer time to be saved until needed in the cold winter months.

Underground storage first was used in 1915 in Ontario, Canada, and

a few years later was utilized in some parts of the United States. The widespread use of "stored sunshine" in this country came shortly after World War II when the demand for gas service soared to unheard-of proportions.

Large Investments
The industry began to invest millions of dollars in the acquisition of underground storage reservoirs and launched a huge search for king-sized "piggy banks" in the depths of the earth.

Although there are thousands of non-productive and depleted oil and gas fields, the ideal storage facility is located as near as possible to pipelines, compressors and, most of all, large market areas.

Once a depleted oil or gas field is selected as the site for a storage reservoir, it must be reconditioned to receive the gas. The casing and tubing in the wells must be repaired or replaced and the well should be washed with oil or chemicals. In cases where the old well is beyond repair, it must be redrilled or replaced by a new well. When an abandoned well is not used, it must be properly plugged.

Dry Reservoirs
Wells are deliberately drilled in the search for non-productive subsurface formations of porous rock which are naturally sealed by other rock strata or water to prevent gas from escaping. Geological and engineering techniques like those used in the exploration for productive reservoirs are used to probe the

earth for dry reservoirs.

As the stored gas is withdrawn from the underground bank in response to a "call" brought about by cold weather, it is cleaned and dried to condition it for its travel through the pipeline network to the user's appliances.

To date, the gas industry has invested more than 343 million dollars in underground storage construction. During the next three years, more than 65 million dollars more will go into this program.

Huge Reserve
There are 172 separate underground storage pools in 17 states today which are capable of storing one trillion, 459 billion cubic feet of natural gas.

Meanwhile, the acquisition of 12 new pools will add another 180 billion, 490 million cubic feet to the nation's underground storage capacity.

The benefits of the constant expansion of the industry's savings system are passed on to the customers through lower costs as a result of the conservation of gas and more economical operations.

ALBUQUERQUE, N. M. (AP) — Albuquerque police are wishing the were all this easy. Investigating a burglary in an Albuquerque home, they found a wallet chock-full of identification, obligingly dropped by one of the burglars. The arrest followed in short order.

GAS COMPANIES PROMOTE SERVEL DISTRIBUTION

Appointment of the Manufacturers Light and Heat Company and other Pittsburgh group companies of the Columbia Gas System as authorized distributors in their operating areas for the new Servel all-year gas air-conditioner was announced today by G. E. Wilson, assistant vice president for distribution and business promotion.

The announcement confirmed industry reports that gas utility firms across the nation are uniting with Servel for an unprecedented all-out assault on the new and existing home air-conditioner market.

Wilson said all Columbia Gas affiliates are accepting distributorships at the request of Servel. They will channel the air conditioners through established heating contractors and residential development builders.

Firms Responsible
The distributorship assignment places upon manufacturers and all Columbia firms the responsibility for cooperative market research and sales promotion in connection with the Servel air-conditioner. They will oversee all engineering, layout, installation and servicing in market areas served by their lines.

One of the prime targets of the intensive campaign will be the mushrooming new-home market — where volume building is adding to current demand for air-conditioning.

"We're pushing the Servel air-conditioner because it is gas-fired and, by adding to our year-round volume, can help keep our rates low," Wilson said. Right now, Servel happens to be the only maker of gas air-conditioners in full production. As other manufacturers introduce similar equipment, we will actively promote for them, too."

No Appliance Change
The new program will not alter the companies' present work in sales support of gas-appliance dealers.

Columbia operating companies will confine their selling efforts to the small tonnage field — Servel's two-ton, three-ton, and five-ton air-conditioning units.

Demmler Bros. Company, a Pittsburgh heating and air-conditioning firm, will continue as the distributor in manufacturers' service area for Servel's 25-ton "water chiller type" air-conditioner, Wilson said. He said manufacturers will help Demmler promote that unit.

The entire distributor-organization assignment within the Pittsburgh group companies will fall to the Business Promotion Department, Wilson said.

Only Democrats Can Type Governor's Talk

SANTA FE, N. M. (AP) — The statehouse employment situation gets a little "funny" at times.

Came a plea recently to mimeograph the governor's speech to the 1955 legislature. Typists were needed. Lala Ortiz, secretary to Revenue Commissioner Mike Gallegos, said there were too many Republican typists and not any Democrats in the statehouse. She thought the Democratic governor's speech ought to be handled only by Democrats. The windup was the speech typed by girls in the State Education Department, headed by a Democrat.

Peterson Is Named Director Of A.G.A.

John C. Peterson, president of The Manufacturers Light and Heat Company, was elected a director of the American Gas Association at its annual convention this week in Los Angeles.

He will serve a four-year term on the board of the national trade association of the fifteen billion dollar gas industry.

Mr. Peterson joined Manufacturers and its affiliated Pittsburgh Group Companies, Columbia Gas System, in 1930. He has been president since 1952.

The Pittsburgh group serves some 450,000 retail gas customers in Pennsylvania, New York, Ohio, West Virginia and Maryland.

FALL CAMPAIGN FOR GAS RANGES IS INTENSIVE

The annual 1955 Fall Matchless Gas Range campaign is underway. Dealers, manufacturers and gas companies from coast to coast are looking forward to the biggest, most intensive campaign in their history.

Optimism is the keynote of this year's campaign, based on the fact that gas range sales for the first seven months of 1955 are already over the million and a quarter mark, an increase of 13.5 per cent over the same period last year. With factory billings of \$120,000,000 already on the books, the industry hopes to hit new sales records during the three-month run of the campaign, September through November.

Buying Height
Opening as it does at the height of seasonal buying, the campaign will push the advantages of gas as a fuel and the automatic features offered in today's gas ranges.

The buying public is encouraged to take an active part in the campaign and interest runs high in local communities. The excitement and festivities that accompany the promotion, both nationally and locally, generally end with the customer selling himself on gas appliances.

Generous trade-in allowances, easy financing, and the wide choice

of styles and prices of modern ranges are the factors attracting husbands and wives to dealers' showrooms during the campaign.

Displays Common
Complete kitchens are set up in many areas to show the public what good kitchen planning can do for their homes. It is interesting to note that husbands are just as interested as their wives in the latest features of gas appliances. Built-in units, colored and metallic finishes, automatic timing devices and modern styling offer tremendous selling points for the dealer who has an interested public clamoring to see and learn more about these features.

Mrs. Ramona Deltemeyer, Mrs. America of 1956, winner of the gas industry's \$750,000 nationwide

Lawyer Passes Bar By Skin Of Teeth

Metal Seal With Blue Star On White Circle Is Approval Symbol On Modern Gas Range

The lady of the house has made up her mind. She wants a gas range.

But in the store, surrounded by handsome new models, she is stuck by an appalling thought: How can she be sure the one she picks out will work right in her home, stand up after years of wear, be safe?

She can be sure — if the range she selects bears a little metal seal with a blue star on a white circle.

That is the American Gas Association's Approval Seal, the sign that takes the guess out of buying a gas range. And 95 per cent of all gas appliances wear it.

Before being awarded the A. G. A. Approval Seal, a range has to pass hundreds of tests for safety,

durability and performance.

One test, for example, is a rugged workout of the burner valves. A machine turns the valves on and off 10,000 times within a few hours. And if the valves stand up after that kind of treatment, they're really cooking with gas.

Stiffer Tests

And each year the tests get stiffer. As scientific research develops appliances with even greater safety and durability, the requirements are constantly being upgraded.

The range, of course, is not the only appliance tested by A. G. A. Laboratories in Cleveland, Ohio, and Los Angeles, Calif. Tests take in more than 6,000 models of gas equipment, divided into 31 classifications including ranges, clothes dryers, water heaters, and refrigerators.

Established 30 years ago by the gas industry on a purely voluntary basis, the A. G. A. Laboratories have won acclaim from numerous governmental groups.

The U. S. Bureau of Mines, for example, says: "The American Gas Association Laboratories have achieved a leading position in creating public confidence in gas equipment carrying the A. G. A. Blue Seal, thus promoting safe, durable and efficient gas appliances."

Sample Tested

In fact, the testing program has been so effective, the A. G. A. Approval Seal is now required on all gas appliances sold in many areas.

How does a manufacturer go about getting the seal for his appliance, to reassure the homemaker she's getting the best possible product?

When a manufacturer develops a new model, he ships a sample to A. G. A. Laboratories. Then the

HEY, WHAT'S COOKIN'? This small boy loves what comes out of the oven. His mother appreciates the oven's dependable performance. The oven in this matchless gas range lights automatically and preheats in jig time when gas is turned on—no matches, no waiting around for warm-up. Heat is evenly distributed for even browning. The oven heat control automatically maintains an even temperature. In meat roasting, this controlled heat decreases shrinkage.

GAS PROVIDES CLEANER, SAFER EFFECTIVE FUEL

The production of natural gas for millions of consumers in America is as arduous and complicated as the training and development of a champion colt.

The initial step in preventing this thoroughbred for its ultimate place in the blue flame winner's circle is a process of separating gas from its field mates — chemicals and impurities.

Sand is the first to be left by the wayside. Sand settles out when the speed of the gas flow is reduced. The gas is passed through a tall tank larger in diameter than the pipeline. Entering the tank at the middle, the gas passes out at the top while the sand drops to the bottom. When oil is present with gas it is removed in much the same way.

Undergoes Scrubbing

A good scrubbing is in order after the sand is removed. A scrubber is a tank partially filled with oil. As the gas passes up through the oil and rises to the top outlet, the dust is trapped by the sticky petroleum.

A "drip" takes over the next phase of natural gas production. A drip, in this case, is a catch basin connected to the pipeline. The water is carried off as the lighter-than-air gas flows over the

mouth of a basin located at a level lower than the pipeline.

Water vapor is another troublemaker that must be withdrawn. It can be removed by heating the gas to condense the vapor into a liquid state or through a process of dehydration. Through dehydration, the gas is brought into contact with a liquid or solid which is "thirsty" for water — like an ordinary sponge.

Extract By-products

Hydrocarbons are often valuable stabilizers of natural gas. They are extracted by methods similar to those used to remove impurities — condensation into a liquid state or by absorption. Most of these prized by-products become liquids under certain pressure conditions.

Bottled gas is one of the important hydrocarbons and, others serve as raw materials for a wide range of chemical products, including synthetic fibers, synthetic rubber, alcohol, plastics, insecticides and ammonia fertilizers.

Helium, a non-inflammable light gas, better known for its use in inflating dirigible balloons, also is an important gas by-product. One of its newer applications is its use with electric arcs during the welding of magnesium. Helium is used to prevent the magnesium from bursting into flames.

Devise Conservation Method

Trillions of cubic feet of natural gas were flared or blown into the air by oil well producers in the past but a conservation method known as recycling has proved to be a boon to both the gas and the oil industries.

Oil wells, which produce at least

GAS HOT WATER HEATER ROLES

A constant supply of good hot water from your automatic gas water heater is more than a convenience for ordinary soap and water chores around the house — it is also a help in keeping your family as healthy as possible.

Health authorities are always stressing the importance of frequent warm water hand washing for children and adults as a form of disease prevention.

Proper washing of eating utensils in hot water is another always-to-be-observed family health rule.

Is one of your small fry in the toy chewing stage of his development? Better keep his possessions well scrubbed. And heating Junior's bottle to just the proper temperature is an easy health routine in the home equipped with a modern gas water heater.

An automatic water heater is a blessing in the home where illness makes it necessary for the homemaker to double as a nurse. The easy regulation of temperatures on a modern gas water heater insures a ready supply of water at the right temperatures for frequent washing of night clothes and bed linens, giving sponge baths and sterilizing.

A third of the supply of natural gas, are re-processed by the gas to force additional petroleum to the surface.

GAS HEATER IS SILENT SERVANT

In the days when all the hot water for the household had to be heated on the kitchen stove, the American people did not go in as enthusiastically for soap-in-water routines as they do now when they can get all the hot water they want with a simple twist of a faucet. With the convenience of modern gas water heating, it's no wonder the average person consumes 11 gallons of hot water per day.

The gas water heater is a silent servant, on duty every hour of the day and night — seven days a week — bathing the baby, softening dad's whiskers, shampooing hair, washing clothes and dishes and supplying baths for the whole family. It serves countless purposes.

is exactly like the one that passes the tests.

Inspection Continues

The Laboratories' work doesn't end there. A team of inspection engineers drops in unannounced on a manufacturer's plant, in a dealer's display room, or in a home to see that the approved models don't vary a whit from the original.

The homemaker, standing in the dealer's store surrounded by the handsome new ranges, has decisions to make about color, size, style and other specifications dear to a lady's heart. But as for performance, durability and dependability—if there's that little metal seal with a blue star on a white circle, she needn't give them a worry.

The steel industry used more than 13 billion tons of water last year in its plants.

EXPRESS SYSTEM HURRIES FUEL ACROSS NATION

Natural gas, one of the best known transcontinental travelers, is whisked across the country by its own multi-million dollar pipeline transportation system.

The invisible passenger, freshly cleaned and scrubbed, goes aboard the "Pipeline Express" with a first-class ticket to the millions of users throughout the nation.

Moving night and day underground, over mountains and across rivers and streams, the efficient flow of natural gas often is maintained by "booster" stations along the way.

Gas Dispatcher

Millions of dollars are invested in equipment and labor to keep gas

rolling along in sufficient supply in a tip-top condition. The head traffic "cop" in the gas transmission world is the dispatcher.

The moment gas leaves the field and enters the pipeline, the dispatcher is in control. No one opens or closes a valve without his permission. He alone decides what pressure and horsepower should be applied where and when.

Besides being a traffic director, a dispatcher must be a weather prophet, a multi-telephone handler, radio announcer and, in general, the pulse-taker of the entire system.

Customer's Needs

The primary factor involved is the customer's needs—past, present and future. The gas market is calculated for months, and perhaps, years ahead.

Cold weather, of course, brings a heavy demand for gas, but pipelines are just as busy in the summer. During the warm months, the use of gas by industries is increased. Also, gas going into underground storage pools keeps the summer flow going at a rapid rate.

Because natural pressure in many wells is not enough to deliver gas to its destination in sufficient quantities, compressor stations are needed to boost the pressure and speed of delivery.

Compressor Stations

At the same time, friction in the pipe slows the travel speed of gas so it has to be given a push along from one compressor station to another.

Compressor stations contain engines with thousands of horsepower which keep the gas moving as much as 1,000 pounds of pressure. Compressing gas is much like baling hay or cotton. The gas is squeezed so it will occupy a smaller space and have more "kick" when it flows through the pipeline.

Pressure is important in what is known as a "line pack" operation. Since the amount of gas packed into the lines can be adjusted over a wide range by varying the pressure, more gas can be pressed into the lines to help meet increased demands for gas during cold snaps.

Underground Storage

The summer operation of filling underground storage pools also provides adequate gas supplies near consumer markets during the cold months, when the demand for fuel gas soars.

At each station there is a battery of scrubbers, a series of tall steel towers that separate foreign particles from the gas. At the same time, the gas is dried to clear out any water vapor that might cause operating trouble.

Operating men watch the pipeline day and night. Modern laboratories are set up along the route to test samples and flow. Frequent efficiency tests detect signs of accumulated distillates, water or dirt that might have escaped the filters and driers.

Cleaning Pipeline

To keep the pipeline clean and operating at top efficiency, a "pig"—the same kind used to clean out pipelines during construction—is run through the line, pushing the foreign matter ahead for removal at the next station.

Like track-walkers on railroad lines, inspectors periodically cover every inch of the pipelines on foot. They look for leaks or erosion around the pipe and report it for repair.

Supplementing foot inspectors are air patrols. Planes or helicopters patrol the lines, looking for yellow patches of turf which signal line leaks. Using all the modern communication devices, the patrols notify a mobile repair unit of the leakage. In a short time, this unit is on the site to divert any serious trouble. The gas is checked once more before it enters the mains of customers.

After it is inspected for cleanliness, it goes through a measuring device and into the distribution utility's regulators.

Although the pipelines may carry gas at as much as hundreds of pounds of pressure, it is cut down to as little as a few ounces of pressure for gas customers' appliances.

FIRST PARENTS SEE GROWTH OF GAS INDUSTRY

A new baby in any household creates endless problems as well as many blessings. The birth of the gas industry was no different.

At first, the parents of this newborn child were not sure how to handle it, how to care for it. Its character and makeup were unclear, and as it grew, the problems of rearing this strapping lad of unimaginable potential expanded tenfold.

The Chinese of centuries before found gas in its "creeping" days when they first learned that gas could be used to heat vats of brine to refine it into salt.

Then, one of the infant's first steps came in 1792 when a Scotsman, William Murdoch by name, succeeded in manufacturing gas from coal. He used it to light his cottage and office.

This was the first and biggest step forward. But it was merely the beginning of a process of growing into manhood—the initial stride that would lead eventually toward today's giant \$14 billion industry serving more than 27 million customers in the United States.

The gas giant still was a long way from maturity when, in 1812, the London and Westminster Gas Light and Coke Company was chartered to light the streets and homes of the British capital.

Migrates To U. S.

This knee-pants youngster migrated to the U. S. within a few years. The next we heard from him was in Philadelphia, in 1796, when the M. Ambrose and Company, Italian fireworks manufacturers, arranged a coal gas lighting exhibition.

Gas got its first long pants in America in 1810, when the city of Baltimore chartered a coal gas manufacturing company to light its streets and homes.

Natural gas made its bow into public use only a few years later—in 1821 when citizens of Fredonia, N. Y., tapped a 27-foot gas well and overturned a barrel on the well-head to provide pressure. These townspeople discarded whale oil and candles to light their homes and shops. Gas cooking gained notice for the first time when the Marquis de Lafayette was served a dinner cooked by gas flames at a Fredonia inn.

Accepted Gradually

However, the early years of the gas industry were lean and long. This ambitious youth was accepted rather slowly. Gas for lighting was the main sale product at that time. And, through the years, kerosene and its successor, the incandescent electric lamp, put up stiff competition for the gas industry.

As a result of the heavy pressure from lighting rivals, the industry graduated from its carefree youth to a level-headed maturity. Service was expanded and methods of operation improved.

Research for wider utilization of gas resulted over the years in the discovery of more than 25,000 in-

fore it enters the mains of customers. After it is inspected for cleanliness, it goes through a measuring device and into the distribution utility's regulators.

Although the pipelines may carry gas at as much as hundreds of pounds of pressure, it is cut down to as little as a few ounces of pressure for gas customers' appliances.

dustrial uses for gas and seven mighty important home uses—cooking, heating, water heating, incineration, refrigeration, air conditioning and clothes drying.

Transport Problems Arise

One major barrier to the growth and maturity of the gas industry that came hand-in-glove with wider usage of the "magic blue flame" was the problem of transporting gas from the fields to the customer. This involved the movement of gas over distances as great as thousands of miles.

The initial experiment to transport gas for any distance was the use of hollowed-out logs in 1870 to carry natural gas twenty-five miles, from West Bloomfield to Rochester, N. Y. Although this project was dropped as a "bust" after about two years, the gas industry refused to be licked.

Iron pipe, first used in 1872, became the forerunner of today's almost unbelievable network of gas pipelines. This new and improved underground transportation system now stretches out 435,000 miles—enough pipe to span the world 18 times.

This child of nature that has grown into our giant gas industry still grows. It expands at the rate of a billion dollars a year—promising no end to its greatness and value as a wondrous gift to the home, science and industry.

BUILDS NEW ADDITION

A large addition is being constructed to the Fred B. Nair building, Mercersburg R. 1. It is planned to have the building open to the public in November. The display room will have a glass fronting of 40 feet and 60 feet in depth. Nair deals in brand name merchandise.

NEW JANITROL HEAT EXCHANGER PROVES RUGGED

A heat exchanger of unlimited long life has been introduced in the new Dura-tube Winter Air Conditioner by Surface Combustion Corporation's Janitrol Division in Columbus, Ohio. The Dura-tube exchanger uses a combination of time-proven Janitrol design and a special process developed by the National Bureau of Standards during World War II to protect military aircraft from destructive high temperatures.

The resulting heat exchanger, which will be used in all de luxe model Janitrol furnaces, is more durable than either cast iron or steel which have been used exclusively for many years. The new exchanger has virtually an unlimited life expectancy.

The American Gas Association has rated the Dura-tube type heat exchanger to withstand a normal heating temperature of 1100 degrees F. as compared with a rating of 875 degrees F. for cast iron or steel units. The Dura-tube unit maximum temperature, however, is kept below 800 degrees F. or more than 300 degrees below the maximum allowed by A.G.A. standards.

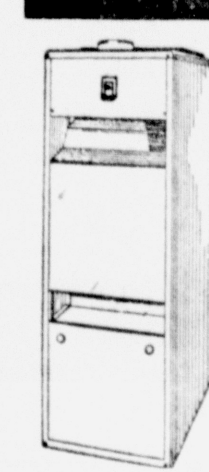

Used For 5 Years

The Janitrol Dura-tube development has been in use over the last five years in nearly 250,000 rugged, individual installations. No heat exchanger replacements have been required in that time. In tests completed by the Bureau of

Standards, the process used in Dura-tube units withstood quick chilling from 1200 degrees F. by immersion in water without cracking.

The process makes the heat exchanger a one-piece, gas-tight, safety-sealed unit that eliminates any chance of leakage by combustion gases into the circulating air. This "armored heart" also resists the combustion gas that tends to corrode cast iron or steel exchangers.

Gas Company, Franchised In 1928, Has Expanded Greatly With Community Demands

The Gettysburg Times had been serving this community 26 years when, in December 1928, its editions proclaimed a major event in the already colorful history of historic Gettysburg.

For in that year, 1928, the Gettysburg Gas Corporation was incorporated and franchised to supply natural gas to Gettysburg, Biglerville, Arendtsville and Bendersville.

Today, nearly a quarter-century later, natural gas service has become an integral part of community life in Gettysburg. And the gas company has, through the years, worked side by side in public service with the great newspaper which recorded its birth.

Gas Milestones passed by Gettysburg Gas Corporation were its joining the Columbia Gas System as a member firm in 1931. And, more recently, its merger with a sister-firm, and assumption of its present name, The Manufacturers Light and Heat Company.

Like those of a newspaper, the

functions of a gas company are inseparably linked to public and community service. According to J. N. Estep, manager for the gas company here, Manufacturers has invested heavily to fulfill these obligations.

In the past three years alone, Mr. Estep said, the gas company has spent over \$350,000 to improve its service in Gettysburg and the Gettysburg area. These projects included:

Area Projects Listed
1. In 1949, the remodeling and relocation of the gas company office to its present 15 York St. address. The new office includes a complete Home Service Kitchen and Auditorium.

2. In 1951, the replacement of over three miles of 3-inch gas line with a larger 6-inch line to meet the winter heating needs of nearby Littlestown.

3. In 1951, the replacement of five miles of 2-inch line with a larger 4-inch line to improve gas service to Mercersburg.

4. In 1952, the replacement of over two miles of line with a larger

EXPERT SHOULD INSTALL WINTER HEATING UNIT

Design and installation are more important than price if you're thinking of buying a warm air winter air conditioning system this year, says Glenn Freed, sales manager of the Harrisburg office of the Janitrol Heating and Air Conditioning Division, Surface Combustion Corporation.

A properly designed and installed warm air system, he says, will provide the home owner with more indoor comfort than any other type of domestic heating plant.

Such a system, he points out, comprises a "heating unit" which contains the furnace, blower, burner, humidifier and air filter; a "circulating system" which is composed of duct work, warm air registers and return air intakes, and "controls" which govern the operation of the blower and the burner. All are vital to efficient operation.

Get Heating Specialist
Thus, Freed warned, it's important that you select a competent, qualified heating specialist to make the installation. He offered the recommendations:

4-inch line to maintain more uniform gas pressures in Gettysburg's distribution system.

In addition to these distribution projects, Mr. Estep said, Manufacturers Light and Heat Company also completed two major transmission jobs here in the past two years.

One was a new \$135,000 line connecting Gettysburg with Manufacturers' Southern Pipeline Systems to the north.

The other was a new 10-inch line between this Southern Pipeline System and Texas Eastern Transmission Company's "Inch" lines near Marietta, Pa. This connection greatly improved the system from which Gettysburg gets most of its gas.

Bob projects included new gas regulating and measurement stations, and were designed to give Gettysburg and the Gettysburg area a larger link with its natural gas supply sources.

"These projects are typical of the steps the gas company is taking constantly to keep pace with ever-increasing demands for natural gas," Mr. Estep said.

Since 1941, our home heating customers in Gettysburg have more than doubled. The annual volume of gas we furnished to the community is up over 32 per cent."

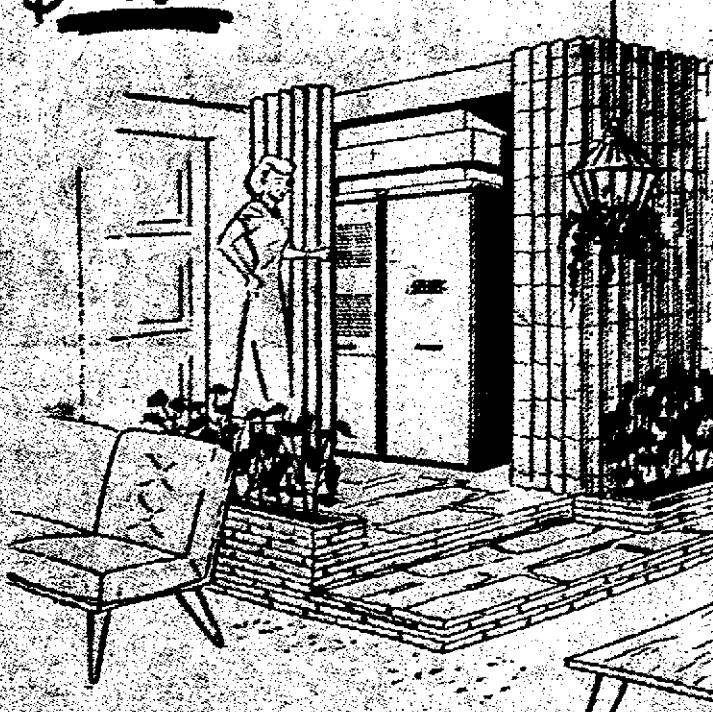

M-M-M-M-M! LOOKS GOOD. Amateur chefs appreciate the matchless convenience of the new built-in gas broilers, which light automatically. They like the comfortable height of the units. No need to bend or squat to see how their handiwork is coming. And the kitchen kings know that the food they cook in the gas broilers will have a delicious flame-kissed flavor.

1. Check on weatherproofing. A weather-tight house pays dividends in low heating costs.
2. Do not buy on price alone. A heating system is an investment in comfort for years to come. The actual price is not what you pay for original equipment. It also includes maintenance and fuel costs. A "cheapened" heating system will cost more in the long run than one which has been properly designed and correctly installed.
3. Make certain that your heating contractor is a qualified and reputable heating company.

Gas Company, Franchised In 1928, Has Expanded Greatly With Community Demands

The Gettysburg Times had been serving this community 26 years when, in December 1928, its editions proclaimed a major event in the already colorful history of historic Gettysburg.

For in that year, 1928, the Gettysburg Gas Corporation was incorporated and franchised to supply natural gas to Gettysburg, Biglerville, Arendtsville and Bendersville.

Today, nearly a quarter-century later, natural gas service has become an integral part of community life in Gettysburg. And the gas company has, through the years, worked side by side in public service with the great newspaper which recorded its birth.

Gas Milestones
Among milestones passed by Gettysburg Gas Corporation were its joining the Columbia Gas System as a member firm in 1931. And, more recently, its merger with a sister firm, and assumption of its present name, The Manufacturers Light and Heat Company.

Like those of a newspaper, the

functions of a gas company are inseparably linked to public and community service. According to J. N. Estep, manager for the gas company here, Manufacturers has invested heavily to fulfill these obligations.

In the past three years alone, Mr. Estep said, the gas company has spent over \$350,000 to improve its service in Gettysburg and the Gettysburg area. These projects included:

Area Projects Listed
1. In 1949, the remodeling and relocation of the gas company office to its present 15 York St. address. The new office includes a complete Home Service Kitchen and Auditorium.

2. In 1951, the replacement of over three miles of 3-inch gas line with a larger 6-inch line to meet the winter heating needs of nearby Littlestown.

3. In 1951, the replacement of five miles of 2-inch line with a larger 4-inch line to improve gas service to Mercersburg.

4. In 1952, the replacement of over two miles of line with a larger

EXPERT SHOULD INSTALL WINTER HEATING UNIT

Design and installation are more important than price if you're thinking of buying a warm air winter air conditioning system this year, says Glenn Freed, sales manager of the Harrisburg office of the Janitrol Heating and Air Conditioning Division, Surface Combustion Corporation.

A properly designed and installed warm air system, he says, will provide the home owner with more indoor comfort than any other type of domestic heating plant.

Such a system, he points out, comprises a "heating unit" which contains the furnace, blower, burner, humidifier and air filter; a "circulating system" which is composed of duct work, warm air registers and return air intakes, and "controls" which govern the operation of the blower and the burner. All are vital to efficient operation.

Get Heating Specialist
Thus, Freed warned, it's important that you select a competent, qualified heating specialist to make the installation. He offered the recommendations:

4-inch line to maintain more uniform gas pressures in Gettysburg's distribution system.

In addition to these distribution projects, Mr. Estep said, Manufacturers Light and Heat Company also completed two major transmission jobs here in the past two years.

One was a new \$135,000 line connecting Gettysburg with Manufacturers' Southern Pipeline Systems to the north.

The other was a new 10-inch line between this Southern Pipeline System and Texas Eastern Transmission Company's "Inch" lines near Marietta, Pa. This connection greatly improved the system from which Gettysburg gets most of its gas.

Both projects included new gas regulating and measurement stations, and were designed to give Gettysburg and the Gettysburg area a larger link with its natural gas supply sources.

"These projects are typical of the steps the gas company is taking constantly to keep pace with ever-increasing demands for natural gas," Mr. Estep said.

In 1944, our home heating customers in Gettysburg have more than doubled. The annual volume of gas we furnished to the community is up over 32 per cent."

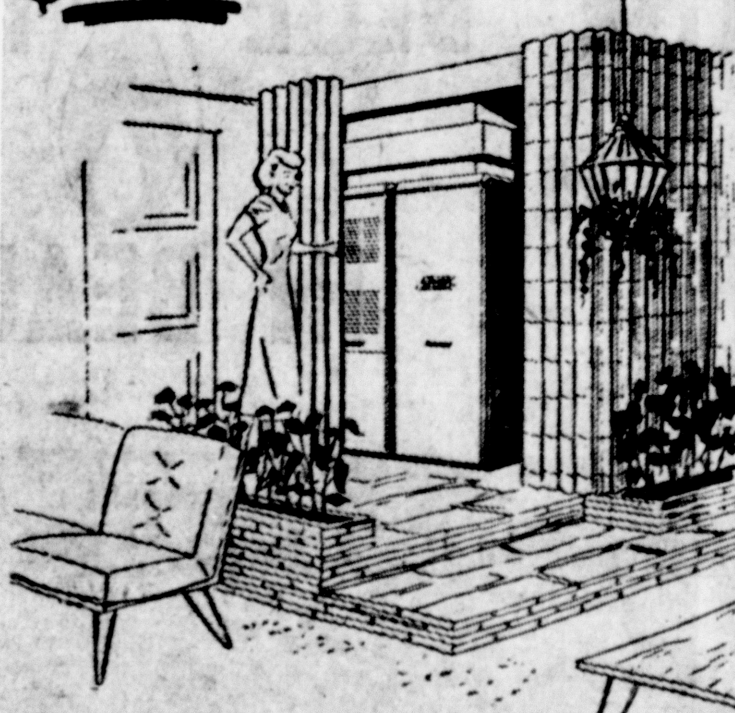

M-M-M-M-M! LOOKS GOOD. Amateur chefs appreciate the matchless convenience of the new built-in gas broilers, which light automatically. They like the comfortable height of the units. No need to bend or squat to see how their handiwork is coming. And the kitchen kings know that the food they cook in the gas broilers will have a delicious flame-kissed flavor.

1. Check on weatherproofing. A weather-tight house pays dividends in low heating costs.
2. Do not buy on price alone. A heating system is an investment in comfort for years to come. The actual price is not what you pay for original equipment. It also includes maintenance and fuel costs. A "cheapened" heating system will cost more in the long run than one which has been properly designed and correctly installed.
3. Make certain that your heating contractor is a qualified and reputable heating company.

EXPRESSSYSTEM HURRIES FUEL ACROSS NATION

Natural gas, one of the best known transcontinental travelers, is whisked across the country by its own multi-million dollar pipeline transportation system.

The invisible passenger, freshly cleaned and scrubbed, goes aboard the "Pipeline Express" with a first-class ticket to the millions of users throughout the nation.

Moving night and day underground, over mountains and across rivers and streams, the efficient flow of natural gas often is maintained by "booster" stations along the way.

Gas Dispatcher

Millions of dollars are invested in equipment and labor to keep gas

rolling along in sufficient supply in a tip-top condition. The head traffic "cop" in the gas transmission world is the dispatcher.

The moment gas leaves the field and enters the pipeline, the dispatcher is in control. No one opens or closes a valve without his permission. He alone decides what pressure and horsepower should be applied where and when.

Besides being a traffic director, a dispatcher must be a weather prophet, a multi-telephone handler, radio announcer and, in general, the pulse-taker of the entire system.

Customer's Needs

The primary factor involved is the customer's needs—past, present and future. The gas market is calculated for months, and perhaps, years ahead.

Cold weather, of course, brings a heavy demand for gas, but pipelines are just as busy in the summer. During the warm months, the use of gas by industries is increased. Also, gas going into underground storage pools keeps the summer flow going at a rapid rate.

Because natural pressure in many wells is not enough to deliver gas to its destination in sufficient quantities, compressor stations are needed to boost the pressure and speed of delivery.

Compressor Stations

At the same time, friction in the pipe slows the travel speed of gas so it has to be given a push along from one compressor station to another.

Compressor stations contain engines with thousands of horsepower which keep the gas moving as much as 1,000 pounds of pressure. Compressing gas is much like baling hay or cotton. The gas is squeezed so it will occupy a smaller space and have more "kick" when it flows through the pipeline.

Pressure is important in what is known as a "line pack" operation. Since the amount of gas packed into the lines can be adjusted over a wide range by varying the pressure, more gas can be pressed into the lines to help meet increased demands for gas during cold snaps.

Underground Storage

The summer operation of filling underground storage pools also provides adequate gas supplies near consumer markets during the cold months, when the demand for fuel gas soars.

At each station there is a battery of scrubbers, a series of tall steel towers that separate foreign particles from the gas. At the same time, the gas is dried to clear out any water vapor that might cause operating trouble.

Operating men watch the pipeline day and night. Modern laboratories are set up along the route to test samples and flow. Frequent efficiency tests detect signs of accumulated distillates, water or dirt that might have escaped the filters and driers.

Cleaning Pipeline

To keep the pipeline clean and operating at top efficiency, a "pig"—the same kind used to clean out pipelines during construction—is run through the line, pushing the foreign matter ahead for removal at the next station.

Like track-walkers on railroad lines, inspectors periodically cover every inch of the pipelines on foot. They look for leaks or erosion around the pipe and report it for repair.

Supplementing foot inspectors are air patrols. Planes or helicopters patrol the lines, looking for yellow patches of turf which signal line leaks. Using all the modern communication devices, the patrols notify a mobile repair unit of the leakage. In a short time, this unit is on the site to divert any serious trouble. The gas is checked once more before it enters the mains of customers.

FIRST PARENTS SEE GROWTH OF GAS INDUSTRY

A new baby in any household creates endless problems as well as many pleasures. The birth of the gas industry was no different.

At first the parents of this newborn child were not sure how to handle it, how to care for it. Its character and makeup were unknown and a great, the problems of making this strapping lad of unknown and potential expanded tenfold.

The Chinese of centuries before found gas in its "creeping" days when they first learned that gas could be used to heat vats of brine to refine it into salt.

Then, one of the infant's first steps came in 1792 when a Scotsman, William Murdoch by name, succeeded in manufacturing gas from coal. He used it to light his cottage and office.

This was the first and biggest step forward. But it was merely the beginning of a process of growing into manhood—the initial stride that would lead eventually toward today's giant \$14 billion industry serving more than 27 million customers in the United States.

The gas giant still was a long way from maturity when, in 1812, the London and Westminster Gas Light and Coke Company was chartered to light the streets and homes of the British capital.

Migrates To U. S.

This knee-pants youngster migrated to the U. S. within a few years. The next we heard from him was in Philadelphia, in 1796, when the M. Amoroise and Company, Italian fireworks manufacturers, arranged a coal gas lighting exhibition.

Gas got its first long pants in America in 1816, when the city of Baltimore chartered a coal gas manufacturing company to light its streets and homes.

Natural gas made its bow into public use only a few years later—in 1821 when citizens of Fredonia, N. Y., tapped a 27-foot gas well and overturned a barrel on the well-head to provide pressure. These townspeople discarded whale oil and candles to light their homes and shops. Gas cooking gained notice for the first time when the Marquis de Lafayette was served a dinner cooked by gas flames at a Fredonia inn.

Accepted Gradually

However, the early years of the gas industry were lean and long. This ambitious youth was accepted rather slowly. Gas for lighting was the main sale product at that time. And, through the years, kerosene and its successor, the incandescent electric lamp, put up stiff competition for the gas industry.

As a result of the heavy pressure from lighting rivals, the industry graduated from its carefree youth to a level-headed maturity. Service was expanded and methods of operation improved.

Research for wider utilization of gas resulted over the years in the discovery of more than 25,000 in-

fore it enters the mains of customers. After it is inspected for cleanliness, it goes through a measuring device and into the distribution utility's regulators. Although the pipelines may carry gas at as much as hundreds of pounds of pressure, it is cut down to as little as a few ounces of pressure for gas customers' appliances.

ustrial uses for gas and seven mighty important home uses—cooking, heating, water heating, incineration, refrigeration, air conditioning and clothes drying.

Transport Problems Arise

One major barrier to the growth and maturity of the gas industry that came hand-in-glove with a derisive use of the "magic blue flame" was the problem of transporting gas from the fields to the customer. This involved the movement of gas over distances as great as thousands of miles.

The initial experiment to transport gas for any distance was the use of hollowed-out logs in 1870 to carry natural gas twenty-five miles, from West Bloomfield to Rochester, N. Y. Although this project was dropped as a "bust" after about two years, the gas industry refused to be licked.

Iron pipe, first used in 1872, became the forerunner of today's almost unbelievable network of gas pipelines. This new and improved underground transportation system now stretches out 435,000 miles—enough pipe to span the world 18 times.

This child of nature that has grown into our giant gas industry still grows. It expands at the rate of a billion dollars a year—promising no end to its greatness and value as a wondrous gift to the home, science and industry.

BUILDS NEW ADDITION

A large addition is being constructed to the Fred B. Nair building, Mercersburg R. I. It is planned to have the building open to the public in November. The display room will have a glass frontage of 40 feet and 80 feet in depth. Nair deals in brand name merchandise.

NEW JANITROL HEAT EXCHANGER PROVES RUGGED

A heat exchanger of unlimited long life has been introduced in the new Dura-tube Winter Air Conditioner by Surface Combustion Corporation's Janitrol Division in Columbus, Ohio. The Dura-tube exchanger uses a combination of time-proven Janitrol design and a special process developed by the National Bureau of Standards during World War II to protect military aircraft from destructive high temperatures.

The resulting heat exchanger, which will be used in all de luxe model Janitrol furnaces, is more durable than either cast iron or steel which have been used exclusively for many years. The new exchanger has virtually an unlimited life expectancy.

The American Gas Association has rated the Dura-tube type heat exchanger to withstand a normal heating temperature of 1100 degrees F. as compared with a rating of 875 degrees F. for cast iron or steel units. The Dura-tube unit maximum temperature, however, is kept below 800 degrees F. or more than 300 degrees below the maximum allowed by A.G.A. standards.

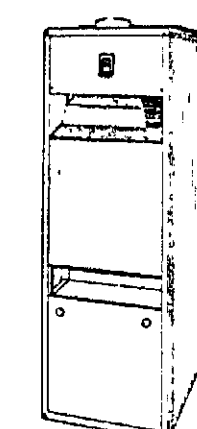

Used For 5 Years

The Janitrol Dura-tube development has been in use over the last five years in nearly 250,000 rugged, individual installations. No heat exchanger replacements have been required in that time. In tests completed by the Bureau of

Standards, the process used in safety-sealed unit that eliminates Dura-tube units without quick any chance of leakage by chilling from 1200 degrees F. by bustion gases into the circulating immersion in water without crack. This "armored heart" also log. resists the combustion gases that

The process makes the heat exchanger tend to corrode cast iron or steel changer a one-piece, gas-tight, exchangers.

Pipeline Builders Open New Trade Routes To Give Gas Users Miracle Fuel

Pipeline builders, the modern trail blazers of progress, are constantly opening up new trade routes to link millions of gas users throughout the country with vast reserves of miracle fuel.

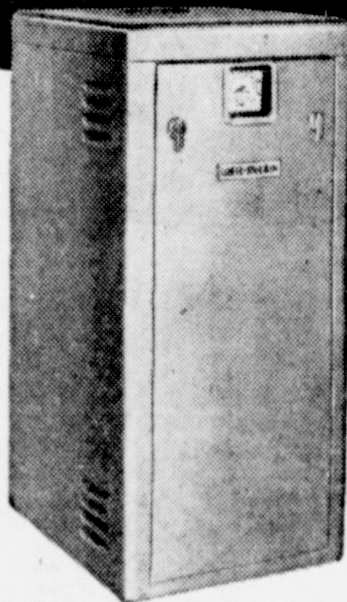

Millions of dollars and man-hours of labor, plus years of research and planning have gone into the construction of today's giant pipeline system, which criss-crosses entire nation.

In all industry there is probably nothing more exciting or fast-stepping than the creation and construction of a long-distance pipeline.

Obtain Permission
First, permission for construction must be obtained from the Federal Power Commission. The FPC requires everything in black and white — the proposed route, gas supply, market potential and financial sources.

Pipeline engineers must work day and night to blueprint every step of the proposed construction. Capital must be obtained, permits and rights-of-way must be secured.

CHEAP HEATING SYSTEM CAN BE FALSE ECONOMY

Because a new home is generally built or purchased in warm weather, and the heating system generally hidden from view, there is a tendency for the public to subordinate heating to lesser but more obvious features.

But good heating is perhaps the biggest Home Sweet Home comfort value which can be built into a new house. In this climate, heating is truly the "heart" of the home.

Buying a home is the thrill of a

lifetime. Also a major investment. And heating can make the difference between a lifetime of snug comfort and a disappointingly drafty dwelling. Cutting corners on unseen heating is a temptation when the summer sun is bright. But a few months cold weather reveals its false economy.

Once the FPC gives the green light to the project, workmen begin cutting the trail. Crews clear a path — 50 feet wide or more — to prepare for the ditching machines and the pipe-layers.

Payroll Is High
Laying a pipeline requires many crews of men, so the payroll cost alone is high. Added to this is the expense of thousands of dollars worth of heavy equipment, boosting the construction cost to as much as \$150,000 a mile for large diameter pipelines.

Preliminary planning must determine what diameter size is to be used. This depends largely on the market demand for gas and economy of operation.

Moving ahead with the project is a ditching machine that scoops out the dirt and empties it to the side of the excavation. Following this is the side-boom tractor — a derrick-like machine that swings the pipe sections into place beside the ditch.

Typography Causes Obstacles
Streams and rivers, and hilly terrain present serious obstacles in pipeline construction. Often pipe is weighted down to the bottom of a stream. In other cases, a trench must be blasted out of the stream bed for the pipe.

Rivers that are too turbulent to be crossed underwater are spanned with giant suspension bridges. Mountains and hills are scaled by pipe which is bent to the contour of the land. Highways and railroads are tunneled under hundreds of times during the pipeline construction.

Mass-produced steel pipe that can withstand pressure of up to 1,000 pounds or more can be laid at the rate of a mile a day. Welding of the lines is one of the important keys to long-line construction.

Welder Signs Work
Sealing lengths of pipe together has become a fine art. Each welder is required to "sign" his work by making his identifying mark on a finished weld. His welds are checked and often X-rayed for the slightest pinhole. Only a few faulty welds will cost the welder his job.

Following the welder is a huge machine that cleans the outside of the pipe, applies a coat of protective coal-tar enamel or similar compounds, and spirally wraps it with glass fiber, asbestos felt and kraft paper.

For extra safety, an electrical device known as a "holiday detector" is used to search for or locate breaks or thin spots in the coating which are not visible.

COMPANY COMING—HOSTESS UNFLURRIED. In the spacious automatically lighted broiler of this new matchless gas range, the hostess can prepare a delicious dinner of steak, browned potatoes, tomatoes and peach halves with a minimum of fuss and bother.

The food will have a wonderful flame-kissed flavor. And, best of all, the house won't be filled with smoke because matchless gas broiling is smokeless. Grease particles or smoke left in the broiler are consumed by the live gas flame.

lifetime. Also a major investment.

Do Not Compromise
Quality heating equipment by a reliable manufacturer is solid value which should not be compromised. Complaint-free engineering means little maintenance and service call-backs. It means winter after

er winter of carefree comfort with long term satisfaction for the whole family.

Reliable installation by a qualified dealer is perhaps even more important. Choose a dealer with a proved reputation in the community... one who is in business to stay and who will stand behind your purchase with expert service in the years ahead.

A good system of warm air distribution is essential. It is doubly important if cooling is to be added at some later date.

Quality Is Cheaper
"It costs only 40 cents more in monthly payments for a quality furnace and installation instead of inadequate, mediocre heating. Better heating equipment will far outlive the 15-year mortgage," according to H. C. Gurney, sales manager of the Janitrol House Heating and Air Conditioning Division of Surface Combustion Corporation of Columbus, Ohio.

"Figuring that same difference for better quality heating on a 3-year modernization loan, the additional monthly payment is approximately \$1.60, and the priceless dividends of assured heating over the years will far outweigh the small difference," adds Mr. Gurney.

"Remember, good house heating equipment is the one basic home building component that is actually less costly today than it was 20 years ago according to our records," Mr. Gurney asserts.

The ancients attributed to the devil the power that tin has to harden copper.

Gas Water Heaters Playing Important Role In Family

Americans like to be kept in hot water — thanks to our mania for cleanliness and our love of comfort.

Millions of us enjoy the luxury of abundant hot water 24 hours a day without ever giving it a second thought.

Check Classification
But additional millions of Americans are daily experiencing the Number One Aggravation of homeowners — an inadequate supply of hot water.

Which classification do you fit into? Ask yourself these three questions. Do you ever have to forego the pleasure of a shower when you want one? Do you have to plan your housework around your hot water supply? Do you sometimes have to postpone doing the dishes or the laundry because you lack hot water?

If you answer yes to any of these questions, then you belong in the class with frustrated homeowners. Putting up with an out-

Southwest Editor Scoffs At Crockett

ALBUQUERQUE, N. M. (AP) — Editor Dan Burrows of the Albuquerque Tribune noted recently that some tourists were looking for the Davy Crockett monument in Santa Fe.

Santa Fe dates its beginning back to the days of Coronado in, roughly, 1540.

Said Burrows "To a city with as much ancient historical background as Santa Fe, Davy Crockett would be practically a current character."

dated water heater is not only aggravating, it's false economy.

The average family uses their water heater more than any other appliance in the home—for dishwashing, bathing, laundry, cleaning and a total of 140 different household tasks.

Efficient Heater
Overworking your heater takes years off its life. And it adds greatly to your operating costs. The efficiency of many of your automatic appliances depends upon your hot water supply — and more than likely, your disposition does, too.

Increasing use of home laundry and automatic dish washing equipment has brought with it a need for larger size water heaters in most homes. A properly sized tank is one which is large enough to provide a margin of extra capacity to meet maximum current, as well as possible future demands.

Even if you don't already own an automatic dishwasher, you may decide to add one at some future date. Or perhaps you plan to remodel your kitchen or add a laundry room. If so, this is a good time to take stock of your water heating equipment. Is it adequate for both your present and future needs? Is it conveniently located? Is it fully automatic? Is it economical to operate? If not, then it will be even less so when you add new laundry and kitchen appliances, or if your family increases in numbers.

Wise Homeowner
The wise homeowner plans for the future as well as today. By selecting the right size heater you can give your family the luxury of abundant hot water 24 hours a day, every day. And you can add the new labor-saving conveniences still to come without impairing the efficiency of your heater.

Water heaters range in size 30 to 100 gallons. The size should be determined by two things: The amount of hot water you need and the recovery capacity of the heater. This is the ability of the heater to replenish hot water as fast as it is used.

GAS OPERATED COOLING UNITS PROVING WORTH

Saw a statement the other day that "housekeeping can be fun." That one must have been written by a man. Let's face it, housekeeping is work! Of course we are grateful to those men who have designed and built all our wonderful labor saving modern appliances. We'll admit these appliances have changed housekeeping from downright drudgery to pleasant work.

What's this about all-year air conditioning? Maybe that sounds confusing because you have always thought of air conditioning as strictly a summer operation. But conditioned air doesn't always mean cold air. With gas all-year air conditioning you and your family can be comfortable whether it's snowing

so hard you can't see across the street or your neighbor is frying eggs on his sidewalk.

And another advantage of this wonderful system is that it is house-wide. A small window unit cools just one room. But the modern gas air conditioner means comfortable living in the kitchen, dining room, living room, bedroom, children's room and bathroom.

Down With The Duster
Never did hear of a homemaker who enjoyed dusting, did you? By filtering all the air in the house, this unit cuts dusting to a minimum. Windows do not have to be opened so dust and dirt are sealed outside. The home is free of soot, bacteria and the pollen that makes life miserable for hay fever and asthma sufferers.

Doctors are everlastingly preaching the importance of restful sleep to good health. Every night is a good night if your home is gas air conditioned. You never have to reach for an extra blanket in the middle of the night or sleep fitfully because a single sheet is swelteringly

unbearable. Babies aren't fussy because of heat rash. Hot weather is tough on a young healthy heart and can increase its load as much as 43%. Think of the strain that hot humid days and nights impose on older folks or those with heart conditions.

Make Humidity Work
You know the oldie about "it isn't the heat it's the humidity." A gas all-year air conditioning unit makes humidity work for you instead of against you. In mop-the-brow weather, it takes gallons of water out of the air. In winter, it puts needed water back—fresh circulated water is evaporated and spread through the entire house, preventing the dry parching heat that used to be considered a necessary evil of winter home heating. Winter or summer the whole family is healthily comfortable with the proper amount of humidity. And furniture doesn't dry out, doors don't stick because wood doesn't swell and contract as it does with wide humidity variations.

Maybe improved morale is not the

most important factor in considering year-round air conditioning for your home but it certainly rates some consideration.

For instance, there's meal planning. You know what a chore it is to try to tempt droopy appetites on steamy days. In a recent survey, the American Gas Association says, 45% of the surveyed families reported appetites and eating habits improved after the installation of house-wide air conditioning.

Saves Disposition
You can work around an air conditioned home all day and not have the dish rag look by the time hubby comes home in the evening. Junior-size dispositions won't be disturbed by hot weather either. Maybe you thing having perfect year-round weather in your home is an impossibility budget-wise. But remember that when Servel is a member of your family your household chores are easier; you don't tire so easily. The clean filtered air is easier on your furnishings. Draperies and upholstery stay cleaner longer. Walls stay cleaner and only

Boy Has Troubles Coming And Going

JACKSONVILLE, Fla. (AP) — Wayne Densbeer's joy ride cost \$600 and he didn't even know where he was going. The 4-year-old managed to start the engine on his mother's parked car and put the automatic drive lever in forward speed.

The car eased into another parked car. Then Wayne tried reverse and stepped on the accelerator. The car zoomed backward into a utility pole, snapping the pole at its base.

Wayne wasn't hurt — at least not in the accident.

The ALL NEW Universal NOW PERMITS THE TRUTH TO BE TOLD ABOUT OLD FASHIONED SPACE HEATERS

QUESTION: Isn't it true that gas heaters are expensive to operate?

ANSWER: No, the UNIVERSAL is equal in economy to any other fuel.

QUESTION: Aren't all space heaters dangerous to operate?

ANSWER: Not all. The UNIVERSAL is 100% safe. Power failures, sudden temperature changes, and dust do not affect the safety of the NEW UNIVERSAL. There is absolutely no danger of overheating and while in operation, the NEW UNIVERSAL has an absolutely cool cabinet, safe for children.

QUESTION: Aren't SPACE HEATERS dirty and don't they have exposed wiring and controls?

ANSWER: No, the UNIVERSAL has air filters and concealed wiring and controls. No danger of children getting into the heater's operation.

QUESTION: Why is it that all space heaters permit wide temperature fluctuations?

ANSWER: All space heaters do not. For example, the NEW UNIVERSAL will heat an area, warm the floors, and will keep them at that temperature until shut off. The UNIVERSAL compensates for sudden temperature changes, drafts, etc., as readily as the finest central home heating system.

QUESTION: All space heaters have an ugly appearance and are inconvenient in that they must be removed in summer. Is the UNIVERSAL different?

ANSWER: Absolutely. The outward appearance of the UNIVERSAL will compliment any room furnishings, and there is no need to remove in summer since the built in air circulator will satisfy the same need as the conventional summer fan. The design of this NEW UNIVERSAL permits installations to be made so that the room is set off to best advantage rather than aid the heater to do the job.

QUESTION: Why do you say the UNIVERSAL is NEW? It's just a space heater, isn't it?

ANSWER: This is not just a space heater. COMPARE THESE UNIVERSAL FEATURES WITH OTHER SPACE HEATERS.

1. Safer operation
2. Constant counterflow air circulation
3. Real economical operation
4. Beautiful cabinet appearance
5. The UNIVERSAL can be ducted for more efficient house heating
6. The cabinet remains absolutely cool even in full operation
7. Its size permits much less floor space to be used.

GAS WATER HEATING

Life is easier with an automatic L.R. gas water heater. A gas water heater, laundry-rated (L.R.) to your automatic washer will supply all the 160° water for load after load of clothes. Gas is the fastest way to heat water and is much more economical, too.

GAS DRYING

You get sheer luxury with an automatic gas dryer. Save steps from washer to backyard—dozens of times. Save stretching, stooping, lifting, and lugging. Gas dries clothes up to four times faster than any other dryer. And it takes only a penny's worth of gas to dry a full load of clothes.

GAS AIR CONDITIONING

Comfortable living with an automatic gas air conditioner. You control the climate in your home the year round. No matter the temperature outside, your home inside will be as cool as a mountain breeze. Only the gas air conditioners are silent and so economical.

GAS INCINERATION

It's so sanitary with an automatic gas incinerator. Say goodbye for good to garbage and refuse troubles. Every scrap is consumed. There is no nasty clean-up job, no worries about going out in darkness, snow, sleet, or rain. A gas incinerator cost less to install than any other garbage disposer. There is no motor to dull, no blades to wear out.

GAS COOKING

Take it easy with an automatic "Matchless" Gas Range. Nothing could be more modern. All burners on the new automatic gas range light automatically. Broiler and oven as well as top burners. And only with gas do you get smokeless broiling.

GAS REFRIGERATION

It's easy living with a Servel Refrigerator. There is no motor to wear out. Servel stays silent—lasts longer. Its refrigeration system is the only one guaranteed twice as long as any other. And Servel's Ice-Maker makes ice cubes automatically. A tiny, thrifty gas flame does the whole refrigeration job.

GAS HEATING

Your home is always clean with an automatic gas furnace. Gas heating for your home is quick, clean, and low in cost. Trouble free and worry free and comfortable 24 hours of every day. Plan now to have automatic gas heating installed in your home this fall before demands on heating contractors are too great. Gas—the best way to heat your home

CHEAP HEATING SYSTEM CAN BE FALSE ECONOMY

Because a new home is generally built or purchased in warm weather, and the heating system generally hidden from view, there is a tendency for the public to subordinate heating to lesser but more obvious features.

But good heating is perhaps the biggest Home Sweet Home comfort value which can be built into a new house. In this climate, heating is truly the "heart" of the home.

Buying a home is the thrill of a

gas reserves and prices must be figured and every inch of the proposed pipeline route must be checked.

Once the FPC gives the green light to the project, workmen begin cutting the trail. Crews clear a path — 50 feet wide or more — to prepare for the ditching machines and the pipe-layers.

Payroll Is High
Laying a pipeline requires many crews of men, so the payroll cost alone is high. Added to this is the expense of thousands of dollars worth of heavy equipment, boosting the construction cost to as much as \$150,000 a mile for large diameter pipelines.

Preliminary planning must determine what diameter size is to be used. This depends largely on the market demand for gas and economy of operation.

Moving ahead with the project is a ditching machine that scoops out the dirt and empties it to the side of the excavation. Following this is the side-boom tractor — a derrick-like machine that swings the pipe sections into place beside the ditch.

Typography Causes Obstacles
Streams and rivers, and hilly terrain present serious obstacles in pipeline construction. Often pipe is weighted down to the bottom of a stream. In other cases, a trench must be blasted out of the stream bed for the pipe.

Rivers that are too turbulent to be crossed underwater are spanned with giant suspension bridges. Mountains and hills are scaled by pipe which is bent to the contour of the land. Highways and railroads are tunneled under hundreds of times during the pipeline construction.

Mass-produced steel pipe that can withstand pressure of up to 1,000 pounds or more can be laid at the rate of a mile a day. Welding of the lines is one of the important keys to long-line construction.

Welder Signs Work
Sealing lengths of pipe together has become a fine art. Each welder is required to "sign" his work by making his identifying mark on a finished weld. His welds are checked and often X-rayed for the slightest pinhole. Only a few faulty welds will cost the welder his job.

Following the welder is a huge machine that cleans the outside of the pipe, applies a coat of protective coal-tar enamel or similar compounds, and spirally wraps it with glass fiber, asbestos felt and kraft paper.

For extra safety, an electrical device known as a "holiday detector" is used to search for or locate breaks or thin spots in the coating which are not visible.

COMPANY COMING—HOSTESS UNFLURRIED. In the spacious automatically lighted broiler of this new matchless gas range, the hostess can prepare a delicious dinner of steak, browned potatoes, tomatoes and peach halves with a minimum of fuss and bother.

The food will have a wonderful flame-kissed flavor. And, best of all, the house won't be filled with smoke because matchless gas broiling is smokeless. Grease particles or smoke left in the broiler are consumed by the live gas flame.

lifetime. Also a major investment. reveals its false economy.

Do Not Compromise
Quality heating equipment by a reliable manufacturer is solid value-drafty dwelling. Cutting corners on unseen heating is a temptation when the summer sun is bright. But a few months cold weather

er winter of carefree comfort with long term satisfaction for the whole family.

Reliable installation by a qualified dealer is perhaps even more important. Choose a dealer with a proved reputation in the community... one who is in business to stay and who will stand behind your purchase with expert service in the years ahead.

Quality Is Cheaper
"It costs only 40 cents more in monthly payments for a quality furnace and installation instead of inadequate, mediocre heating. Better heating equipment will far outlive the 15-year mortgage," according to H. C. Gurney, sales manager of the Janitrol House Heating and Air Conditioning Division of Surface Combustion Corporation of Columbus, Ohio.

Figuring that same difference for better quality heating on a 3-year modernization loan, the additional monthly payment is approximately \$1.60, and the price-less dividends of assured heating over the years will far outweigh the small difference," adds Mr. Gurney.

"Remember, good house heating equipment is the one basic home building component that is actually less costly today than it was 20 years ago according to our records," Mr. Gurney asserts.

The ancients attributed to the devil the power that tin has to harden copper.

Latest Model Gas Ranges To Have Many Superior Features

The stampede is on! All across the nation housewives are corraling their husbands and rushing them to dealers showrooms to see displays of the latest model gas ranges.

It's 1955 fall matchless gas range campaign time again and the gas industry has put out the Welcome Mat, enjoying its role of "The Host with the Most" to millions of Americans from coast to coast.

The gas industry estimates that a total of 2,000,000 gas ranges will be sold this year. For the first seven months of 1955, gas range sales hit 1,272,100, an increase of 132 per cent over the same period last year, representing \$120,000,000 in factory billings.

Building Boom

The home building boom, increased modernization of older-type homes, the trend toward built-in kitchen appliances, and the fact that one out of every two homes in America is using a stove 10 years or older and in need of replacing, are a few of the reasons why Americans are turning out in droves to see the latest model gas ranges.

Throughout the campaign, manufacturers will emphasize the features that interest Americans most. These are automatic timers, streamlined styling, built-in units, wider use of colors and metallic finishes, and the availability of many models incorporating totis-

GAS INDUSTRY OPERATES DRY BANK SYSTEM

The gas industry is engaged today in one of the biggest treasure hunts of modern times.

A far-reaching search for new gas reserves is being carried on night and day by thousands of geologists and engineers who probe the depths of the earth for keys to nature's buried storehouses of fuel.

However, finding gas isn't a pick and shovel job of prospecting. There is no fool-proof method of locating gas locked thousands of feet underground without actually drilling a well.

Signs Have Disappeared

"Burning springs" — gas escaping from fissures in the earth's crust — are probably the only definite signs of gas reservoirs but these have long since disappeared.

It was a burning spring in 1775 that led to the eventual discovery of the important gas fields of the Appalachians. These gas-fed flames were located on a tract of land in West Virginia which was dedicated by George Washington as a national park.

The "findings" of the first natural gas well to be put into use in the U. S. came by accident. Little boys playing with fire — that was the story. The lads found that flames shot up from the ground when a burning stick landed in the "spring" area. A 27-foot well on that site, at Fredonia, N. Y., brought in the nation's first natural gas well in 1824.

Accidental Discoveries

In the years to follow, gas was often found by accident — either in what was expected to be a salt well or in oil drilling. Unfortunately, the gas found in that era was generally vented away from the wells or burned off.

Today, it takes big money, scientific knowledge and a lot of steel nerves to sink a well thousands of feet underground in search of oil or gas. The odds against finding gas or oil are heavy and the series, griddles, deep fat fryers, and deep well cookers, right in the appliance itself.

Utility companies will stress the superior advantages of gas as a fuel — cooler, cleaner, faster, more dependable.

PRESSURE SAUCEPANS AND GAS RANGES GO TOGETHER. The homemaker who has a pressure cooker can do in minutes cooking jobs that used to take hours. This handy utensil quickly turns out savory soups and delicious steamed puddings. It tenderizes old fowl and tough but flavorful cuts of meat.

Once the proper pressure has been reached in the saucepan, it is extremely important to reduce heat promptly and maintain right temperature. A modern matchless gas range provides instant split-degree temperature control for safe, efficient pressure cooking.

financial risk is great.

Only one out of nine wells drilled in undeveloped areas is successful. The average cost of drilling each well is more than \$100,000. And, building up those odds is the fact that only one out of every 40 wells produces profitably.

Explorations involve Expense. The great expense in exploring for gas cannot be over-emphasized. Exploration for gas and oil since 1930 cost the industry 13 billion dollars. In 1953, the two billion dollars for exploration was equal to the entire year's natural gas revenues.

Gas prospectors, the modern 49ers, take this financial burden into consideration when they call upon every available scientific

method in an effort to determine whether a certain area contains gas or oil.

Finding gas or oil is much more difficult than locating veins of metal ore. Unlike many other minerals, natural gas defies electronic detection and geological studies. The proper conditions may prevail, but the gas may not.

Study Soil, Rock

Geologists, or "rockhounds" and "winkle-chasers" as they are called, make careful studies of the soil and rock of an area in an attempt to see how the earth below is constructed.

The basic idea is to determine whether the structure of the earth thousands of feet down will contain a "pocket" of porous rock.

Fire Company Gives Air Force Big Lift

TAMPA, Fla. (AP) — MacDill Air Force Base has eight fire companies but it had to call on the Tampa Fire Department for one emergency. A giant B36 bomber dropped in with a request for help in repairing a radio antenna wire, broken off near the connecting point with the tail section, five stories up in the air.

Since MacDill doesn't have a B36 repair stand and its fire company didn't have a ladder tall enough to do the job, the base had to get the city's aerial truck to hoist the repairmen up.

Breach Of Promise On Malayan Railway

SINGAPORE (AP) — Six pretty Malay girl receptionists with easy smiles and charm are making travel more pleasant on the Malayan railways. But trouble is brewing.

The railway traffic operating union complains that the management had promised that present employees would have first choice when vacancies came to be filled.

Instead, the union charges, the management broke that understanding by appointing the six girl receptionists at stations in Singapore and Kuala Lumpur "whose only connection with the railway was that they had probably travelled once or twice by train."

TRYON, N. C. (AP) — Anxious to increase competition in a beard growing contest, part of Polk County's 100th anniversary celebration, the centennial committee raised the age limit to 105. The previous limit was 100.

Wife Wants Husband Properly Licensed

OKLAHOMA CITY (AP) — Mrs. Glen Edward Thomason appeared in police court and told Judge James Demopolos she'd take all the blame for her husband's ticket for speeding. She explained it was her fault because she had disconnected the car's speedometer.

Mrs. Thomason asked that she be allowed to pay the fine. The judge went one better and suspended sentence.

DON'T JUNK

a good furnace

CONVERT IT TO FULLY

AUTOMATIC GAS HEAT

with a

Spreader-Flame BURNER

A. G. A. LISTED

You need not dispose of a good furnace or boiler to enjoy all the advantages of automatic gas heat. Let us install a Gordon Conversion Gas Burner. Costs far less than gas designed equipment to install and no more to operate.

If pressing a button once for a full season's comfort appeals to you, come in for a demonstration of the Gordon Spreader-Flame Burner made by the company that pioneered the gas conversion industry.

buy heating

"for keeps"!

HEATING IS BASIC

It is a major, lifetime investment for the security and comfort of the whole family. A mistake in equipment can be very costly... so select heating quality with care. It pays.

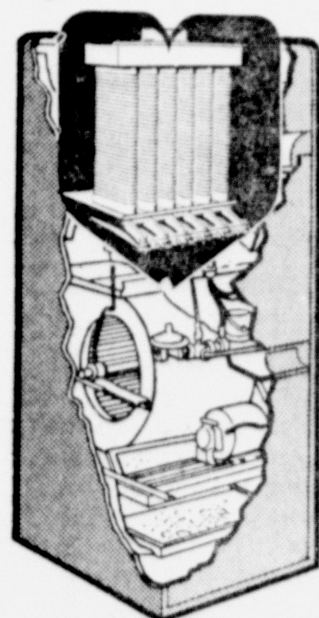

The one part of your gas-fired furnace that takes a terrific fire-beating is its very heart... its heat exchanger. (Note illustration on left.)

In ordinary heating equipment its life expectancy may be very low indeed...

But your furnace's "heating heart" can last a lifetime with

Dura-tube

...the "armored heart" heat exchanger that is practically indestructible...found only in the gas-fired

deluxe **Janitrol Crusader**

★ PROOF OF DURABILITY: In nearly 1 1/4 million Janitrol Dura-tubes, in over 5 years, records show there have been no replacements.

★ BETTER THAN CAST-IRON; BETTER THAN STEEL: This process has been approved by American Gas Association for heat exchanger temperatures far beyond that allowed for either cast-iron or for steel!

One of the most important ways of measuring heating quality is its Durability. Dura-tube's actual replacement record of zero in 5 years and in nearly 1 1/4 million tubes, speaks volumes.

FLOOR FURNACES

Get a big job from a small but well-built unit that stands out from the crowd. Janitrol has built-in quality that buys a big dollar's worth of heat.
